Section 207 of Title II of the Higher Education Act mandates that the Department of Education collect data on state assessments, other requirements, and standards for teacher certification and licensure, as well as data on the performance of teacher preparation programs. The law requires the Secretary to report on the quality of teacher preparation to the Congress April of each year. Annual state and institutional report cards are due annually in October and April respectively.

The Secretarial report is due April of each year, with State reports due in October and teacher preparation program reports due in April. The 2000-2001 state reports to the Secretary are due on October 7, 2002. The Commission received the institutional report card data from teacher preparation programs on or before April 8, 2002.

Paperwork Burden Statement

This is a required data collection. Response is not voluntary. According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1840-0744 (expiration date: 4/30/2003). The time required for states to complete this information collection is estimated to average 765 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, DC 20202-4651. If you have comments or concerns regarding the status of your individual submission of this form, write directly to: Assistant Secretary, Office of Postsecondary Education, U.S. Department of Education, 1990 K Street, NW, Room 6081, Washington, DC 20006.

Introduction

In October 1998, Congress passed and the President signed the Higher Education Reauthorization Act, which contained many provisions affecting higher education. Title II of this Act included federal grant programs that advance efforts to improve the recruitment, preparation, and support of new teachers and mandated certain reporting requirements for institutions and states on teacher preparation and licensing. The intent of Congress was that the programs and requirements of Title II would provide incentives for improving teacher preparation systems and provide greater accountability for ensuring teacher quality.

Title II established new reporting requirements for: (1) the sponsors of teacher preparation programs; (2) state agencies that certify new teachers for service in public schools; and (3) the Secretary of Education in the United States Department of Education. Section 207 of Title II requires institutions to submit to states, annual reports on the quality of their teacher preparation programs. States are required to collect the information contained in these institutional reports and submit annual reports each October to the U.S. Department of Education that includes information about teacher certification requirements, accountability and performance information about preparation programs, and a description of efforts to improve teacher quality.

Title II requires that, annually, the U.S. Secretary of Education compile all state reports into a single national report for submission to Congress. The national report provides comprehensive national data on the manner in which institutions prepare teachers, including pass-rate data on assessments required for certification or licensure. The report also describes what states require of individuals before they are allowed to teach, and how institutions and states are raising standards for the teaching profession. This report contains the information that will be submitted to the U.S. Department of Education in October 2002 in compliance with the Title II reporting requirements for states.

About the Commission

The California Commission on Teacher Credentialing is an agency in the Executive Branch of California State Government. Created in 1970 by the Ryan Act, it is the oldest of the autonomous state standards boards in the nation. The agency is responsible for the design, development, and implementation of standards that govern educator preparation for the public schools of California, the licensing and credentialing of professional educators in the State, the enforcement of professional practices of educators, and the discipline of credential holders in the State of California. The Commission works to ensure that those who educate the children of California are academically and professionally prepared.

The Commission carries out its statutory mandates by:

- Conducting regulatory and certification activities;
- Developing preparation and performance standards in alignment with state-adopted academic content standards;
- Proposing policies in credential-related areas;
- Conducting research and program evaluation;
- Monitoring fitness-related conduct and imposing credential discipline; and
- Communicating its efforts and activities to the public

The California Commission on Teacher Credentialing consists of nineteen commissioners, fifteen voting members and four ex-officio, non-voting members. The Governor appoints fourteen voting commission members and the State Superintendent of Public Instruction or his/her designee serves as the fifteenth voting member. The four ex-officio members are appointed by the major segments of the California higher education constituency: Association of Independent California Colleges and Universities; Regents of the University of California; California Postsecondary Education Commission; and the Trustees of the California State University. The commission members who are appointed by the Governor consist of six classroom teachers, one school administrator, one school board member, one non-administrative services credential holder, one faculty member from an institution of higher education, and four public members. Commission members are typically appointed to four-year terms.

The Commission convenes eleven times a year in open meetings to review policy initiatives, pending legislation, and to consider requests and appeals that fall within the statutory purview of the Commission. The Commission's work remains central to the agenda that the Governor and the Legislature have set to improve student achievement across California.

<u>Members of the Commission</u>	
Alan Bersin, Chairman Administrator	Carol Katzman Public Representative

Nadia Davis School Board Member	Carol Bartell Association of Independent California Colleges and Universities
Margaret Fortune Public Representative	Joyce Justus Regents, University of California
Beth Hauk Teacher	Jeff Marston California Postsecondary Education Commission
Elaine C. Johnson Public Representative	Bill Wilson California State University

The California Context

The need for more highly qualified teachers is both a national and state concern. Throughout the nation, states are facing a growing demand for more teachers while also meeting the challenge of improving the quality of their teacher workforce. The challenges facing California and its policy makers mirror those in other states and are compounded by dramatic enrollment growth, a culturally and linguistically diverse student population, the need to raise student achievement levels, and a technology-driven economy that requires a highly skilled workforce. Preparing California's students to be successful in the 21st century will require teachers who can create meaningful learning opportunities that will help students develop high-level skills and meet state academic content and achievement standards.

During the 2000-2001 school year, the California Department of Education reports that there were more than 6 million children enrolled in California's 8,761 public schools.¹ Student enrollment has grown by more than 25 percent during the last decade, contributing to a shortage of fully qualified teachers in our classrooms. California will need nearly 195,000 new teachers over the next decade to accommodate this growing student enrollment.²

The California Department of Finance has reported that no single racial or ethnic group constitutes a majority of California's population. The composition of the state's population is reflected in its public school enrollments. Indeed, California schools are among the most culturally and linguistically diverse in the nation. More than 42 percent of children enrolled in kindergarten through twelfth grade are Hispanic or Latino, 37 percent are white, slightly more than 11 percent are Asian, 9 percent are African American and 1 percent are Native Americans. Together, these students speak more than 57 different languages and more than 25 percent are English language learners. The diversity in languages and learners has created a need for teachers who possess a flexible and deep knowledge about the subjects they teach and an ability to adapt instructional strategies to meet student needs.

The twin challenges of growth and diversity have prompted the State to expand its capacity to train educators while undertaking extensive efforts aimed at improving the recruitment, retention, and preparation of K-12 teachers. Institutions of higher education have increased the capacity of their teacher preparation programs, additional state funds have been allocated for the expansion of intern and pre-intern programs, and the state has fully funded an induction program for all beginning teachers.

The California Report

In accordance with federal guidelines, this report contains the following information:

- A description of California's certification structure, requirements, and assessments including:
 - A description of program and teacher standards and the alignment of State teacher certification requirements and assessments with California's K-12 Academic Content Standards;
 - Information on emergency permits and waivers of state certification requirements and the distribution of under-qualified teachers in high-poverty school districts; and
 - A description of the criteria for assessing the performance of teacher preparation programs within the state.
- A description of state efforts to improve teacher quality.
- Pass rate and quartile rankings of program sponsors for all assessments used by the state for initial credentialing, including:
 - The California Basic Educational Skills Test (CBEST);
 - The Reading Instruction Competence Assessment (RICA) for Multiple Subject and Education Specialist (Level I) candidates; and
 - Subject matter assessments (e.g., the Multiple Subjects Assessment for Teachers (MSAT), Praxis and Single Subject Assessments for Teaching in the areas of agriculture, mathematics, art, music, business, physical education, English, health, home economics, industrial and technology education, languages other than English, biological science, chemistry, geoscience, physics, and social science).
- Copies of institutional report cards that were submitted in April 2002. Institutional reports include the following information:
 - Qualitative and contextual information regarding the Multiple Subject, Single Subject, and Education Specialist programs offered;
 - Quantitative program information about candidates enrolled in teacher preparation programs, student-teacher supervisors, ratios between candidates and supervisors, the numbers of candidates who completed programs during the 2000-2001 reporting period; and
 - Pass-rate data for all assessments used by the state for initial credentialing.

The Commission is pleased that the data provided by institutions validate the evidence collected about program quality during the course of accreditation reviews. As the Commission moves to an even stronger standards-based system across the learning to teach continuum, the Title II reporting system will strengthen the Commission's accountability system and lead to improvements in the preparation of California educators and improved student achievement in our public schools.

Teacher Certification in California

Teachers must be certified by the California Commission on Teacher Credentialing (CCTC) in order to be employed in a California public school or by a public school district. California's credential structure is organized by subject matter and the classroom setting in which individuals teach rather than school setting or age group. Within this structure, the State has established certification tiers that ensure candidates meet certain requirements before advancing to the second level or Professional Clear teaching credential. There are four basic credentials that authorize individuals to teach in public school settings: the Multiple Subject Teaching Credential, the Single Subject Teaching Credential, the Education Specialist Instruction Credential, and the Designated Subjects Credential. The Commission issues credentials for other educational occupations requiring state certification, such as child development teachers, school counselors and school psychologists, school nurses, librarians, and administrators. Approximately 6.6 percent of the credentials issued in California authorize individuals to provide administrative or pupil personnel services in public schools.

Subject Matter and Classroom Setting

California's credential structure emphasizes both content knowledge and pedagogical competence. Candidates pursuing a multiple subject, single subject, or education specialist teaching credential must hold a bachelor's degree in a subject other than Education and acquire pedagogy through a program of professional preparation. The State offers multiple routes into teaching including traditional one-year postbaccalaureate programs at institutions of higher education, two-year district or university sponsored intern programs, and four to five year "blended" programs that allow for the concurrent completion of a baccalaureate degree (including subject matter requirements) and professional preparation. All credential programs are held to the same standards of quality and effectiveness and all programs include instruction in pedagogy and supervised teaching.

All credential applicants must obtain a college degree through a regionally accredited college or university in a subject other than education and demonstrate academic preparation in the subject matter in which they wish to teach. Candidates must also complete a Commission-approved teacher preparation program and receive a formal recommendation from the California college, university, or local educational agency where they completed the program.

The credential most often held by those teaching in an elementary school classroom is the Multiple Subject Teaching Credential. This credential authorizes individuals to teach a variety of subjects in a self-contained classroom in preschool, kindergarten, grades 1 through 12, and classes organized primarily for adults.

The appropriate credential to teach a specific subject such as mathematics or English in a departmentalized classroom at the middle or high school level is the Single Subject Teaching Credential. This credential authorizes public school teaching in a departmentalized classroom in preschool, kindergarten, grades 1 through 12, and classes organized primarily for adults.

A Single Subject Teaching Credential authorizes an individual to teach in one of the 16 specific content areas listed below:

Single Subject Credential Content Areas	
Agriculture	Mathematics
Art	Music
Business	Physical Education
English	Science: Biological Science
Health Science	Science: Chemistry
Home Economics	Science: Geoscience
Industrial and Technology Education	Science: Physics
Foreign Language	Social Science

The Education Specialist Instruction Credential authorizes individuals to teach students with certain disabilities. This credential is separated into six categories of specialization: Mild/Moderate Disabilities, Moderate/Severe Disabilities, Visual Impairments, Deaf and Hard-of-Hearing, Physical and Health Impairments, and Early Childhood Special Education. Individuals seeking the Education Specialist Instruction Credential complete a special education preparation program that includes student teaching in the area of their chosen specialization.

The Designated Subjects credential authorizes teaching or service in technical, trade, or vocational courses or in courses organized primarily for adults. These credentials are based primarily on demonstrated experience in the subject matter and account for about 4 percent of the credentials issued by the Commission. Although candidates are required to complete a Commission-approved program of personalized preparation to qualify for a Professional Clear credential in this series, the focus of this report is on the requirements and preparation programs relating to the multiple subject, single subject, and education specialist credentials.

First and Second Level Certificates Requirements

Federal reporting guidelines require states to describe their certification structure using a common set of definitions that adapted from the National Association of State Directors of Teacher Education Certification (NASDTEC). California's two-phase credential structure for the multiple subject, single subject, or education specialist credentials fits the following definition of the Level A and Level B certificates.

Type A (Level I) certificate means a certificate issued upon completion of an approved program to an applicant who has met requirements of the issuing state relating to citizenship and moral, ethical, physical, or mental fitness, but has not completed ancillary requirements which must be met before issuance of a Type B certificate.

Type B (Level II) certificate means a certificate issued (1) after completion of an approved program and all ancillary requirements established by the state, OR (2) after completing an alternative program, all post-secondary degree and ancillary requirements established by the state, and successfully completing not less than 27 months of professional employment in the function covered by the certificate.

Using these definitions, California's teaching credentials are classified as follows:

Type A (Level I)	Type B (Level II)
Preliminary Multiple Subject Credential	Professional Clear Multiple Subject Credential
Preliminary Single Subject Credential	Professional Clear Single Subject Credential
Preliminary Level I Education Specialist Credential	Professional Level II Education Specialist Credential

Type A or Level I credentials are issued to beginning teachers for a maximum of five years and are non-renewable. Candidates are expected to complete additional requirements for the Type B or Level II credential within the five-year period of the preliminary credential. These ancillary requirements include: 1) A 5th year of academic study including 30 semester units or completion of a Commission-approved induction program, and 2) Coursework in health education, special education, and computer education. The completion of an individualized induction plan is required for candidates pursuing the Professional Level II Education Specialist Credential. The Professional Multiple or Single Subject Credential and the Professional Level II Education Specialist Credential are issued for a maximum of five years and are renewable upon completion of 150 hours of professional development.

The Commission has established a set of requirements for the Preliminary and Professional Clear credentials for each of the three basic credential categories described above. A list of the credential requirements for the Multiple Subject, Single Subject, and Education Specialist credentials is included in Table 2-1.³

³ Detailed information about requirements for the preliminary or professional clear teaching credential may be found at www.ctc.ca.gov/credentialinfo/credinfo.html.

Table 2-1: Requirements for the Multiple Subject, Single Subject, and Education Specialist Credentials

Preliminary		Professional Clear	
Document Name	Requirements	Document Name	Requirements
Preliminary Multiple Subject Teaching Credential	<ul style="list-style-type: none"> • A baccalaureate or higher degree in a content area other than education from a regionally accredited college or university; • Verification of subject matter competence by completion of a Commission-approved academic degree program approved in the subject area to be taught or the passage of a subject-matter examination; • Completion of a professional teacher preparation program including student teaching <u>and</u> formal recommendation by the program sponsor; • Passage of the California Basic Educational Skills Test (CBEST); • Completion of a comprehensive reading instruction course; • Passage of the Reading Instruction Competence Assessment (RICA); and • Successful completion of a course or passage of an exam on the provisions and principles of the United States Constitution. 	Professional Clear Multiple Subject Teaching Credential	<ul style="list-style-type: none"> • All the requirements for the Preliminary Multiple Subject Teaching Credential <i>and</i> • Completion of a Commission-approved induction program, <i>or all of the following</i>: • Completion of a 5th year of study and recommendation by a California teacher preparation program sponsor with a Commission-accredited program; • Successful completion of course in health education • Successful completion of a course in Special Education (Mainstreaming) • Successful completion of one or more courses on computer education
Preliminary Single Subject Teaching Credential	<ul style="list-style-type: none"> • A baccalaureate or higher degree in a content area other than education from a regionally accredited college or university; • Verification of subject matter competence by completion of a Commission-approved academic degree program approved in the subject area to be taught or the passage of a subject-matter examination; • Completion of a professional teacher preparation program including student teaching <u>and</u> formal recommendation by the program sponsor; • Passage of the California Basic Educational Skills Test (CBEST); • Completion of a comprehensive reading instruction course • Successful completion of a course or passage of an exam on the provisions and principles of the United States Constitution. 	Professional Clear Single Subject Teaching Credential	<ul style="list-style-type: none"> • All the requirements for the Preliminary Single Subject Teaching Credential <i>and</i> • Completion of a Commission-approved induction program, <i>or all of the following</i>: • Completion of a 5th year of study and recommendation by a California teacher preparation program sponsor with a Commission-accredited program; • Successful completion of course in health education; • Successful completion of a course in Special Education (Mainstreaming); and • Successful completion of one or more courses on computer education.
Preliminary Level I Education Specialist Instruction Credential	<ul style="list-style-type: none"> • A baccalaureate or higher degree from a regionally accredited college or university; • Verification of subject matter competence by the passage of a subject-matter examination or completion of a Commission approved subject-matter program; • Completion of a professional Education Specialist preparation program including student teaching <u>and</u> formal recommendation by the program sponsor; • Passage of the California Basic Educational Skills Test (CBEST); • Completion of a comprehensive reading instruction course; • Passage of the Reading Instruction Competence Assessment (RICA); • Completion of a course or passage of an exam on the provisions and principles of the United States Constitution; and • An offer of employment from a local education agency. 	Professional Clear Level II Education Specialist Instruction Credential	<ul style="list-style-type: none"> • All the requirements for the Preliminary Level I Education Specialist Teaching Credential <i>and</i> • Completion of a Commission-approved induction program, <i>or all of the following</i>: • Completion of an individualized induction plan; • Successful completion of course in health education; • Successful completion of one or more courses on computer education; • Verification of two years of successful experience; • Formal recommendation by the California teacher preparation program sponsor with a Commission-accredited program through which the induction plan was completed.

Specific Assessment Requirements

California uses a variety of examinations to assess candidates' competencies in basic skills, subject matter proficiency, and professional knowledge. The Commission operates one of the largest educator testing systems in the country with over 175,000 individual examinations administered each year. All candidates are required to pass a basic skills assessment in order to obtain a preliminary or professional clear teaching credential. California law requires candidates to demonstrate subject matter knowledge by passage of a Commission-approved subject-matter assessment or by completing an academic degree program approved by the Commission for teaching in the subject area. Additionally, the State requires new Multiple Subject and Education Specialist Credential candidates to demonstrate professional knowledge and competency in reading instruction prior to attaining a preliminary or professional clear credential.

For initial teacher certification or licensure, California uses the following written tests or performance assessments, with passing scores as noted:

Assessment of Basic Skills

Test Name	State Cut Score	Test Score Range
California Basic Educational Skills Test (CBEST) in three sections: <ul style="list-style-type: none">▪ Math▪ Reading▪ Writing	41 in each of three sections (Scores as low as 37 are acceptable if the total score is at least 123)	20-80 for each section

The California Basic Educational Skills Test (CBEST) provides an assessment of a candidate's basic knowledge and skills in reading, mathematics, and writing. These skills are usually acquired through academic experience in high school or in the course of completing baccalaureate degree requirements.

While California Education Code Section 44252 (f) requires candidates to take the CBEST prior to admission to a program of professional preparation, passage of the examination is not required for entry into the state's teacher preparation programs. Programs are required to assure that candidates demonstrate proficiency in basic skills before advancing them to daily student teaching responsibilities. Candidates admitted to University or District Internship programs are required to pass the CBEST prior to assuming their intern teaching responsibilities (California Education Code Section 44252 (b)). *All* candidates must pass the CBEST before they can be recommended for an initial credential.

Assessment of Professional Knowledge and Pedagogy

Test Name	State Cut Score	Test Score Range
Reading Instruction Competence Assessment (RICA)		
Written Examination	81	0-120
Video Performance Assessment	17	6-24

The Reading Instruction Competence Assessment (RICA) is designed specifically for testing professional knowledge acquired through a program of professional preparation. All multiple subject and special education programs are required to include instruction in the teaching of reading in their methodology courses.

The purpose of the RICA is to ensure that candidates for Multiple Subject Teaching Credentials and Education Specialist Instruction Credentials (Preliminary Level I or Professional Clear Level II) possess the necessary knowledge and skills for the provision of effective reading instruction to students. Candidates are required to demonstrate competence in each of the following domains:

- Planning and organizing reading instruction based on ongoing assessment;
- Developing phonological and other linguistic processes related to reading;
- Developing reading comprehension and promoting independent reading; and
- Supporting reading through oral and written language development.

The RICA consists of two assessment options: the RICA Written Examination and the RICA Video Performance Assessment. Candidates are required to pass one of these assessments. The Written Examination is a pencil and paper assessment that consists of multiple-choice and constructed-response questions. The Video Performance Assessment centers around a set of three candidate-created videotape packets that show the candidate teaching reading in a variety of settings: whole class, small group, and individual. Each video packet contains the videotaped instruction, a written instructional context form, and a written reflection form.

Candidates must pass RICA before they can be recommended for an initial credential, but passage is not required for candidates to complete a teacher preparation program. California Education Code Section 44283 requires that candidates for an initial Preliminary or Professional Clear Multiple Subject Teaching Credential and candidates for the initial Preliminary Level I or Professional Clear Level II Education Specialist Instruction Credentials (special education) pass the RICA prior to attaining their credential. Passage of this assessment is not a requirement for the Single Subject Teaching Credential.

Assessment of Subject Matter Knowledge

California requires candidates to be knowledgeable about the content area they will teach. Candidates who will teach multiple subjects in a self-contained classroom, generally in an elementary school setting, are required to demonstrate subject matter competency in elementary subjects, (English, mathematics, science, social sciences, physical education, visual and

performing arts, and human development) while candidates who will teach individual subjects in departmentalized classrooms are required to demonstrate subject matter competency in one of 16 specific content areas. Content knowledge is assessed prior to a candidate's entry into a program of professional preparation, and verification of subject matter competency is required prior to the commencement of student teaching.

California verifies a candidate's knowledge of an academic content area by one of two methods: achievement of a passing score on an appropriate subject matter examination or completion of an academic degree program approved by the Commission for teaching in the subject area. The content area examinations measure the skills, knowledge, and abilities candidates have acquired in specific subject areas, and are not acquired in a teacher preparation program. Approximately 62 percent of Multiple Subjects credential candidates and 34 percent of Single Subject credential candidates choose the subject matter examination option to demonstrate subject matter expertise. All other candidates satisfy this requirement by completion of a Commission-approved subject matter program.

California utilizes a variety of subject matter assessments to verify academic content knowledge. These assessments are aligned with the specific content areas authorized in the following subject areas:

California Credentials	
Multiple Subjects	
Agriculture	Mathematics
Art	Music
Business	Physical Education
English	Science: Biological Science
Health	Science: Chemistry
Home Economics	Science: Geoscience
Industrial and Technology Education	Science: Physics
Languages other than English	Social Science

Table 2-2 lists the current examinations that may be used to verify subject matter competence for Multiple Subject Teaching Credentials, Single Subject Teaching Credentials, and Education Specialist Instruction Credentials. Some content areas require candidates to take more than one exam.⁴

⁴ Additional information about subject matter examinations may be found on the Commission's website at: www.ctc.ca.gov/profserv/examinfo/examinfo.html.

Performance Assessments

Test Name	State Cut Score	Test Score Range
Reading Instruction Competence Assessment (RICA)		
Video Performance Assessment Option	17	6-24

As noted above, the Reading Instruction Competence Assessment is designed to test professional knowledge about the instruction of reading. Candidates have the option of taking the exam by either written examination or by video performance. Both options test the same sets of skills and knowledge in four domain areas. The Video Performance Assessment requires candidates to create three separate videotape packets that show the candidate teaching reading in a variety of settings: whole class, small group, and individual. Only about 1 percent of candidates utilize the video performance option when taking the RICA.

Future Assessment Requirements

California State law requires that teacher preparation programs include a performance assessment of each Preliminary Multiple and Single Subject Credential candidate's teaching ability. The Commission is developing a prototype teaching performance assessment that program sponsors may choose to embed in their programs. Currently, standards for assessment are under development and are expected to be in place beginning in 2002-03. Additionally, the Commission is beginning its field test of the prototype that will include both formative assessment data as well as summative assessment data for each credential candidate. The assessment system will include a set of performance tasks and scales, assessor training, and administrator training. Alternatively, program sponsors may choose to develop their own teaching performance assessments. All teaching performance assessments are expected to be fully imbedded in teacher preparation programs in 2003-2004. This assessment is discussed further in the next section.

Alignment of Standards & Assessments

This section of the report provides a brief background of California's recent teacher preparation reform effort including a description of state standards for programs and teachers. Further, this section describes the alignment between teacher certification requirements and assessments and the standards and performance assessments established for California public school children.

Teacher Preparation Reform in California

Efforts to reform California's credential system began in 1992 when the Governor and the Legislature enacted legislation (SB 1422, Chapter 1245, Statutes of 1992, Bergeson) calling for the Commission on Teacher Credentialing to complete a comprehensive review of the requirements for earning and renewing teaching credentials. The Commission conducted a systematic study that included the appointment of an advisory panel to examine credential requirements and make recommendations for reform and restructuring.

As a result of the recommendations of the SB 1422 advisory panel, the Commission sponsored omnibus legislation in 1998 (SB 2042, Chapter 548, Alpert/Mazzoni) that called for:

- The implementation of new standards to govern all aspects of teacher development, including subject matter studies, professional preparation, induction, and continuing growth;
- The creation of a two-tiered teaching credential that would establish the completion of a standards-based induction program as a requirement for the Level II or Professional Clear credential;
- Increased accountability by building a teaching performance assessment into initial teacher preparation;
- The alignment of all teacher preparation standards with California's K-12 Academic Content Standards for Students and the *California Standards for the Teaching Profession*; and
- The establishment of multiple routes into teaching that will meet the same high standards, including programs that "blend" pedagogy and subject matter courses into a single program.

The passage of SB 2042 served as the impetus for an extensive standards and assessment development effort designed to significantly improve the preparation of K-12 teacher candidates. Pursuant to statute, the new standards are aligned with the State's K-12 Academic Content Standards for students and with the *California Standards for the Teaching Profession*. This alignment extends to subject-matter exams, creating stronger linkages between the content of the undergraduate subject matter programs and the subject-matter exams that candidates may take in lieu of those programs.

After extensive input from California educators, administrators and policymakers, the Commission adopted four sets of new standards over the course of the past year. They are as follows:

- Standards of Quality and Effectiveness for Elementary Subject Matter Preparation, adopted September 2001.
- Standards of Quality and Effectiveness for Professional Teacher Preparation Programs, adopted September 2001.
- Standards of Quality and Effectiveness for Blended Programs of Undergraduate Teacher Preparation, adopted October 2001.
- Standards of Quality and Effectiveness for Professional Teacher Induction Programs, adopted March 2002.

Standards that govern the preparation of teachers working with special needs students were reviewed in 1996-1997. This review resulted in the establishment of standards for the Preliminary Level I Education Specialist Instruction Credential and the Professional Clear Level II Education Specialist Credential architecture that is currently in place.

In June of 2002, the professional teacher induction programs standards were also approved by the Superintendent of Public Instruction in accordance with California law. The anticipated implementation date for the new standards is the 2003-04 academic year⁵.

During the two-year implementation period from 2001 to 2003, all currently approved Elementary Subject Matter Preparation Programs and all currently accredited Multiple and Single Subject Teacher Preparation programs, including Blended Programs, as well as all induction programs are required to submit program documents to the Commission demonstrating how each program meets the applicable new standards under SB 2042. All programs must implement the new standards by December 31, 2003.

⁵ Information about the Commission's new standards may be found at www.ctc.ca.gov.

Standards and Criteria for Teacher Certification

Standards for Prospective Teachers

Subject matter preparation program standards exist in each of the following single-subject content areas: Agriculture, Art, Business, English, Health, Science, Home Economics, Industrial and Technology Education, Languages other than English, Mathematics, Music, Physical Education, Social Science, Driver Training, and Multiple Subjects (Elementary School Teaching).

Through its accreditation review process, the Commission holds institutions accountable for ensuring that programs meet standards of quality and effectiveness and for ensuring that candidates meet prescribed competence standards.

In addition to the requirements identified in the *Teacher Certification in California* section of this report, the Commission has established Teaching Performance Expectations that describe what beginning teachers should know and be able to do regardless of pupil level or content area. These unique, overarching standards define the levels of pedagogical competence and performance that the Commission expects all candidates to attain as a condition for earning an initial teaching credential.⁶ The Commission expects institutions to verify individual attainment of the standards prior to recommending a candidate for a teaching credential. Institutions and districts offering programs of professional preparation are expected to assess candidates in the following areas:

- Making Subject Matter Comprehensible to Students;
- Assessing Student Learning;
- Engaging and Supporting Students in Learning;
- Planning Instruction and Designing Learning Experiences for Students;
- Creating and Maintaining Effective Environments for Student Learning; and
- Developing as a Professional Educator.

The Commission requires institutions to determine that candidates have fulfilled the standards of professional competence and is currently developing a teaching performance assessment to meet this expectation.

⁶ A detailed description of the standards may found in the following documents:

Standards of Quality and Effectiveness for Professional Teacher Preparation Programs. California Commission on Teacher Credentialing. This document is available online at: www.ctc.ca.gov/SB2042/SB2042_info.html.

Standards of Quality and Effectiveness for Education Specialist Credential Programs, Published by the California Commission on Teacher Credentialing, December 1996.

The passage of SB 2042 in 1998 resulted in the adoption of new standards for teacher preparation that ensure the alignment of subject matter, preparation and induction standards for teachers with California's K-12 Academic Content Standards. These standards were designed specifically to ensure that teacher preparation programs adequately prepare prospective teachers to effectively teach all students the content of the K-12 academic content standards and to use state-adopted instructional materials.

The Standards of Quality and Effectiveness for Teacher Preparation Programs include standards related to: program design, governance, and qualities; preparation to teach curriculum to all students in California schools; preparation to teach all students in California schools; and supervised field work. These standards cover critical areas such as classroom management, reading instruction, child development, assessing students in relation to the K-12 academic content standards, intervening to help students meet the K-12 standards, computer skills, students with special needs, and English learners.

Under SB 2042, emphasis programs that authorize candidates to work with certain populations are being reexamined. It is expected that the Early Childhood Education and the Middle Grades Emphasis programs will continue and their content will be integrated into program elements of the applicable new standards.

In addition, in California, teachers of English Language Learners must hold an appropriate credential document authorization for English language development, specially designed academic instruction delivered in English, or content instruction delivered in the primary language. These programs, which include the Crosscultural, Language, and Academic Development (CLAD) and Bilingual, Crosscultural, Language and Academic Development (BCLAD) programs, will need to be reconfigured to conform to changes in applicable law. All Multiple and Single Subject programs that receive SB 2042 approval will also include authorization for the teaching of English Learners in the general education classroom, pursuant to AB 1059.

In addition, the teacher preparation program standards include a set of teaching performance expectations that define the pedagogical skills and abilities expected of new teachers. These teaching performance expectations form the basis for the development of a Teaching Performance Assessment (TPA) that will be required for the Preliminary credential for all multiple subject and single subject candidates. This performance assessment will be embedded in preparation programs. Consistent with California law, teacher preparation programs may develop their own assessment or may use the California Commission on Teacher Credentialing prototype TPA. The prototype will provide the teacher candidate with both formative as well as summative assessment data. The formative data will consist of detailed feedback that will assist candidates in documenting the quality of their teaching and focus on those aspects of teaching in which they need further development and support. The summative data will indicate the degree to which candidates have successfully accomplished the performance tasks that comprise the TPA. All candidates will need to pass the TPA in order to be recommended for a preliminary credential. A professional teacher induction program will then use the results of the TPA to inform the development of an individual induction plan for each candidate. The Commission expects to begin its field test of the prototype in October 2002 with completion in the summer of 2003.

The Standards of Program Quality and Effectiveness for the Subject Matter Requirement for the Multiple Subject Teaching Credential include standards related to: the substance of subject matter program curriculum; qualities of the subject matter program curriculum; leadership and implementation of the subject matter programs; and content specifications for the subject matter requirement for the multiple subject teaching credential. Content requirements include knowledge of English/language arts, history/social science, math, science, physical education, visual/performing arts and human development. New standards in math, science, history/social science, English/language arts that have been aligned to the state's adopted content standards for students will be adopted by the Commission in the fall of 2002.

And finally, the Standards of Quality and Effectiveness for Blended Programs of Undergraduate Teacher Preparation programs were adopted at the Commission's October 2001 meeting. These standards have also been appended to the standards for Elementary Subject Matter Preparation and Professional Teacher Preparation Standards.

Standards for Practicing Teachers

In 1997, the Commission and the State Board of Education adopted, and the Superintendent of Public Instruction approved the *California Standards for the Teaching Profession* setting forth the standards for professional teaching practice in California. The standards were developed to facilitate the induction of beginning teachers into their professional roles and responsibilities by providing a common language and a vision of the scope and complexity of teaching. The *California Standards for the Teaching Profession* guide teachers as they define and develop their practice.⁷

Under SB 2042, the new two-tiered credentialing system mandates a two-year induction period that will be required to earn the Professional Credential. Teachers who hold a preliminary credential must complete the two-year teacher induction program of support and formative assessment during their first two years of teaching as a requirement for earning the professional teaching credential.

In March 2002, the Commission adopted Standards of Quality and Effectiveness for Professional Teacher Induction Programs. These standards establish the expectations of the Commission and the Superintendent of Public Instruction for new teacher induction. By design, these standards, coupled with standards for subject matter preparation and standards for professional teacher preparation, reflect a learning to teach continuum. Only induction programs that meet these standards may recommend candidates for a Professional Teaching Credential.

In California induction programs may be offered by public and private K-12 school districts, county offices of education, and/or institutions of higher education. Local educational agencies may apply for and receive state funding to support induction programs through the Beginning Teacher Support and Assessment Program (BTSA), a program that is administered jointly by the Commission and the California Department of Education.

⁷ Additional information about the *California Standards for the Teaching Profession* may be found at the following website: www.etc.ca.gov/cstppublication/cstpreport.html

For implementation of all newly adopted standards, the Commission has established regional teams that are designed to provide technical assistance to all currently-approved programs and institutions that will need to submit program approval documents responding to the new standards. These regional teams are staffed with at least five Commission and California Department of Education Beginning Teacher Support and Assessment (BTSA) staff. The Commission is also making effective use of technology by establishing a special section on the Commission's website for items related to the new standards and the implementation process, provided extensive technical assistance to those program sponsors who are considered "early adopters," and Commission staff has made presentations at numerous professional gatherings to help the field understand the new credential structure, the SB 2042 standards, and the transition process. The Commission anticipates that the new standards will be implemented by all teacher preparation programs by no later than December 31, 2003.

Standards and Assessments for Students in Public Schools

The California State Board of Education has adopted a set of core academic content standards in four curriculum areas for students in kindergarten through grade 12: English-language arts, mathematics, history-social science, and science. The K-12 Academic Content Standards are the basis for the subject matter frameworks, the adoption of instructional materials, and the standards-aligned tests in California's student performance assessment system.⁸

California's student assessment system, the California Standardized Testing and Reporting (STAR) program, was authorized by the Governor and the Legislature in 1997 and includes the Stanford Achievement Test, Ninth Edition, Form T (Stanford 9), and additional questions that are aligned with the K-12 Academic Content Standards. The program also includes the Spanish Assessment of Basic Education, Second Edition (SABE/2), designed for students whose native language is Spanish, and the California Standards Test.

The Stanford 9 is a nationally normed multiple-choice achievement test. Public school students in grades 2 - 11 are tested in reading, language (written expression) and mathematics. Students in grades 2 - 8 are also tested in spelling, and students in grades 9 - 11 are tested in science and social science. The purpose of the Stanford 9 is to determine how well California students are achieving academically compared to the national norm group of students tested.

The California Standards Tests in English language arts, mathematics, science, and history-social science are comprised of items that were developed specifically to assess students' performance on California's content standards. The State Board of Education adopted the content standards that specify what all California children are expected to know and be able to do. The content standards are grade and course specific.

Alignment of Teacher Credential Standards with California Student Content Standards

⁸ Additional information about California's academic content standards for students may be found at: www.cde.ca.gov/board

SB 2042 requires that each candidate recommended for a credential or certificate demonstrate satisfactory ability to assist students to meet or exceed state content and performance standards for pupils adopted pursuant to subdivision (a) of California Education Code Section 60605. The new, standards-based credential system is intended to hold programs and candidates accountable for teaching and learning and reflect congruence with California's K-12 Academic Content Standards. Each of the various pathways to earning a preliminary credential – integrated programs of subject matter preparation and professional preparation, postbaccalaureate programs of professional preparation, and internship programs of professional preparation – reflect this requirement.

Additional working groups are meeting to link, align, and coordinate teacher certification standards with state content standards for students in Mathematics, Science, Social Science, and English Language Arts. In June 2002, the Commission adopted new subject matter requirements for Mathematics, Science, Social Science, and English. These requirements are aligned with the state student content standards as well as standards established by national teacher associations in each subject area (i.e., National Council of Teachers of Mathematics, National Council for the Social Sciences, National Council of Teachers of English, National Science Teachers Association.) The teacher certification standards for these subject areas have been drafted, and are currently undergoing field review. The anticipated implementation date for the new standards is the 2003-04 academic year.

Statewide and Institutional Pass Rates

This section of the report provides statewide information about the number of individuals who completed programs of professional preparation in the 2000-2001 academic year and information about the performance of those candidates who took any assessments required for initial certification in California. The performance data are based on the institutional report card data submitted by the 85 postsecondary institutions and school districts that were approved by the Commission to offer Multiple Subject, Single Subject, and Education Specialist credential programs in California for the 2000-2001 academic year.

Statewide Assessments used for Certification

In accordance to the federal reporting guidelines of the Higher Education Act, this report provides a ranking of institutions based on pass rates for the California Basic Educational Skills Test (CBEST), subject matter content examinations, and the Reading Instruction Competence Assessment (RICA). Table 4-1 on the next page indicates the specific California examinations used in the reporting of the assessment categories and a description of the State requirements for those examinations.

Important Note: The knowledge assessed by the CBEST and subject matter examinations are not typically acquired through the teacher preparation program. The verification of the basic skills and subject matter knowledge is required before advancement to the supervised classroom teaching portion of a teacher preparation program. The RICA is currently the only assessment required for certification that is designed to test the professional knowledge acquired through a program of professional preparation. Since passage of this exam is not a requirement for the Single Subject Teaching Credential, the performance data in this report are specific to candidates completing Multiple Subject and Education Specialist credential programs only.

Table 4-1: Description of the Assessments Used in the Report

Assessment Categories	Examination Description	Who must take the examination(s)	When passage of the examination(s) is required
Basic Skills	CBEST – the assessment of basic skills in reading, writing and math)	All multiple subject, single subject, and education specialist credential candidates	Before advancement to the supervised classroom teaching portion of the teacher preparation program
Professional Knowledge/Pedagogy	RICA – the assessment of the skills and knowledge necessary for the effective teaching of reading	All multiple subject and education specialist credential candidates	Before recommendation for the credential
Academic Content Areas	Subject matter examinations (SSAT and/or Praxis) for art, English, languages other than English, math, music, social science, and sciences – the assessment of subject matter content knowledge	Any single subject or education specialist credential candidate who chooses the examination option in the specified content areas to fulfill the subject matter requirement for teachers	Before advancement to the supervised classroom teaching portion of the teacher preparation program
Other Content Areas	Subject matter examinations (SSAT and/or Praxis) for multiple subject (MSAT), agriculture, business, health science, home economics, industrial technology education, and physical education – the assessment of subject matter content knowledge	Any multiple subject, single subject or education specialist credential candidate who chooses the examination option in the specified content areas to fulfill the subject matter requirement for teachers	Before advancement to the supervised classroom teaching portion of the teacher preparation program

Institutional Pass-Rate Data for Academic Year 2000-2001

Federal guidelines require states to include a quartile ranking of institutions based on pass-rate data of assessments required for initial certification or licensure. The quartile ranking for each teacher preparation program sponsor in the state is based on: (1) the pass rate for each aggregate category of assessment, and (2) its summary pass rate. States are also required to report for each quartile the mean pass rate and the range. The summary pass rate calculations are based upon the number of candidates who took at least one assessment, and whether or not they passed all attempted assessments. The pass rates for the aggregate categories are based upon the number of candidates who attempted any assessment in the category and whether or not they passed all assessments they attempted in the category.

For purposes of the federal reporting, there is a distinction made between candidates who completed programs of teacher preparation and those recommended for credentials. Program completers are defined as candidates who completed all the academic requirements of a Commission-approved teacher preparation program. These requirements do not include any of the following State requirements:

- Possession of a baccalaureate degree or higher degree from a regionally-accredited institution of postsecondary education;
- Passage of the California Basic Educational Skills Test (CBEST);
- Completion of the subject matter requirement either by passing a subject matter examination or by completing a program of subject matter preparation;
- Completion of a course or passage of an examination in the principles and provisions of the United States Constitution;
- Passage of a criminal background screening as specified by the Commission;
- Passage of the Reading Instruction Competence Assessment (RICA) as a state requirement for the Multiple Subject Teaching Credential or the Education Specialist Credential (Level I).

The pass rate information in Appendix A represent aggregate data for candidates who have completed a teacher preparation program in California and have taken examinations to fulfill any of their credential requirements. California considers California's university and district intern programs to be equivalent to traditional programs associated with institutions of higher education, so these programs are included in the data. Pass-rate information for programs with less than ten program completers was not included. The quartile rankings are based on the total number of "program completers" who took and passed the required examinations during the 2000-2001 academic year.

The procedures for developing the institutional rankings are explained in the National Center for Education Statistics manual entitled *Reference and Reporting Guide for Preparing State and Institutional Reports on the Quality of Teacher Preparation*.⁹ The methodology prescribed in the guide requires pass-rate percentages to be reported to the nearest whole percent, with ties to be

⁹ A copy of this guide is available on the following website: www.title2.org/guide.htm.

included in the same quartile ranking. The resulting “adjusted quartiles” may not contain the same number of institutions within each quartile. Every institution in a given quartile has the same ranking.

Caution should be exercised when interpreting aggregate pass rate data and quartile rankings for the summary and individual assessment categories. Rankings on which quartile assignments are based may be somewhat unreliable given the narrow range of the pass rates for the summary and assessment categories. Also, not all “program completers” are required to take all the assessments reported and the assessments are taken in various stages of their preparation to become teachers.

Pass rates may be influenced by a number of variables including program size. One candidate's performance has a larger impact on smaller programs than on larger programs. For example, a program with 20 program completers would have a 100 percent overall pass rate and be in the first quartile if all of its program completers passed all the assessments they took for credentialing purposes (e.g., CBEST, subject matter tests, or RICA). But if one program completer did not pass all assessments, the institutional pass rate would be 95 percent and the program would be in the third quartile. If the same situation occurred in a program with 200 program completers, the overall pass rate would be 99.5 percent, and the program would remain in the first quartile.

Even though program sponsors ranked in the fourth quartile have lower pass rates than institutions in the upper quartiles, **institutions in the fourth quartile should not be considered low performing.** Overall program quality is determined by a variety of factors, including the extent to which programs meet standards of quality and effectiveness. The institutional reports included in Appendix B provide the necessary context for analyzing the merits and features of an individual teacher preparation program.

The overall summary pass rates percent for program sponsors for the 2000-2001 academic year are high, from 89 to 100 percent, and the differences in the mean pass rates between quartiles are small. These pass rates are reasonable as the assessments used in the reporting are requirements for the credentialing of teachers, and “program completers” by definition have completed the academic coursework portion of their teacher preparation programs.

Pass rates for the RICA range from 86 to 100 percent. Because the content of the RICA is taught during program coursework for Multiple Subject and Education Specialist (Level I) credentials, pass rates for this exam are high. As noted earlier, the content knowledge assessed by the CBEST and subject matter examinations is not acquired through the teacher preparation program. Due the nature of the CBEST and content area examinations, the expected pass rate was 100 percent. However, slight variances were found primarily due to misinterpretations of existing program standards, and/or reporting responsibilities.

Statewide Certification data for 2000-2001

23,926

Total number of persons who received initial certification or licensure in the state during the 2000-2001 academic year. This number includes individuals who completed programs of professional preparation through a postsecondary institution or school district:

Credential Type	Number
Multiple Subject	14,763
Single Subject	7,009
Education Specialist	2,154

4,724

Total number of persons above who completed their teacher preparation outside of California and received initial certification or licensure in California during the 2000-2001 academic year.

Credential Type	Number
Multiple Subject	2,227
Single Subject	2,006
Education Specialist	441

Assessing the Performance of Preparation Programs

The Commission maintains a comprehensive accreditation system that includes regular, rigorous reviews of the more than 80 colleges and universities and eight school districts that sponsor educator preparation programs. The Commission holds *all* teacher preparation programs to standards of quality and effectiveness.

This section of the report describes the Commission's accountability system and the criteria and procedures used for assessing the performance of teacher preparation programs within the State. By the end of 2003, the Commission anticipates that all accreditation of teacher preparation programs will conform with the provisions of SB 2042 and will have incorporated the standards of program quality and effectiveness adopted by the Commission in 2001 and 2002.

Criteria for Assessing the Performance of Teacher Preparation Programs

The State has implemented criteria for assessing teacher preparation program performance that includes a set of required preconditions, including regional accreditation. The Commission has adopted a unitary accreditation system for the purpose of holding institutions accountable for the quality of their educator preparation programs. The Commission requires all sponsors of teacher preparation programs to meet the same standards of quality and effectiveness and believes that its standards for accreditation provide the strongest possible assurance that professional credentials are awarded only to individuals who have earned them.

The Commission's accreditation system is designed for the purposes of:

- Assuring the public, the students, and the profession that California's future educators have access to excellence in foundational studies, specialized preparation, and professional practice, and that these components of educator preparation are oriented to the needs of future elementary and secondary students;
- Ensuring that future educators have acquired the abilities and perspectives essential for service in public schools;
- Assuring that the preparation of future educators is appropriate for the assignments made in our public schools; and
- Contributing to a broader effort to enhance the personal stature and professional standing of all members of the education profession.

California's accreditation system is governed by an *Accreditation Framework* adopted by the Commission. This framework advances the quality of education preparation through the creation of an integrated accreditation and certification system. Under the

Commission's accreditation system, institutions are required to meet eight Common Standards of program quality and effectiveness that apply to all credential programs, and must also meet specific program standards of quality and effectiveness that apply to various educator preparation programs that may be offered.¹⁰

The State is in the process of implementing a standards-based teaching performance assessment that will be embedded in teacher preparation programs leading to a preliminary teaching credential beginning in 2003-2004.

Alignment with National Standards

The Commission has established a partnership agreement with the National Council on the Accreditation of Teacher Education (NCATE) and regularly conducts merged accreditation visits for those institutions seeking national accreditation concurrently with state accreditation.

California's partnership with this national accrediting association provides for merged state and NCATE reviews of teacher education programs and institutions for the purpose of achieving savings in time, effort, and expense while promoting collaborative efforts to implement rigorous teacher preparation standards. One of the requirements of the agreement is for the State to demonstrate how its standards are aligned with the standards established by NCATE. For California institutions pursuing or seeking renewal of NCATE accreditation, the partnership has served to reduce the duplication of effort and paperwork that would otherwise occur under separate state and national reviews, by allowing institutions to submit a single set of documents for joint accreditation reviews.

Procedures for Evaluating Teacher Preparation Programs

Accreditation visits are scheduled every five to seven years and are conducted for the purpose of ensuring that institutions offering educator preparation programs are meeting established standards. In preparing for an accreditation visit, institutions receive technical assistance from Commission staff. Accreditation visits are conducted by review teams consisting of two to fifteen trained volunteers who are appointed from higher education and K-12 and generally reflect the range of programs offered at the institution.

¹⁰ Additional information about the Commission's standards for educator preparation programs may be found in the following documents:

Standards of Quality and Effectiveness for Multiple and Single Subject Credentials, California Commission on Teacher Credentialing. This document is available online at www.ctc.ca.gov/profserv/programstandards/new_msss/msss1998.html.

Accreditation Handbook, California Commission on Teacher Credentialing. This document is available online at: www.ctc.ca.gov/coa/coa.html.

Accreditation Framework, California Commission on Teacher Credentialing. This document is available online at www.ctc.ca.gov/coa/coa.html.

During the course of the accreditation visit, the review team gathers information about the quality of the education unit and credential programs at the institutions. Sources of information include written documents and interviews with institutional administrators, program faculty, enrolled candidates, field supervisors, recent graduates, employers of graduates, and program advisors. At the conclusion of the accreditation visit, the review team submits its recommendation to the Commission's Committee on Accreditation, which has the statutory authority to make the accreditation decision.

After reviewing the recommendation of an accreditation team and an appropriate institutional response, the Committee on Accreditation makes a decision about the accreditation of educator preparation programs at an institution. The Accreditation Framework, which guides the accreditation process, calls for three categories of accreditation decisions: Accreditation, Accreditation with Stipulations, and Denial of Accreditation. Within that rubric, the Committee on Accreditation makes one of five decisions pertaining to each institution:

Accreditation – The institution has demonstrated that, when judged as a whole, it meets or exceeds the Common and Program Standards. The institution is judged to be effective in preparing educators and demonstrates overall quality in its programs and general operations.

Accreditation with Technical Stipulations – The institution has been found to have some Common Standards or Program Standards not met or not fully met. The deficiencies are primarily technical in nature and generally relate to operational, administrative, or procedural concerns. The institution is judged to be effective overall in preparing educators and general operations.

Accreditation with Substantive Stipulations – The institution has been found to have significant deficiencies in Common Standards or Program Standards. Areas of concern are tied to matters of curriculum, field experience, or candidate competence. The institution demonstrates quality and effectiveness in some of its credential programs and general operations, but effectiveness is reduced by the identified areas of concern.

Accreditation with Probationary Stipulations – The institution has been found to have serious deficiencies in Common Standards or Program Standards. Significant areas of concern tied to matters of curriculum, field experience, or candidate competence in one or more programs have been identified. A probationary stipulation may require that severely deficient programs be discontinued. The institution may demonstrate quality and effectiveness in some of its credential programs and general operations, but the effectiveness is overshadowed by the identified areas of concern.

Denial of Accreditation – The institution has been found to routinely ignore or violate the Common Standards or Program Standards. The

institution does not have minimal quality and effectiveness in its credential programs and operations and the level of the competence of the individuals being recommended for credentials is in serious question. The denial of accreditation results in the removal of the authority for operating credential programs in California.

Institutions that are accredited with technical, substantive, or probationary stipulations are required to address the stipulations within one calendar year. Institutions are required to prepare a written report with appropriate documentation that the stipulations have been addressed. Institutions responding to stipulations are required to prepare for a re-visit that focuses on the areas of concern noted by the accreditation team during the original visit. The report of the re-visit team is to be received and acted upon by the Committee on Accreditation within one calendar year of the original visit. Throughout this process, institutions receive technical assistance from Commission staff in developing responses and preparing for re-visits.

An institution receiving Denial of Accreditation is required to take immediate steps to close all credential programs at the end of the semester or quarter in which the Committee on Accreditation decision took place. The institution is required to file a plan of discontinuation within 90 days of the Committee's decision, which outlines the institution's effort to place enrolled students in other programs or provide adequate assistance to permit students to complete their particular programs. The institution is enjoined from re-applying for accreditation for two years and is required to make a formal application to the Committee on Accreditation that includes the submission of a complete institutional self-study report. The self-study must clearly show how the institution has attended to all problems noted in the accreditation team report that recommended Denial of Accreditation.

Criteria Used to Classify Programs as Low Performing

The Committee on Accreditation monitors the quality of educator preparation programs through its accreditation system. Accreditation is granted to those institutions that meet the Commission's standards of quality and effectiveness. Institutions that do not meet Commission standards are precluded from offering educator preparation programs in California.

The State uses its accreditation procedures to identify and assist low-performing institutions and those at risk of becoming low performing programs of teacher preparation. For the purpose of meeting the requirements of Title II, section 208(a) of the Higher Education Act, California uses the following procedures and criteria concerning low performing institutions:

Low Performing Institutions - An institution that is determined by an accreditation review team and the Committee on Accreditation to have failed to meet the Commission's standards of quality and effectiveness would be designated as low-performing and would be denied

accreditation. An institution denied accreditation is prohibited from offering teacher preparation programs in California for a minimum of two years. At the end of such time, the institution can reapply and is required to submit a formal application and demonstrate that the problems identified in the original review institution have been addressed.

At Risk of Becoming Low Performing – An institution that is determined by an accreditation review team and the Committee on Accreditation to receive Accreditation with Probationary Stipulations is at risk of becoming a Low Performing institution. Such an institution is required to respond to the stipulations and provide evidence within one calendar year that the concerns noted by the review team have been addressed. Institutions receiving Accreditation with Probationary Stipulations are required to have a re-visit that focuses on the areas of concern noted by the accreditation team during the original visit.

Currently, California has no teacher preparation programs classified as low-performing or as being at risk of being so classified.

Waivers of State Certification Requirements

During the 2000-2001 academic year, there were almost 307,000 full-time teachers teaching in California's public schools.¹¹ From 1989 to 2001, public school enrollments grew over 25 percent, contributing to teacher shortages throughout the state. California's teacher shortage has created a need for many schools and school districts to meet staffing needs through the employment of individuals who do not hold a teaching credential. This section of the report describes the policies that apply to persons teaching without full certification.

Provisions for Persons Teaching Without Full Certification

Description of Waiver Categories

The Commission uses three types of documents that “waive” state credential requirements and authorize non-credentialed individuals to teach in public schools: Pre-Intern Certificates, Emergency Permits, and Credential Waivers. Schools and school districts utilize these documents when they are unable to fill vacancies with credentialed individuals.

Table 6-1 describes the different categories and terms California uses for temporary waivers of state certification requirements.¹² Each of the documents described below requires individuals to make progress toward completing the requirements for earning a teaching credential while providing schools and school districts with flexibility in handling short-term and unanticipated staffing needs when credentialed individuals are unavailable.

Determination of Need

Schools or school districts that determine a need to hire personnel on an Emergency Permit or Waiver must submit a request in writing before the Commission will consider granting it. The Commission requires local employing agencies to file a Declaration of Need for Fully Qualified Educators with the Commission if they anticipate a need to hire non-credentialed individuals to temporarily fill teaching positions. Once the Declaration is on file, the employer may apply for emergency permits for qualified individuals.

¹¹ *Fact Book 2002 – Handbook of Education Information*, California Department of Education, 2002.

¹² Additional information about Emergency Permits and waivers may be found in the following documents:

California Commission on Teacher Credentialing, *Credential Handbook*, available online at www.ctc.ca.gov/credentialinfo/credinfo.html

California Commission on Teacher Credentialing, *Waiver Handbook*, available online at www.ctc.ca.gov/credentialinfo/credinfo.html

Employers who find the need to request a waiver of credential requirements in order to hire an individual to fill a short-term staffing need must secure local board approval prior to applying for a waiver. **Candidates may not apply directly to the Commission for these documents.**

Table 6-1: Waivers of Credential Requirements

Category name:	Duration	Times renewable	Description, including requirements:
Pre-Intern Certificate	1 Year	1	<p>The Pre-Intern Certificate is available to participants in approved pre-intern programs conducted by school districts and county offices of education. Individuals in a Pre-Intern Program have not met subject-matter requirements for entry into a credential program.</p> <p><u>Requirements:</u></p> <p>Possession of a baccalaureate or higher degree from a regionally accredited college or university; and</p> <p>Passage of the CBEST</p> <p>Specific subject matter requirements apply, depending on certificate requested.</p>
Emergency Permit	1 Year	4	<p>Emergency permits are valid for one year and authorize the holder to provide the same service as a full teaching credential. Employers applying on behalf of individuals for any of these permits must verify that those individuals have met several requirements before they may receive the permit. Some of these requirements are general to all types of emergency permits, while others are specific to the permit requested. All emergency permits require the holder to complete specific requirements in order to be eligible for a reissuance of the emergency permit for another year.</p> <p><u>Requirements</u></p> <p>Possession of a baccalaureate or higher degree from a regionally accredited college or university; and</p> <p>Passage of the CBEST</p> <p>Specific subject matter requirements apply, depending on the permit requested</p>
Credential Waiver	Variable	1-3	<p>Credential waivers are utilized to fill certificated positions when more qualified individuals are not available. Employing agencies are permitted to request a credential waiver only when qualified individuals and interns are unavailable and the employer is unable to find an individual who qualifies for an emergency permit. Waivers are generally issued for one calendar year and the individual on the waiver must demonstrate progress toward a credential by completing an examination or coursework toward the credential before the employer can be granted a subsequent waiver.</p>

Information on Waivers of State Certification or Licensure Requirements

The table below presents the aggregate number of individuals holding Pre-Intern Certificates, Emergency Permits, or Credential Waivers for each school district and for each grade level and subject area for the 2000-2001 academic year. Individuals holding these documents serve in full-time, part-time, or long-term substitute teaching assignments. The table does not include the number of individuals who serve as day-to-day substitute teachers. Totals for individual subject areas may be higher than state totals due to individuals who are authorized to teach in more than one subject area. For example, the authorization for Bilingual Education requires certification in an additional subject area.

Table 6-2: Classroom Teachers with Waivers, by Category as of October 1, 2001

Reporting Categories	Total Number of Teachers¹³	Number of Teachers Not Fully Certified¹⁴	Number of Teachers Not Fully Certified but with Content Expertise^{14 15}
State Totals	306,853	36,874	34,666
High-Poverty Districts ¹⁶	93,672	16,686	16,400
All other Districts ¹⁷	213,181	20,188	18,266
Elementary Education	142,854	17,069	16,880
Arts -- All levels	3,698	257	248
Bilingual Education/ESL -- All levels	133,147	5,910	5,899

¹³ Data for "Total Number of Teachers" was obtained from the California Department of Education, California Basic Educational Data System (CBEDS) and is defined in Full Time Equivalent (FTE).

¹⁴ Due to the possibility of a persons holding more than one credentialing document, counts for the demographic breakouts (e.g. Elementary Education, Art, etc.) may add up to more than the total.

¹⁵ The numbers reported are consistent with the definition of content expertise used to determine highly qualified teachers in the No Child Left Behind Act approved for submittal to the U.S. Department of Education on May 30, 2002.

Alternative Paths to Certification

In recent years, California's teacher shortage challenge has prompted significant public debate about the manner in which California recruits, prepares, and retains talented individuals in the teaching profession. California's Governor and members of the Legislature have focused attention on identifying barriers that individuals face in becoming fully credentialed teachers and, as a result, have implemented a broad range of credential pathways. There is widespread recognition that the traditional route to a teaching credential, that is, a post-baccalaureate teacher preparation program, is often difficult, if not impossible for many prospective teachers. In particular, non-traditional students such as those with maturity, those making career changes, those with family obligations, and those who cannot afford to forfeit crucial income while they complete their credential requirements, may find the traditional route to be especially onerous. Without options, otherwise talented individuals, many of whom have specialized skills in selected subject areas, may be dissuaded from pursuing a career in teaching.

Within the California context, it is critical to distinguish between alternative certification and alternative paths or routes to certification. While California has *alternative paths* to the teaching credential, it does not have *alternative credentials*. As previously discussed, there are four types of teaching credentials in California: (1) Multiple Subject; (2) Single Subject; (3) Education Specialist; and (4) Designated Subjects Credential. Regardless of whether an individual has met all the necessary requirements for one of the four types of teaching credentials through the traditional means of completing a one-year postbaccalaureate program at an institution of higher education, a four to five year "blended" program that allows for the concurrent completion of subject matter and professional preparation, or a two-year district or university sponsored intern program, the credentials issued are identical. Further, all programs, including intern programs, are required to meet uniform standards of program quality and effectiveness established by the Commission. All programs include instruction in pedagogy and supervised teaching experiences. All programs are required to ensure that prospective teachers meet the teaching performance expectations prior to completing the program.

Perhaps the most common alternative route to teaching in California is enrollment in an internship program. Internship programs are designed to provide formal teacher preparation to qualifying individuals concurrent with their first year or two of paid teaching. Interns benefit from a close linkage between their teacher preparation and classroom experience as they are able to immediately put newly acquired skills and knowledge into practice in the classroom. California offers two types of internship programs, those offered by universities and those offered by school districts.

University internship programs are programs in which school districts, county office of education, and universities cooperate in providing one- or two-year internships leading to basic teaching credentials, specialist teaching credentials, and service credentials. School districts and county offices of education collaborate with local universities in the

planning and implementation of professional instruction, support, supervision, and assessment of interns.

District intern programs are two-year programs operated by local school districts or county offices of education in consultation with accredited colleges and universities. These interns acquire teaching credentials by completing on-the-job training coupled with intensive professional development. Districts are required to provide each intern with the support and assistance of a mentor teacher or other experienced educator, and to create a professional development plan for the interns in the program.

The Commission also administers the Troops to Teachers Program, the Paraprofessional Training Program which is designed to assist para-educators in becoming certificated classroom teachers, and the Pre-Intern Program. Together, this network of programs assists California by expanding the pool of prospective teachers, assists districts in addressing teacher shortage, and assists individuals by facilitating the process of becoming a fully credentialed teacher in California.

Recently enacted legislation, SB 57 (Scott, Chapter 269 Statutes of 2001), allows qualified people to become teachers by successfully completing tests and classroom observations in lieu of traditional teacher preparation course work and student teaching. Under SB 57, credential candidates still need to meet the existing requirements of a bachelor's degree, subject matter competence, basic skills and character fitness to qualify for a credential. Individuals then have the opportunity to "challenge" traditional teacher preparation course work by taking a national test.

Table 7-1: Alternative Certification Routes

State Policies Concerning Alternative Credential Routes	Applicability
The state has approved one or more alternative routes to certification.	Yes
The state has approved alternative routes to certification, but is not currently implementing them.	No
The state is considering or has proposed alternative routes to certification.	No

Improving Teacher Quality

This section of the report describes steps taken during the past several years to improve teacher quality. Recognizing that teacher quality and student achievement are inextricably linked, policy makers have initiated a number of programs and reforms aimed at significantly improving the preparation of K-12 teachers.

SB 2042, discussed at length earlier in this report, is arguably the most comprehensive teacher education reform effort aimed at improving the quality of teaching in California in decades. The Commission's extensive efforts over the past few years to develop, adopt, and implement new standards for teacher preparation, for elementary subject matter preparation for the multiple subject credential, for blended programs, and for induction programs, by the end of 2003 has been an enormous, yet critical undertaking for the future of education in California. It has involved a broad spectrum of educators from throughout the state, will impact all accredited teacher education programs in California, and has involved not only the adoption of new standards aligned with the state's academic content standards for its K-12 pupils, but has also required the development of a new and more effective assessment for teacher education candidates. Ensuring that prospective teachers are prepared to teach to California's rigorous academic content standards is a central, and perhaps the most critical, component to improving academic achievement of all students in California.

Other Recent Efforts

Recently enacted legislation, SB 57 (Scott, Chapter 269 Statutes of 2001), allows qualified people to become teachers by successfully completing tests and classroom observations in lieu of traditional teacher preparation course work and student teaching. Under SB 57, credential candidates still need to meet the existing requirements of a bachelor's degree, subject matter competence, basic skills and character fitness to qualify for a credential. Individuals then have the opportunity to "challenge" traditional teacher preparation course work by taking a national test, scored in a manner consistent with California requirements, that covers topics such as teaching methods, learning development, diagnosis and intervention, classroom management and reading instruction.

Individuals who pass the written test may enter a state-funded teacher internship program, and progress on a "fast-track" by being observed in a classroom setting. Observations by trained assessors will measure the candidate's skills in classroom management, instructional strategies, and assisting all students to learn. Individuals recommended by the internship supervisor based on the observations will be awarded a preliminary teaching credential. Candidates will also have the opportunity for a "fast track" to a professional clear credential by testing out of beginning teacher induction requirements.

In addition, another measure pending in the Legislature, AB 2575 (Leach), builds on the expedited route provided in SB 57 (described above) to offer individuals with graduate

degrees in the subject area they wish to teach a new option in meeting subject matter requirements. Currently candidates meet subject matter requirements by either passing a subject matter exam, or completing university course work that is aligned to the K-12 Content Standards. They may meet preparation requirements by completing a conventional university preparation program, participating in a state-funded internship program (while earning a full salary), or taking advantage of the SB 57 expedited route.

Rather than requiring all graduate degree holders to go back to the university or take a test, AB 2575 would allow candidates who receive a successful review of their undergraduate course work and graduate degree from a Commission-approved evaluation agency to have met subject matter requirements. The candidate's undergraduate course work and graduate degree must be from a regionally accredited institution of higher education in the subject for which the credential is sought or in a closely related subject, as determined by the Commission.

AB 2575 targets career changers who can bring expertise and experience to our students. This measure removes credentialing barriers, ensures quality, and continues to streamline the SB 57 expedited credential.

Overview of Institutional Reports

The institutional report cards contained in Appendix B of this report represent the efforts of the 85 postsecondary institutions and school districts that had approved Multiple Subject, Single Subject, and Education Specialist credential programs in 2000-2001 to comply with the institutional reporting requirements mandated by Title II of the Higher Education Act. The reports are consistent with the requirements of the U.S. Department of Education and the State.

The reports provide:

- Qualitative and contextual information regarding teacher preparation programs offered;
- Quantitative program information about candidates enrolled in teacher preparation programs, student-teacher supervisors, ratios between candidates and supervisors, the numbers of candidates who completed programs during the 2000-2001 reporting period; and
- Pass-rate data for all assessments used by the state for initial credentialing.

Institutions made their own decisions about the qualitative data included in the reports. Because of differences in budgeting, assignment practices, and institutional procedures, the quantitative data regarding candidate-supervisor ratios should be interpreted with caution. These data may not reflect the quality of interaction between candidates and the individuals who are assigned to supervise field experiences.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California Polytechnic State University - San Luis Obispo**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California Polytechnic State University, San Luis Obispo, part of the California State University System, is a comprehensive public institution located on the central coast of California. Nationally recognized for its polytechnic emphasis, it enrolls over 16,700 students in bachelor's and master's degree programs in the Colleges of Agriculture, Architecture and Environmental Design, Business, Engineering, Liberal Arts, and Science and Mathematics, as well as in post-baccalaureate credential and master's degree programs in the University Center for Teacher Education. The mission of the UCTE is to prepare teachers and educational professionals for California's diverse public school population through an all university approach to teacher preparation. Cal Poly's "learn by doing" philosophy is translated by UCTE into dynamic school-university partnerships that emphasize quality teaching, current educational practice, applied research, and a strong commitment to serve the community. Accredited by the California Commission on Teacher Credentialing, our programs provide teacher education and education specialist students with unique, direct involvement in the best practices of instruction, and in the latest applications of discoveries about learning, assessment, and schooling. Cal Poly is the only California university member of the prestigious National Network for Educational Renewal and as such is dedicated to the NNER's agenda for education in a democracy: access to knowledge for all students, stewardship of schools, nurturing pedagogy, and enculturation into the principles of a social and political democracy.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Cal Poly's teaching credential programs continue to attract top students from throughout the state and region. Academic requirements are rigorous. Applicants to the multiple subject (elementary), single subject (secondary), and education specialist (special education) programs are required to have a minimum G.P.A. of 2.75 at admission and to maintain a 3.0 G.P.A. All candidates are required to pass the California Basic Education Skills Test and a professional aptitude interview. Each is expected to have strong academic preparation in a subject matter area, either by completing a CCTC approved course sequence as part of an undergraduate degree or by passing the appropriate ETS Praxis, SSAT, or MSAT examinations. Multiple subject candidates must complete a three-course sequence in mathematics education as well as extensive methods instruction in reading, social sciences, math, and science. Candidates follow a closely supervised, field-based curriculum linking small university classes to hands-on experience in surrounding public schools. Guided by Cal Poly faculty and teacher mentors, candidates take on gradually increasing levels of classroom responsibility, culminating in two quarters of student teaching. A new computers-in-education focus acquaints candidates with cutting edge strategies for using computers to boost student achievement. Dedicated teacher education faculty are an interdisciplinary team at Cal Poly, some based in the University Center for Teacher Education itself and others in the Colleges of Agriculture, Science and Mathematics, and Liberal Arts. Cal Poly teacher education graduates are recruited throughout the state and region and are highly successful in their search for teaching positions.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

A number of innovative initiatives are moving forward at Cal Poly's University Center for Teacher Education. Multiple subject (elementary) candidates now have the option of either the traditional post-baccalaureate or a new blended program. This "four-plus-one" program will prepare undergraduate Liberal Studies majors for elementary school teaching in four years plus one quarter by blending together subject matter and professional education coursework with field experience and student teaching. The first cohort of blended program students advanced through assigned early field experiences, preparing them for methods instruction. Meanwhile, the recently revised single subject (secondary) curriculum focuses on core subject matter instruction strategies, linking subject matter coursework with education coursework, incorporating English Language Learner and technology preparation as a new in-depth features. In Special Education, the Education Specialist Level II advanced credential program in both mild-moderate and moderate-severe is continuing to attract new students, and the program faculty has proposed a new blended credential program for special educators to be structured like the elementary blended program. Finally, all of Cal Poly's teaching credential curricula are undergoing review to meet rigorous new California Commission on Teacher Credentialing standards to be implemented as early as summer of 2002, and the UCTE plans to move much of its admissions, reporting, and advising information into a user friendly, web-based processing system. These innovations will significantly enhance the excellence and effectiveness of Cal Poly's teacher preparation programs in the future.

Caution should be exercised when analyzing pass rates.
The effect of one candidate's performance can have a larger impact on smaller programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State Polytechnic University - Pomona**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Cal Poly Pomona's mission is to advance learning and knowledge by linking theory and practice in all disciplines, and to prepare students for lifelong learning, leadership, and careers in a changing multicultural world. The College of Education and Integrative Studies (CEIS) provides an interactive, inquiry-based environment incorporating a multi-disciplinary and interdisciplinary curriculum. Our graduates are prepared for leadership to address the complex issues that confront our communities in working toward building a creative, just and democratic society. The Department of Education prepares K-12 teachers seeking credentials in Multiple Subjects; Single Subjects; M.S. and S.S. with Cross-cultural, Language and Academic Development (CLAD) or Bilingual (Spanish) Cross-cultural Language and Academic Development (BCLAD) emphases; and Special Education (Mild/Moderate and Moderate/Severe). The programs seek to develop teacher candidates who: 1) exhibit respect for the worth and dignity of all students, regardless of academic achievement, intellectual potential, social maturity, sex, or ethnic, cultural or racial background; 2) are academically competent in their field of subject-matter expertise; 3) demonstrate pedagogically sound methods of teaching and apply them appropriately to meet individual and collective student needs; and 4) are committed to lifelong learning, are stimulated by open inquiry, and desire to share these qualities with others. The programs are committed to excellent professional preparation that provides students with the opportunity to acquire the skills, intellectual strategies, critical attitudes, and broad perspectives necessary to serve the needs of schools and communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The basic credential programs emphasize the integration of theory and practice in the study of education foundations, curriculum, methodology, and the teaching of reading. The emphasis on the teaching of reading has a dual focus: the pedagogy of learning to read and the pedagogy of application to content and context: reading to learn. The basic programs are organized around the four themes of Teacher as Reflector, Communicator and Organizer; Researcher and Practitioner; and Professional. The preparation of teachers at Cal Poly Pomona is a university-wide function. Increased field experiences and service learning components provide students with opportunities for professional observation, initial practice, and increased practical responsibilities in diverse educational and community settings. Credential programs at Cal Poly Pomona may be completed with supervised student teaching in assigned classrooms for regular student teachers. The student teaching requirement for regular student teachers includes two 10-week quarters of full-day teaching. This requirement also applies to students enrolled in the one-year internship program. Students enrolled in the two-year internship program may complete up to four 10-week quarters of supervised student teaching.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

- * Is adopting the new standards for Quality and Effectiveness for Elementary Subject Matter Program
- * Is an early adopter of standards of Quality and Effectiveness for Multiple and Single Subject Teacher Preparation Programs, receiving a grant from CCTC for early implementation
- * Both the Department of Liberal Studies and the Department of Ethnic and Women's Studies have designed Blended Programs for majors
- * Is one of 10 institutions participating in a federally-funded national project on teacher assessment for cultural competence
- * There has been a substantial increase in on-line courses offered in the teacher credential program;
- * Community and professional outreach programs continue through several grant projects including "Building Bonds", "Teacher Aides Path to Teaching [TAPT]", "TeaMatrix", "CAPI"

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Bakersfield

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Bakersfield is located in the petroleum and agriculture-rich county of Kern. The School of Education's mission is to strengthen the foundations of democracy and equal educational opportunity through quality programs that prepare committed education professionals in the context of a linguistically and culturally pluralistic society. The School of Education is accredited by the National Council for the Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CTC). Teacher credential programs for Multiple and Single Subjects and Mild/Moderate or Moderate/Severe Disabilities value confluent educational approaches which prepare caring and reflective professionals who will nurture and promote the emotional, social, and physical well being of all students in addition to their academic skills.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Teacher credential programs strive to be coherent and cohesive in order to provide students with meaningful coursework and relevant field experiences that build upon solid research and philosophical foundations. The collaborative nature of our programs promote positive features such as: Distinguished teachers-in- residence, ample field-experiences, joint membership on advisory boards, external grant partners, a professional development school, team- teaching, resource-leveraging, service learning opportunities, and an integrated "blended" undergraduate teacher education program. The SOE values a high level of faculty involvement in the teaching and learning process. Students have access to highly experienced credential analysts and evaluators as well as expert faculty and responsive clerical staff to guide them through the complexities of California credentialing policies and regulations.

Institution/Program: **California State University, Bakersfield**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

(1) The SOE has greatly improved the design, services, and articulation with LEA's to increase the quality and access to Intern programs, an alternative pathway for non-credentialed teachers formerly authorized by an emergency permit. (2) Teaching with technology is now a requirement for all credential candidates. The implementation of the SOE's technology plan is aligned with California's technology standards (CTAP) ensuring that the new generation of teachers will be able to incorporate the latest technologies in the teaching and learning processes. (3) Program offerings at CSUB's Off-campus Center in the Antelope Valley have expanded to include a Masters degree in Curriculum and Instruction with a new Educational Technology emphasis and an Education Administration credential and Masters.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Chico

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Founded as a normal school in 1887, CSU, Chico continues its mission of preparing outstanding teachers for the youth of California. Candidates are challenged to assume leadership roles in the community and uphold the principles of democracy. The School of Education is dedicated to preparing knowledgeable educators that continue to learn and grow, think critically, and serve their communities by example. Through teaching children with varied abilities and students from many socioeconomic, language, cultural, and philosophic backgrounds, professionals learn to support inclusion, tolerance, and success for all. Recognizing that this commitment requires well-educated and talented individuals, the faculty and administration dedicate themselves to attracting to Chico, selecting, preparing, and recommending the very best qualified applicants from throughout the State.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

A varied palette of options assures that all students find a professional preparation program to meet personal needs, experiences, and interests. Alternatives include full and part time scheduling, cohorts, internships, local and rural distant placements, CLAD and B/CLAD, concurrent special education, and post baccalaureate and blended undergraduate programs.

Course content is designed around the California Standards for the Teaching Profession and state and local student standards. All candidates must complete rigorous culminating assessments prior to being recommended for credentials.

Faculty in the School of Education represent the highest levels of professional expertise and pedagogical knowledge. Distinguished Teachers-in-Residence share best classroom practices and current experience. Advisory boards, committees, and shared teaching and learning opportunities involving university and public school colleagues enhance program quality.

Institution/Program: **California State University, Chico**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Because it will be among the first California State University campuses to be accredited by the California Commission on Teacher Credentialing under the new SB 2042 standards, CSU, Chico currently is critically examining and assessing its programs. Although it has utilized the Draft Standards to guide program design, the approved Standards of Quality and Effectiveness are providing the specificity and direction needed to reevaluate, reconfigure, and refine courses and experiences for candidates and faculty. The accreditation process is providing the impetus and opportunity to engage in discussions that will, undoubtedly, lead to changes and revisions that will enhance and strengthen the basic programs as well as those leading to advanced and service credentials and graduate degrees.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, Dominguez Hills**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the School of Education is to prepare teachers to work successfully with culturally and linguistically diverse learners in urban environments. California State University, Dominguez Hills is the most diverse university west of the Mississippi. Our teacher candidates and previous graduates reflect this diversity. CSUDH leads the state in credentialing African-American teachers. Currently one-half of the students in the CSUDH credential program seek the Bilingual Crosscultural and Academic Language Development Emphasis. Most teach in inner city, hard-to-staff schools.

Historically, the region served by CSU Dominguez Hills has had great difficulty recruiting and retaining teachers. In our service area, socioeconomic levels are low, the percentage of limited-English proficient (LEP) populations is high, and the ethnic diversity is the most extensive in Los Angeles County. Our teacher graduates teach primarily in Chapter I, Urban Impact, and multilingual schools.

In California, teacher candidates must pass multiple measures of assessment to be recommended for credentialing. The Reading Instruction Competency Assessment (RICA), whose results were used to rank Californian teacher preparation programs, is only one assessment among many and is required only of multiple subject and education specialist certifiers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

For student teachers, the School of Education developed the Blended Program, which received the American Association of Colleges for Teacher Education (AACTE) Best Practice Award in 1999 for collaboration between teacher education and liberal arts faculty. For Alternative Program Candidates, University Interns, the School of Education, in collaboration with Los Angeles Unified School District and the Los Angeles Educational Partnership, developed a Professional Development School which received the 2000 AACTE Best Practice Award for Support of Diversity.

The School of Education is accredited by both NCATE (National Council For Accreditation of Teacher Education) and CCTC (California Commission On Teacher Credentialing). As both accreditors have moved toward solid measures of accountability in the last two years, the School of Education has looked carefully at its teacher preparation processes, and, as a result of these formal evaluative processes, has accomplished the following: 1) the School has developed a wide array of locations where coursework is delivered using the Professional Development School (PDS) model to assure systemic educational reform of teacher preparation programs and faculty as well as teaching staffs of local schools; 2) has designed expanded evaluation processes to begin to look at achievement results of students in schools of those prepared in SOE programs; 3) has prepared all faculty to offer technological infusion in all teacher preparation coursework; 4) has developed a state-of-the-art preparation program for high school mathematics teachers; and, 5) has developed a blended (teacher preparation/liberal studies) program located at professional development school settings.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In 2002-2003, the Teacher Education Department at California State University, Dominguez Hills premieres its newly designed professional teacher preparation program in accordance with California's new Standards of Quality and Effectiveness for Professional Teacher Preparation Programs. The new program represents two years of focused intensive work by members of the "Teacher Performance Assessment Task Force" and the "Program Redesign Task Force."

The program offers Multiple and Single Subject credentials with a University Intern and Student Teaching option. Coursework and field experiences effectively prepare candidates to teach K-12 students and understand the contemporary conditions of schooling. Because the majority of our candidates teach in urban schools with multicultural and multilingual students, the program's coursework and field experiences are designed to prepare candidates to effectively meet the needs of these students.

A system of formative and summative assessment is embedded throughout the program to provide candidates with timely, accurate, and complete feedback regarding their performance progress. Candidates develop pedagogical competence as defined by the Teaching Performance Expectations (TPEs). Within the developmental sequence of the program, courses provide the pedagogical knowledge for developing competence in the TPEs. Signature course assignments describe the TPE performance tasks that are applied and practiced during the field experience. Supervisors conduct observations and conferences that focus on each of the tasks and offer specific suggestions for improved practice. Successful completion of each phase of the program is dependent upon meeting developmental criteria.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, Fresno**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School of Education and Human Development at California State University, Fresno is the primary unit responsible for all teacher preparation programs. Vision and Mission of the Unit are as follows:

Vision and Mission

The School of Education and Human Development is committed to developing the knowledge, skills, and values for educational leadership in a changing, diverse, and technologically complex society.

The mission of the School of Education and Human Development is to educate students to become teachers, administrators, counselors, and education specialists in order to provide for the educational needs of children and adults, with special attention to diversity and equity.

Student Populations

The University has primary responsibility for serving: Fresno, Kings, Tulare, and Madera Counties. Within this region is a K-12 population of 315,926 that includes: American Indian - 1%, Asian -8%, Pacific Islander -0.2%, Filipino - 1%, Hispanic - 54%, African-American - 5%, and White Not Hispanic - 31%.

Teaching Population

Credentialed teachers for the four county region totaled 16,199. Teacher ethnicity is as follows: American Indian - 1%, Asian - 3%, Pacific Islander - 0.8%, Filipino - 1%, Hispanic - 16%, African-American - 2%, and White Not-Hispanic - 77%.

Program Enrollment

Student enrolled in Teacher Education programs totaled 4,323. Student ethnicity by percentages includes: American Indian - 1%, Asian - 7%, Hispanic -29.3%, African-American - 2%, and White Not Hispanic - 43.4%, and other (unknown) - 18%.

In comparing the figures above, two prominent factors emerge: 1)high diversity in both K-12 and University students, and 2) sharp contrast in K-12 students and K-12 teacher ethnicity.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The School of Education and Human Development offers a variety of exemplary programs that lead to a teaching credential. These programs contain sequenced experiences that enable enrollees to both acquire knowledge and develop skills through lecture, laboratory, and field-based classes. Examples include: the Liberal Studies Blended Program that leads to a BA degree and a Multiple Subject Credential in eight semesters; Internship Programs for Multiple Subject, Single Subject, and Special Education teachers; and CalStateTEACH, which is targeted for teachers holding Emergency Credentials.

Alternative program delivery includes field-based cohorts in: Reading, Educational Administration, CLAD Certificate; Option IV for Reentry Students; Block A for Middle School Teachers; and an Education Early Childhood Emphasis. Classes are also available via interactive audio/video at remote sites throughout the region. The Annual Character and Civic Education Conference is one example of a special conference that serves to enrich a student's professional preparation.

Faculty promote professional development for the region's teachers through coordination of state curriculum projects such as: the San Joaquin Mathematics Project; the San Joaquin Valley Writing Project; the California History - Social Science Project, and the Central Valley Science Project.

The PreTeacher Assessment Center is focused on students' teaching strengths as well as on areas needing improvement. The Renaissance Partnership for Improving Teacher Quality Program is a collaborative with a local school district that is directed toward assessing teacher performance by measuring learning outcomes through teacher work sampling.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, Fullerton**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Our Teacher Preparation Programs are: based on the University Mission and Goals; (b) shaped by the needs, aspirations, and skills of our students, faculty, and community; embedded in appropriate standards of the professions; informed by the knowledge base of each profession; and accredited by and responsive to the standards of the CCTC, NCATE, and WASC.

Learning is preeminent at California State University, Fullerton. We aspire to combine the best qualities of teaching and research universities where actively engaged students, faculty, and staff work in close collaboration to expand knowledge. The inherent purpose of the University is to extend, refine, and diffuse knowledge.

Our students are future educators, and the quality of the educator is the most critical variable in education. Educators possess a wide constellation of knowledge and skills, including knowledge of the subject taught, understanding of development and learning, pedagogical skills in simplifying learning, and awareness of the social and political contexts of schools. Educators also possess a commitment to lifelong learning, respect for all individuals enriched by an understanding of cultural and diversity, and professional commitment to working collaboratively with other professionals.

Faculty members are committed to excellence in teaching and display the highest standards of ethical practice. Our faculty model interactive, dynamic teaching and inquiry that promotes reflective practice based on sound research and theory coupled with real world problems. Learning is expanded beyond the classroom to include partnerships with the community. These community partnerships provide a bridge between theory and practice.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The Multiple Subject Credential Program is distinguished by its cohort approach, whereby candidates complete most field and course experiences within stable cohorts led by small faculty teams. It also integrates field and course experiences, allowing candidates to connect simultaneous experiences from university and elementary classrooms. The Education Specialist Special education Credential Programs in Mild/Moderate, Moderate/Severe and Early Childhood Special Education was commended during their recent accreditation visit for excellent Professional Development Training Sites for their teachers, seamless delivery of a scaffolding curriculum including issues related to culture diversity and human differences, the ability to reach out to the experts in the field and bring them to CSU Fullerton for consultation and for the maintenance of high standards during the extreme growth over the past three years. The Single Subject Credential Program is distinguished by an interdisciplinary approach that connects the three main elements of teacher training (subject matter preparation, pedagogical training, and field experience) through collaboration between the Department of Secondary Education, university academic departments and programs, and local school districts; the Professional Development District model; our Future Teachers recruitment program at 18 local high schools; and our BTSA collaboration with area school districts.

The Reading Department offers a Master of Science in Education, Reading Degree, the new California Reading Certificate, and a Reading/Language Arts Specialist Credential.

Institution/Program: California State University, Fullerton

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

New initiatives in the Multiple Subject Credential Program include the systematic development of activities for part-time and full-time faculty in the areas of reading methods and diversity. Additionally, the three-semester program was restructured to better integrate course experiences.

The key mission of the Education Specialist Special Education Credential Program is to develop quality teachers who value life-long learning. To validate this statement, the department is conducting both telephone and paper-pencil surveys of graduates to determine the types of activities the alumni participate in after they graduate from our master degree programs. We have evidence of continued journal reading, active involvement in professional organizations, career ladder advances, participation in staff development conferences and in some cases, membership in teacher support groups that began in graduate school. New initiatives in the Single Subject Credential Program include the establishment of the Intern Credential Program, serving ten subject matter areas in over fifty districts in Southern California. Credential programs were also restructured to better integrate the teaching of reading strategies across all coursework. The Reading Department offers coursework leading to the new California Reading Certificate. An existing course in the Reading/Language Arts Specialist Credential has become the culminating course in the Reading Certificate. The course has been moved off campus allowing candidates to work with, and complete a case study on, students in low-performing schools.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Hayward

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School's mission is "to prepare collaborative leaders, committed to social justice and democracy, who will influence a highly technological and diverse world." The Department of Teacher Education's mission is "to prepare teachers who are dedicated to the academic achievement of all students, and who demonstrate a commitment to life-long, professional growth and school leadership." The teacher preparation programs at CSU Hayward seek to produce graduates who value collaboration, recognize the importance of assuming leadership roles, and are committed to social justice and democracy. These programs have developed a well-deserved reputation for innovation. CSU Hayward was one of the first IHEs in California to offer entire programs at remote sites and has developed one of the most complete University-District partnerships in the United States (with the New Haven Unified School District). Teacher preparation programs serve one of the most diverse regions in the United States and CSU Hayward has established partnership programs with the two school districts in our service area with the highest number of non-credentialed teachers, Oakland Unified and West Contra Costa Unified.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The Multiple Subject, Single Subject and Education Specialist programs are accredited by both the NCATE and the CCTC. Program qualities that contribute to the effectiveness of the Multiple Subject and Single Subject Teaching Credential programs include: (1) a cohort system, with on-going mentoring by a faculty team leader, (2) a full-year of required field experience, as either a student teacher or intern, corresponding to the K-12 calendar, (3) partnership programs with three inner-city school districts, and (4) entire programs offered at four remote sites. Qualities that contribute to the effectiveness of the Education Specialist Credential program include: (1) a high-level of practitioner input in the design, implementation, and evaluation of the program, (2) on-site competency-based support with portfolio assessment, and (3) participation in federal grants for student recruitment, support, and mentoring.

Institution/Program: California State University, Hayward

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Several new initiatives are underway. Planning has begun to add internships to the Education Specialist Credential. The Single Subject Credential program was selected for a CCTC early-adoption grant and work began on re-designing that program to adhere to the SB 2042 standards. Veteran faculty in the Multiple Subject Credential program significantly improved the mentoring they provide to the large number of part-time lecturers teaching in that program. Faculty in all programs began work on rigorous program and candidate assessment plans required by revised NCATE standards.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Long Beach
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

It takes our entire University to prepare a teacher. CSULB has the preparation of teachers and other educators as its highest priority. Initial teacher preparation credential programs include the Multiple Subject Credential, with six credential pathways; the University-wide Single Subject Credential; and the Education Specialist Credential (Levels I & II, Mild/Moderate & Moderate/Severe). Our goal is to ensure that our graduates have deep content knowledge, and have opportunities for early and ongoing field experience where they can see and implement best practices they have learned in their coursework. They will value diversity and demonstrate ability to deliver instruction and assess student progress so that all their students achieve at high levels. Advanced degree and credential programs in the College of Education provide professional development opportunities.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The Long Beach Education Partnership between CSULB, Long Beach Unified School District, and Long Beach City College continues to inform and support development and assessment of our effective teacher preparation programs. Five additional community colleges have been added to our partnership and are valued contributors to the great progress that has been made in the undergraduate preparation of elementary teachers through the development of standards-based courses in language/literacy studies, history/social sciences, math, science, and the arts. Early field experiences are embedded in the undergraduate program taking college freshmen into urban school classrooms. An additional indicator of the excellence and effectiveness of our programs is the granting of continuing accreditation to CSULB by the State of California and initial accreditation by NCATE in 2001.

Institution/Program: California State University, Long Beach
--

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Integrated Teacher Education Program (ITEP) was fully implemented in Fall 2001 when 300 freshmen were admitted. It is the primary undergraduate program for students planning to become elementary teachers and represents a significant step for CSULB toward strengthening undergraduate preparation of teachers. It blends a baccalaureate degree in the content areas of elementary curriculum and the professional preparation of the Multiple Subject Credential. ITEP is based on a common belief that content knowledge is deepened when linked to practice, and that future teachers are best served by explicit linkages between their developing understanding of content, teaching methods and educational foundations. The Education Specialist Credential (Level I, Mild/Moderate & Moderate/Severe) will be added as an option in Fall 2002, providing interested candidates with dual certification.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: California State University, Los Angeles

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission was revised: "Through the unique opportunities provided by its charter status, the Charter College enables educators to meet high standards and ensure the maximum learning and achievement potential of culturally and linguistically diverse urban learners." A new goal was created, emphasizing scholarship as a means of creating and disseminating new knowledge; two goals were revised to refocus efforts on both teaching and learning. The College also reaffirmed nine core values to guide the goals of both basic (multiple subject, single subject, and education specialist) and advanced credentials. Each division and program revised its goals to be consistent with the College and University strategic initiatives. This year 1,262 credentials were recommended, and nearly 400 students received Master's degrees. The College issued 1,716 emergency permits, a 19% decline over the previous year.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Assessment activities, strong partnerships with K-12 school and community college representatives, and regular orientations for new and continuing part-time faculty contributed to program excellence. Field tests validated the rubrics developed last year to assess the quality of field experiences for both regular and education specialist credential students. Workshops were sponsored for community partners to analyze the new CTC and NCATE standards, especially those for field experiences. A final draft of the College's assessment system document was completed for presentation to the College faculty, staff, students, and community advisory committee. Multiple surveys were administered to assess programs: current student surveys, follow-up surveys of employers and graduates, and the CSU System-wide Evaluation of Teacher Preparation Programs. A new handbook was presented and discussed with part-time staff to provide a thorough orientation to the College.

Institution/Program: California State University, Los Angeles

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The College continued to focus on teacher preparation programs that would shorten the time to completion of the credential and to assure that all students and staff demonstrated technology competencies. The Better Educated Science Teachers (BEST) program received final approval by the CTC as a blended undergraduate program, permitting students to achieve simultaneously both a single subject credential and the B.S. degree in Natural Sciences. Enrollment increased in the paraeducator career ladder program. In order to assure that all students meet high standards of technology competence, the College approved additional requirements for formal admission to all credential, certificate, or Master's Degree programs, which included owning or having ample access to a computer and general knowledge of computer operation, software, and use of the internet. These requirements aligned with the requirements of the new CTC technology standard.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Monterey Bay
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

CSUMB offers CLAD/BCLAD internship and conventional programs leading to the Multiple Subject Credential. Both programs are designed for individuals who are interested in teaching in linguistically and culturally diverse elementary schools with large populations of English Language Learners. Our programs welcome teacher candidates who have the language and cultural experience or background to meet the needs of California's increasingly diverse student population.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

CSUMB teacher credential programs are outcomes-based and field-intensive. Teacher candidates in the conventional program are placed in public schools with substantial populations of English Language Learners from the first week of program enrollment through the conclusion of the final week of solo teaching experiences near the end of the curriculum. All courses relate theory to actual practice in the classroom through assignments and activities that are based on placement setting experiences. At the conclusion of both programs, teacher candidates present a portfolio of professional products and reflections that demonstrates the attainment of teacher education learning outcomes that undergird the curriculum of the programs.

Institution/Program: **California State University, Monterey Bay**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Curriculum revisions were made in response to evaluation feedback from graduating students and alumni. Out-of-class academic support was enhanced and provided to teacher candidates and other teachers in the community needing assistance with required examinations.

¹ Pass rates are not calculated for programs with less than ten candidates.
Caution should be exercised when analyzing pass rates.
The effect of one candidate's performance can have a larger impact on smaller programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: California State University, Northridge
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Northridge, located in Los Angeles, is one of the largest institutions of higher learning in California. Our student body mirrors the ethnic diversity found in Los Angeles. A majority of our students transfer from nearby community colleges and/or have graduated from schools in Los Angeles Unified School District and many are the first in their families to earn a college degree. The University embraces teacher preparation as one of its primary responsibilities and supports the College of Education in its rich tradition of preparing teachers and other school personnel. A majority of our students are returning or part-time students with obligations accompanying full-time employment and families.

The College prepares educators to serve the complex educational needs of the region and it enjoys the distinction of being one of the top preparers of teachers in California. Our graduates are well-educated, lifelong learners who are prepared to practice in an ever-changing, multicultural, diverse society. The College maintains partnerships with schools and agencies, and faculty is committed to excellence in teaching, scholarship and service.

Our state examination pass rate is based on the performance of elementary and special education teacher candidates only on an examination that only assesses competence to teach reading.

The University meets high standards established by its accrediting agencies: California Commission on Teacher Credentialing, Western Association of Schools and Colleges, National Council for Accreditation of Teacher Education, and other discipline-based accreditation boards.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Multiple pathways to the credential, extensive education program options and curricular innovation are trademarks of California State University, Northridge. All programs reflect a strong knowledge of K-12 schools and the individual needs of credential candidates. For example, the Accelerated Collaborative Teacher Education Program is a creative, post baccalaureate, preservice program developed in partnership with Los Angeles Unified School District for elementary, secondary, and special education candidates. Intern programs, developed collaboratively with several districts, address the needs of candidates who are currently responsible for their own classrooms. An undergraduate program allows students to earn both a B.A. degree and an elementary, secondary, or special education teaching credential in four years. Some programs are cohorted and team taught, introducing candidates to a support network of professionals comprising a learning community of education faculty, arts and science faculty, and school personnel. The faculty involved in these credential programs are committed to promoting best practice in the schools based on current research. They nurture candidate success and are supported in their mission by a trained group of exemplary school personnel who assist as student mentors and instructors. Faculty and supervisors remain updated by attending professional meetings focusing on concepts and strategies for student-centered learning, technology-based instruction, and effective pedagogy. Our diverse student body is assisted by a College Equity Office, state-of-the-art computer labs, test preparation sessions, and on-going advising, coaching and mentoring by University faculty, staff and administrators.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In Spring 2002, the College of Education formed a consortium of offices, the Student Information Offices. Having the Credential Preparation Office, the Educational Equity Office, and the Liberal Studies Program Office located in the same building provides one-stop advisement and information for students interested in credential programs. A Pre-Admission Advisor offers information to prospective students about careers in teaching and available programs. A receptionist resource room includes informational materials.

CSUN is an "Early Adopter" of the SB 2042 Teacher Preparation and Subject Matter Standards. Faculty have now modified our programs to provide extensive opportunities for candidates to (a) learn to teach the content of the state-adopted K-12 academic content standards; to use state-adopted instructional materials; and to assess student progress and to apply these understandings in teaching all K-12 students; (b) know and understand the foundations of education and the functions of schools in society; and (c) develop pedagogical competence per the Teaching Performance Expectations (TPEs). A Teaching Performance Assessment (TPA) that assesses the TPEs will be embedded in the programs. Faculty and students are now pilot testing the TPA.

A new undergraduate Four-Year Integrated (FYI) Teacher Credential Program was implemented in Fall 2001. Freshman students interested in teaching at the secondary level are able to complete a baccalaureate degree and a Single Subject Credential in English or Mathematics.

CSUN collaborated with the Los Angeles Unified School District and the CHIME Institute to develop the CHIME Charter Elementary School, a national model of inclusive education and teacher preparation laboratory.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:
<http://www.csun.edu>

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, Sacramento**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

As we strive to meet the educational challenges of the new century in California, we work with the Sacramento community, our public school colleagues, and our candidates to develop stimulating and useful learning environments. We actively embrace the diversity of the community we serve: building on its strengths while addressing its needs. We use interdisciplinary traditions to seek effective solutions in an environment of constant educational renewal.

California's Sacramento Valley is rich with linguistic and cultural diversity. A Russian immigrant community lives adjacent to historically African American and Latino neighborhoods. New Southeast Asian immigrants interface with generations-old Chinese and Japanese communities. Children from first generation Mexican and Sikh farm worker families attend school alongside the monolingual English-speaking children of third generation European American families. Only one in four of these children's teachers comes from these groups. We in teacher preparation at CSUS face the following challenges: increasing the numbers of teachers well prepared to address the needs of low income, culturally and linguistically diverse students; and, ensuring that fieldwork and mentoring give teachers confidence and competence in "best practices" pedagogy for these students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

During the 2000-2001 year CSUS offered a wide range of options, beginning both fall and spring, within elementary, secondary, and special education credential programs. One defining characteristic of the majority of all programs is the substantial public school experience in various settings every semester combined with coursework. Another defining characteristic is the clustering of students into 25-person cohorts (often housed in district schools) to keep learning groups constant and small throughout a candidate's total program. This location of cohorts out in public school sites, in addition to eleven Professional Development Schools, promotes increased interaction between the host cooperating teachers and the university faculty, who meet frequently to plan for the growth of the student teacher. At Professional Development Schools, candidates, site teachers and university faculty collaborate on inquiry-based projects around the area of effective schooling for diverse students.

Offerings in the elementary program include two- and three-semester daytime programs (plus a Middle Level and a Multicultural/Multilingual program), a four-semester predominantly evening program, and an internship in a neighboring urban school districts. Likewise, the secondary program offers two- and three-semester programs (one with evening coursework) and internships with the same district. Our special education programs serve both local candidates here on campus (daytime and evening classes) and also candidates in high-need, outlying locations where internships have been developed and evening/weekend classes delivered by our faculty as far away as one hundred miles.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

During the 2001-2002 school year, the College implemented the second-year activities of two grants that will greatly impact the effectiveness of our teacher preparation programs. The first is a 5-year Federal Title II Teacher Quality Enhancement grant which has led to the establishment of "The Equity Network." The Equity Network has two interconnected goals: 1) to prepare graduates with the knowledge, skills, and desire to be effective teachers in low-income schools with culturally and linguistically diverse students; and 2) to improve pupil achievement in partner schools that serve as placement sites.

The second major grant, known as PT 3 (Preparing Tomorrow's Teachers to Use Technology), pairs the College of Education with Apple Computers, the California Technology Assistance Project, and several local education agencies. Over its three year cycle, this grant will enable us to: 1) transform the preservice program by integrating technology into coursework and fieldwork; 2) institutionalize a professional development model that will infuse technology into curricula; 3) develop preservice teachers who will meet state and national technology standards; 4) focus on issues of equity and access related to technology; and 5) disseminate project outcomes to K-12 schools and teacher preparation programs.

In collaboration with other CSUS colleges, the College of Education has instituted 3 new blended programs: one at the Multiple Subject level, and two at the Single Subject level, Mathematics and P.E. This collaboration will allow us to efficiently prepare candidates with both in-depth subject matter knowledge and pedagogical skills.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, San Bernardino**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

CSUSB's strategic plan emphasizes learning communities, community partnerships, a welcoming and safe intellectual, social and physical environment and a recognition and celebration of diversity. CSUSB is an Hispanic Serving Institution. It strives to have its university community represent the demographics of the region. CSUSB's service region encompasses 27,000 square miles. Recent statistics indicate (from self-reported ethnic identification from 91.6% of students in the academic year 1999-2000) that the campus community is made up of 27.7% Hispanic, 10.2% African American, 47.7% Caucasian, 7.3% Asian, 2.4% Filipino, 1.3% Native American and 3.2% other ethnicity. These data are quite similar to the graduation rates of the region.

Teacher education credential candidates are, for the most part, fifth year employed interns. Most candidates are first generation college students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Through a consortium, the COE works to provide a seamless transition for employed students through pre-intern, intern and induction programs. Collaboration with districts and county offices has resulted in enhanced support for these part-time students, thereby addressing a major component of CSUSB's mission. Faculty participate in District Liaison meetings, which serve Pre-Interns, Interns and new teachers. At every level, students are assessed in relation to State Standards. Most faculty have substantial public school experience and work closely with schools. Particular attention is paid to the cultural diversity of the region and to the needs of English Language Learners. Adjunct faculty are either currently active in public schools or recently retired. Many of these professors have worked within the COE for ten or more years.

Institution/Program: **California State University, San Bernardino**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

New grants in excess of \$3.2 million support efforts to provide faculty with training in technology-assisted instruction, to electronically link Bilingual M.A. candidates with school interns, and to establish a new career ladder program. A web-based Education Specialist Tier II program was developed and bicultural/bilingual student teaching opportunities were formalized with Mexico. Preparation for initial NCATE accreditation has resulted in new curriculum initiatives. The first set of annual program reports was prepared with action plans to improve outcome assessments and to use community/student input for program improvement. A blended Single Subject program is in the discussion stage.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, San Marcos**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University San Marcos (CSUSM) accepted its first students in 1990, and from its inception has demonstrated a strong commitment to teacher education. The university devotes a higher proportion of its base budget to teacher education than any other campus in the California State University system. The College of Education was established in 1990 with teacher education as its primary focus. The mission of the College of Education is to collaboratively transform public education by preparing thoughtful educators and advancing professional practice. We offer programs to prepare teachers for elementary schools, middle schools, high schools, and special education. We offer only professional education programs through the college, using a variety of delivery modes that allow candidates to engage in full-time study, part-time study, and teaching internships. Programs are geared to meet the needs of area school districts and to maximize accessibility for candidates from varying life circumstances. Our goal is to ensure a fully qualified teacher in every classroom in our service region, and we are adaptable to emerging needs that result from policy decisions such as the California Class Size Reduction Initiative and the California Reading Initiative. In addition to preparing new teachers, we collaborate with area school districts in many areas related to continuous school improvement, including beginning teacher support and induction, experienced teacher professional development, and preparation of school administrators. The resources of the College of Education are wholly devoted to professional education and school improvement through collaboration.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Some exemplary aspects of the college are:

- 1) Our programs are offered on a cohort model in which candidates complete their program requirements in an intact group. A problem-solving approach to instruction forms strong adult learning communities that model how effective schools operate.
- 2) All teacher education programs at CSUSM are standards-based. They meet national and state accreditation standards, and California student learning standards form the basis of instructional methods courses.
- 3) We fully embed Cross-Cultural Language and Academic Development (CLAD) competencies in our programs, ensuring that all graduates are prepared to meet the educational needs of students who are English language learners.
- 4) A hallmark of the college is our Distinguished Teacher in Residence (DTiR) program, designed to engage outstanding teachers in the preparation of new teachers and support college faculty to work in area schools. Eighteen school districts partner with the college to support the program. Teachers are selected for two-year terms as full-time faculty in the College of Education. Six Distinguished Teachers in Residence serve at any given time. Also, the joint funding arrangement supports "reassigning" the equivalent of three full-time faculty positions annually for college faculty to work in area schools.
- 5) The North County Professional Development Federation provides an on-going infrastructure for K-16 collaboration on professional development. NCPDF is funded through dues paid by the College of Education, the San Diego County Office of Education, and 23 member school districts. NCPDF provides collaborative professional development programs for area educators, with full involvement of college faculty.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Examples of program enhancements and initiatives during 2001-02 academic year include:

- 1) The college is an "early adopter" of new CCTC performance-based standards for multiple subject and single subject credential programs. During this academic year we have revised all of our basic credential programs to meet CCTC standards and to incorporate new teaching performance expectations and teaching performance assessments. In our new programs, three concepts will be infused throughout courses and field experiences: a) teaching students who are English-language-learners; b) use of technology in teaching; and c) teaching students with special learning needs in inclusive educational settings. New programs will begin Fall Semester, 2002.
- 2) In response to an agreement between University of California and California State University, Cal State San Marcos College of Education has embarked on planning for a joint Ed.D. program with San Diego State University and University of California, San Diego. The focus of the program will be educational leadership, and the target audience will be instructional leaders in public schools in our collective service region.
- 3) The College of Education, as a part of the Cal State San Marcos academic blueprint, has targeted two areas for development and/or expansion. First, we will plan and institute a master's specialization in speech and language therapy, designed to prepare speech clinicians for public school service. This is a major area of need for the school districts we serve. Second, we will expand our offerings in middle level teacher education, in response to the fact the 90% of current middle level teachers have had no preparation specific to education of young adolescents.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State University, Stanislaus**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Stanislaus seeks to create a learning environment that enriches a diverse community and develops a passion for lifelong learning. Since its founding in 1960, the university has reflected the fluid and dynamic environment in which it is located, specifically, the state's Northern Central Valley. The College of Education's mission is to prepare teachers and service personnel who are advocates for children and their communities. We do this by offering teacher preparation programs on the main campus in Turlock and in centers in Stockton and Merced. Students represent a 10,000 square mile area with a population that is non-traditional. Most students are the first family members to attend college; many are single parents, and the majority work for a living while earning degrees and credentials. Fifteen percent of multiple and single subject credential program students are English language learners. Program delivery is varied so that candidates with varying responsibilities and life circumstances can attend classes on a full or part-time basis during the day or evening.

Diversity is an integral component of all programs preparing elementary, middle, secondary, and special education teachers. Candidates, who are recommended for licensure, are expected to model cultural responsibility and responsiveness. We collaborate with over fifty school districts in Alternative Certification (internship) programs designed to increase the number of fully credentialed teachers in the local area. Our goal is to work, as partners, in addressing teacher shortages and other policy issues affecting educational quality.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Enrollments in teacher preparation rose dramatically from 520 in 1999-2000 to 569 full time equivalent students (FTES) in 2000-2001. While programs grew, continuous attention was paid to program quality and innovation. Some highlights are:

- Our Multiple Subject Credential Program (MSCP) was offered concurrently at three locations. The modular program design, implemented at the Stockton and Merced centers, attracted a record number of students who could not attend classes at the main campus.
- All teacher education programs continue to be standards-based and are revised on an ongoing basis to meet new requirements. The Reading/Language Arts certificate and credential courses were aligned with California K-12 subject standards.
- Educational Technology competencies for credential candidates were incorporated into two new courses.
- Cross-cultural academic preparation continues to be imbedded in all teacher preparation courses.
- Partnerships between the Blended Undergraduate Teacher Preparation Program and four local community colleges with teacher incentive grants resulted in similar introductory education classes being offered across campuses.
- Seven new tenure-track faculty members were hired in the Department of Teacher Education.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

- The Blended Undergraduate Teacher Preparation Advisory Committee, which was introduced the previous year, became a formal conduit for faculty from the colleges of Arts, Letters, and Sciences and Education to address program-related issues.
- Subject Matter programs leading to Single Subject credentials were reviewed to determine alignment with state standards and expectations. As a result, the Art, Science, and Modern Languages programs were completely rewritten and subsequently approved by the CCTC.
- All College of Education programs were engaged in plans to offer courses on a year-round basis. A major reason underlying this initiative is the ongoing need to increase student access and assist school districts by preparing fully-credentialed teachers in a timely manner.
- Workshops for students preparing to take the Reading Instruction Competency Assessment (RICA) were designed by Teacher Education faculty and offered through the Office of Extended Education.
- The Teacher Recruitment Project was moved from the Office of Student Services to the College of Education for the purpose of centralizing teacher recruitment and retention services.
- The college expanded its subject matter programs for area teachers. Workshops in reading/language arts, writing, mathematics, and technology were offered in a six-county area. With the exception of technology, which is funded by the CSU Office of the Chancellor, all others were funded by the Governor's Professional Development Institutes Initiative.

Teacher training in English Language Learning was provided by Education faculty through a series

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CalStateTEACH**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

CalStateTEACH is an alternative path to the Multiple Subjects CLAD (Cross-cultural, Language and Academic Development) teaching credential. Available to individuals residing and teaching in any geographic location in California, CalStateTEACH is specifically designed to serve uncredentialed teachers hired in public or private elementary school settings. It is particularly targeted to serve those who want to become credentialed teachers but are unable to access campus programs due to personal circumstances or because they live beyond commuting distance to a university. The field-based program integrates the theory and practice of teaching with daily teaching experiences for beginning classroom teachers. There is one curriculum that is implemented Statewide. The program is delivered through regional centers located at four California State University (CSU) Lead Campuses.

CalStateTEACH is a program of supported, independent learning in which beginning teachers work in small groups, guided by CSU faculty as well as by on-site school mentors. This form of instruction allows part-time, home-based study and uses a rich mix of print, Internet, video, and web-based materials. There are no regular university classes to attend; however, six all-day Saturday seminars are required during the program. After successfully completing the 18-23 month Program, candidates earn a preliminary teaching credential and 39 semester units of credit.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

CalStateTEACH is unique in that it is an integrated program, not a collection of individual courses. It is configured to meet the developmental needs of teachers from their first days in the classroom through their growth into competent teachers who can work effectively with diverse populations. Its mission is to prepare highly skilled teachers who utilize critical thinking, creativity, and reflection to inform their professional decision-making. It is committed to fostering the ethical development of teachers and to ensuring that its graduates recognize the teacher as a moral force within the classroom. Since the candidates are teaching full-time in their own classrooms, they must carry out all teaching tasks from day one – teaching all subjects, managing the classroom, assessing students, maintaining relationships with staff and parents, etc. Thus the candidates are introduced to critical knowledge and skills at the beginning, and those initial understandings are built on and extended until the entire program is completed, giving the participants the same complexity of skill and understanding as any well-prepared teacher, only having acquired them in a different structure.

The faculty, both through on-site visits and extensive web-based discussion groups, fosters a sense of group belonging, opportunities for substantive discussions and personal support. On-site teachers also mentor the Interns providing another means of assistance and support.

Assessment in the program is outcomes-based. Candidates are evaluated according to the six domains of the California Standards for the Teaching Profession both on their classroom teaching performance and on their professional portfolio.

Part A (continued):**Optional Qualitative Information about Each Teacher Preparation Program****New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001**

In March 2002, the California Commission on Teacher Credentialing completed the first accreditation review of CalStateTEACH and found that the program fully met all the Standards of Quality and Effectiveness for a Multiple Subjects with a CLAD Emphasis Program. The cohesive design of the integrated program, the leadership team, faculty support, responsiveness to program evaluation results and the variety of methods utilized for training on-site mentors were all commended.

CalStateTEACH was also part of the California State University Systemwide Evaluation of Teacher Preparation Program Pilot Study 2001. Alumni and employers of alumni who responded to the system-wide evaluation gave CalStateTEACH program completers consistently high ratings on the survey. For example, over ninety percent of CalStateTEACH graduates felt they were well or adequately prepared in the critical areas of teaching and assessing reading and mathematics as well as other areas such as promoting student learning, meeting the instructional needs of diverse student populations, collaborating with other teachers and communicating with parents.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Humboldt State University
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Faculty of the Department of Education at Humboldt State University are deeply committed to the high quality education of teachers and of the children and adolescents who are at the heart of our teaching. We expect our students to become exceptional classroom teachers and to take on leadership roles within public schools across the state as strong and articulate advocates for children and adolescents and for public education. Because of our small size we are able to offer personal, community-centered programs that best align with our educational philosophy. We see our mission as being able to help our students become aware of their own assumptions, preconceptions, and personal filters, and to assist them in understanding how they effect their teaching and the equity of the education that their students receive. We are committed to the act of teaching as being one of social activism and promotion of social justice. We see our students as being involved in the process of becoming a teacher in lieu of being a student. Such a transition is, by definition, sometimes a difficult one, and we believe it is our responsibility to attempt to ease that transition and to assure that every person who graduates from our program is one we are proud to number among those we have prepared for entrance into our profession.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

At HSU, we are fortunate to be able to utilize a team approach to teacher education. First, our credential programs enjoy a reputation for the high caliber of our credential candidates. Our selection processes are rigorous and thorough. Although the University resides in a small rural community, we have extremely well-qualified and active mentor teachers. Our supervisors as well are dedicated, knowledgeable, and committed to their student teachers. The students, mentor teachers, supervisors, and professors work together in challenging practical and academic preparation programs that focus on best educational practices and the creation of caring communities in our programs and in our public school classrooms. Because of our small size, we are able to offer personal, community-centered programs that best align with our educational philosophy. Our students receive an abundance of individual attention from all team members so that by the time they receive their credentials, they are well prepared to begin their teaching careers and to take on leadership roles in their schools and districts.

Institution/Program: **Humboldt State University**

Part A (continued):

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In Special Education a new faculty member has been hired to direct an expanded program in Special Education that includes the new level II mild/moderate education specialist credential. Both multiple and single subject programs are currently revising program content and structure to meet the 2042 standards. All programs are making special efforts to recruit new mentor teachers. The CSU evaluation study gave Humboldt State University high ratings for the effectiveness of the multiple and single subject programs in preparing highly proficient teachers.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: San Diego State University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

SDSU's teacher preparation programs serve San Diego and Imperial Counties in providing elementary and secondary general and bilingual education as well as special education professionals. The primary mission of these programs is to prepare educators skilled in raising student achievement and quality of life. This mission entails direct involvement in undergraduate, pre-service, and induction phases in collaboration with pre K-12 schools, other SDSU colleges, and local community colleges. The teacher preparation programs emphasize research-supported and reflective practice to equip new teachers with competencies to promote effective learning in culturally and linguistically diverse settings.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Teacher preparation faculty focus on linking theory, research, and practice. Throughout program coursework and field experiences, pre-service credential students have numerous opportunities to develop understanding of important educational theories and implement those theories in real public school classrooms. All programs require two semesters of advanced practicum/student teaching in culturally and linguistically diverse schools. Many of these programs are site-based, located on a public school campus that serves as both laboratory and resource center. The City Heights Pilot, a total university-community partnership, includes SDSU's management of an urban elementary, middle, and high school located in a low-income, ethnically and linguistically diverse neighborhood. The Pilot integrates pre-service teacher preparation, graduate education, and research in raising student performance on standardized tests.

A newly implemented blended program links undergraduate and teacher preparation and provides opportunities for undergraduate students to gain early field experiences and examine mathematics, science, humanities, and social science content from both disciplinary and teaching/learning perspectives.

Institution/Program: **San Diego State University**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

During the 2001-2002 academic year, the teacher preparation programs designed program changes for Fall 2002 that address new requirements for California teaching credentials. The new requirements emphasize pre-service teacher performance assessment based on new standards. Additionally, SDSU's College of Education gave impetus to and participated in a California State University system-wide assessment of credential completers that will help inform and improve program effectiveness.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:

Caution should be exercised when analyzing pass rates.
The effect of one candidate's performance can have a larger impact on smaller programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: San Francisco State University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The College of Education teacher preparation programs at San Francisco State University provide students interested in pursuing a teaching credential in Multiple, Single Subjects, and its Education Specialist Credential programs with the knowledge and skills needed to work in both urban and rural settings. The College of Education seeks to prepare reflective and innovative professionals who understand the need for educating its citizens to live in an equitable and just society. Teacher candidates are offered courses and given opportunities to participate in symposia, workshops and brown bag discussions aimed at increasing their understanding of the issues effecting the students and communities with whom they will be teaching or serving.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

San Francisco State University continues to closely examine and work with local school districts and other academic units to provide quality teacher preparation programs. The Multiple and Single subjects, and the Educational Specialist Credential faculty and administration work closely with district personnel to ensure that teachers are prepared to meet the demands of the teacher shortage in the surrounding community, as well as throughout the state. In order to address the demand for teachers, these programs have been involved in developing programs specifically aimed at meeting district needs in the surrounding Bay area communities. Courses are being planned to aid districts in their ability to hire teachers that have been trained and given tools to meet the day to day needs of the classroom environment.

Institution/Program: **San Francisco State University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Elementary and Secondary education faculty are actively engaged in redesigning and writing new curriculum to address the California Commission of Teacher Credentials newly adopted statewide standards for teacher preparation.

Collaborative partnerships continue to provide the College of Education with opportunities for expansion and service to the larger Bay area. The Elk Grove Unified School district continues to run extremely well and are being highlighted and examined by others throughout the state of California as an example of local public school district and university sponsored initiatives that work. In addition to this, the College of Education has successfully begun three teacher preparation cohorts with the Canada Community College, and continues to offer courses for community college students at San Francisco City College.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: San Jose State University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the College of Education at San Jose State University is to prepare educators who have the knowledge, skills, disposition and ethics that ensure equity and excellence for all students in a culturally diverse, technologically complex, global community. The College is divided into eight academic departments (Child and Adolescent Development, Communicative Disorders, Counselor Education, Educational Administration and Higher Education, Elementary Education, Instructional Technology, Secondary Education and Special Education), and utilizes department chairs and program coordinators to oversee various areas of academic emphasis. The College also makes use of an Office of Credentials and Student Services, an Office of Field Placement, several internship programs, professional development schools, a diagnostic speech clinic, an accent modification clinic, and a high-tech computer laboratory.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Strength of the College of Education teacher preparation programs include a dynamic, continually developing faculty, an attention to partnerships and action-oriented, applied research, and an emphasis on excellence and equity in education. Faculty members spend time working and teaching in schools to provide real-world, applied approaches to teacher preparation in socially and technologically diverse school settings. The College has over a dozen partnerships that range from internship placements and a professional development school to on-site course delivery and recognition of outstanding multicultural activities in the schools. And, by emphasizing excellence and equity in education, the College is committed to continuous improvement of courses, programs, and services in a socially just environment where every student has a right and opportunity to learn.

Institution/Program: **San Jose State University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The College of Education has partnered with the College of Engineering to develop a program on excellence in teaching science at the elementary and secondary school level. This initiative is designed to make sure that math and science teachers have the teaching skills necessary to effectively work with different levels of and different age students. A year-long all-university initiative to study and examine to ensure teachers have content knowledge in each discipline to most appropriately serve children and families in K-8. Additionally, the College is working to systemize program assessment throughout all of the programs to include more community involvement, advisory groups, and the impact of students doing their field experience.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Sonoma State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Sonoma State University is dedicated to the value of undergraduate education in a public college setting and committed to excellence in the professional preparation of educators. This small campus of 7000 students includes 690 credential and graduate students in the School of Education.

Our graduates teach in rural, urban, and suburban school districts in six counties in northern California. Some school districts have declining enrollment in the early grades due to the high cost of housing, but many communities are experiencing rapid growth and increasing diversity. Latinos make up 17% of Sonoma county's population, an increase of 93% in the last ten years. In the Bellevue and Roseland school districts, our credential candidates work in schools in which 52% of the students are Spanish speakers learning English. Sonoma State credential students receive a CLAD credential with special preparation in teaching children and youth from diverse cultural backgrounds and students who are English language learners.

Sonoma State University recommended 529 students for credentials of all types. Only a small portion (136) of these students were required to take the RICA examination. Sonoma State recommended 89 new teachers for the Single Subject credential and 57 teachers in Special Education.

Sonoma State offers advanced credentials in Administrative Services and Pupil Personnel Services, and resource specialist credentials in Reading, Special Education, and Adapted Physical Education. The School of Education has five programs within the Master's Degree: Curriculum, Teaching and Learning; Early Childhood Education; Educational Leadership; Reading; and Special Education.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

School/University Partnerships. Credential candidates have a rigorous preparation program that includes at least two semesters of participant observation and student teaching. Entering students are placed in one of our 40 partnership schools to provide many opportunities to apply their knowledge of teaching and learning. In the Early Childhood credential program faculty place students in field experiences at four levels: preschool, kindergarten, primary grades, and upper elementary grades.

Professional development schools. Sonoma State University has partnerships with three professional development schools founded on the principles of school renewal developed by John Goodlad. Each school is located in a different district and represents a different grade level: Sheppard Elementary School, Creekside Middle School, and Maria Carrillo High School. A university faculty member is at the school each week working with teacher candidates, classroom teachers and principals. One of our Educators in Residence is a teacher on temporary leave from the elementary professional development school and is serving as a member of the School of Education faculty for two years.

Multiple Assessments. Each credential program has a carefully articulated curriculum and multiple assessments, aligned with the California Standards for the Teaching Profession. Before Single Subject candidates can advance to student teaching they must present their portfolios to a team of university faculty and middle school and high school educators. In the Multiple Subject program, a university professor spends one day a week at a collaboration site creating a learning community of beginning credential candidates, student teachers, and classroom teachers.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

1. The first cohort is being recruited into the Hutchins Liberal Studies / Education Blended teaching credential program. These first time freshmen will participate in early field studies, a team-taught seminar, and an integrated curriculum that blends general education, liberal studies, and preparation for the Multiple Subject credential.
2. Collaboration with community colleges is expanding the teacher recruitment pipeline. Joint programs with the new Santa Rosa Junior College Teacher Academy will smooth the transition of students into Sonoma State University to complete their undergraduate degree and teaching credential programs.
3. Federal and state technology grants have funded professional development for 1100 K-12 teachers. Twenty university faculty are working with classroom teachers to develop video lessons for California's Internet2. Video conferencing is being used in an experimental program to support supervision of student teachers.
4. Faculty members engaged in research on our programs have completed two Self-Studies. The first study, soon to be published, involved a field study of our graduates after 3-5 years in teaching. The second study focuses on the partnerships with three professional development schools; data is being analyzed. The School of Education plans to continue these research studies as we seek to measure the effectiveness and impact of our programs.
5. A Director of Accreditation and Assessment has been selected to lead efforts to improve our evaluation and assessment system to measure candidate success in our programs and provide data on program outcomes.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of California, Berkeley**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of California's mission to combine theory, research and practice distinguishes UC Berkeley's programs in education. The following principles promote the Graduate School of Education's mission to emphasize school reform, urban education, and the development of educator scholars through exemplary teacher education models.

Programs are:

- Based on a clear theoretical and research base including the role and importance of language, the importance of development, and cultural differences in learning;
- Designed to produce reflective practitioners by providing: field experiences in urban schools; cohorts of professional colleagues who collaborate on planning and instruction; opportunities for faculty and student interaction; and extensive practice with regular supervision.
- Designed to nurture and enhance collaborations with the K-12 sector.
- Geared to research and development efforts with concern for school reform.

The Cal Urban Partnership Intern Program of UC Berkeley Extension supports the mission and goals of UC Berkeley Extension and its Education Department by promoting a lifelong learning perspective starting with the pre-service period and extending throughout a teacher's career. CalPIP is founded upon the belief that:

- Urban teacher education programs must integrate academic preparation with structured, hands-on, real-life classroom experience that is closely monitored by site mentors and university-based supervisors.
- Teacher preparation must meet the needs of the diverse student population of California schools, and be consistent with the learner-centered principles of the K-12 reform movement.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Berkeley credential programs offer:

- The opportunity to study with eminent scholars. Prominent faculty members are encouraged to participate directly in credential programs. Professional program faculty are specialists in their fields; having extensive experience as practitioners in the subjects they teach and supervise.
- The opportunity to complete professional training in broadly diverse, multicultural settings. The Bay Area includes a wide variety of schools, allowing Berkeley students to encounter a broad range of district policies, curricula, and socio-economic settings.
- Credential programs benefit from faculty research that is related to professional practice; programs are designed to help candidates translate current research findings into professional practice.
- Innovative and model professional preparation programs, including a strong and integrated technology component. Also, all programs, except CalPIP, combine the credential with a Master of Arts degree.
- Strong grounding in academic disciplines. Programs emphasize the concepts, methodology, and current findings of the various disciplines fundamental to specific credential programs.
- Instruction providing appropriate background and methodology is concurrent with fieldwork in the student's professional specialty or subject area. Berkeley programs provide an opportunity for students to practice and test campus instruction in their own classroom or school settings.
- Small classes, allowing individual attention in instruction, field placement, and field supervision.
- Strong relationships with partner districts employing CalPIP interns.
- An outstanding placement record for graduates, and an excellent rate of retention in the profession.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Graduate School of Education is engaged in the following new efforts aimed at improving credential program excellence:

- Collaborating with the Bay Area Consortium for Urban Education to create partnerships between our teacher education programs and the school districts that hire our graduates. Consortium members include school districts in Oakland, San Francisco, Albany, Emeryville, and West Contra Costa.
- Continuing the work begun last year to strengthen the role of the School's Evaluation Unit to better inform the work of the credential program faculty. Now piloting follow-up surveys of graduates, and creating documentation of evidence to be used to demonstrate adherence to State's new teacher education standards.
- Participating in the work of the Teacher Quality Collaboratory to document connections between effective teacher preparation programs and student outcomes, particularly in the area of closing the achievement gap. Other participants include Stanford University, Mills College, and San Jose State University.

New initiatives for the Cal Urban Partnership Intern Program of UC Berkeley Extension during 2001-02 include:

- Forging a closer relationship with school districts to group interns in "partner schools" to allow for a better support system;
- Enlarging the professional library of videotapes, resource books, and technological resources available for checkout by interns;
- Implementing an intensive professional development program for supervisors.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of California, Davis**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Teachers in California face the most ethnically and linguistically diverse population in the country. At UCDavis we offer two routes to obtaining an elementary credential--during the academic year and during the summers. We focus particularly on those students who come from culturally and linguistically diverse communities. Therefore, all UCDavis credential programs include the CLAD emphasis which provides strategies to work effectively with K-12 students who are English Language Learners or the BCLAD emphasis, designed to work with K-12 students who are in the process of learning English in a bilingual program. Collaborating K-12 teachers contribute to the programs by participating in the design of the curriculum, teaching some of the required courses, supervising student teachers; and participating in the screening and assessment of program applicants. In collaboration with the Bilingual/Multicultural Department of the California State University, Sacramento campus (CSUS), we offer an intensive summer elementary credential program designed as an alternative route for returning students or persons changing careers. (In part B1 and B2 below, the difference between the number of candidates served in courses verses the number of candidates in supervised student teachers is due to the division of responsibility for this joint program. UCD offers program coursework and CSUS oversees the student teaching element.) We have been successful in maintaining a program commitment to enrolling a diverse community of student teachers, with ethnic minority students representing at least twenty-four percent of the program enrollment.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The design, implementation, and assessment of the UC Davis credential programs are guided by four principles. These principles define the roles that our program believes to be essential in the preparation of new teachers for ethnically and linguistically diverse communities. They are: 1) Collaborative professionals who work with students, colleagues, parents to forge effective teaching practice; 2) Advocates for Educational Equity who champion high expectation for learning in all students; 3) Reflective practitioners who employ inquiry and reflection on practice to create effective classroom communities; and 4) Investigative teachers who continuously examine, define and refine their teaching practice to promote student learning, targeting underachieving students as a particular focus. Our research on the UC Davis program accomplishments, confirms that these four organizing principles provide our students with the critical knowledge and tools for working successfully in California's K-12 classrooms as evidenced by follow-up surveys and observations of program graduates. A key element contributing to the success of our graduates is our focus on advocacy and the creation of small learning communities with significant faculty mentoring. Students work with graduate faculty engaged in research about school-based teaching and learning, and with teacher education faculty who have had substantive and exemplary experience in the schools in the appropriate credential area. Another key element of our Program's vision is to ensure that faculty who teach credential methods courses also supervise students in the field placements.

Institution/Program: **University of California, Davis**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

As a result of a 5 year implementation and inquiry cycle to test out effective credential program elements, the program faculty identified several that are particularly promising. We are now in the process of integrating these elements in all our credential programs.

Through this process, we identified two models for promoting teacher inquiry. One focused on the design of a teaching intervention to accelerate the progress of underachieving students. Another model focused on the investigation of effective instructional techniques in targeted areas of the curriculum.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of California, Irvine

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Teacher education programs at the University of California, Irvine, are organized around the assumption that the single most important variable related to the improvement of schooling for all children is the quality of the teaching force. As society experiences extraordinary change, both demographically and technologically, our schools and teachers must be prepared to serve the needs of a highly diverse student population through practices which represent the very best from both theoretical and clinical perspectives.

To be highly competent in such a context, teachers must be reflective and proactive practitioners, prepared to make educational decisions based upon the needs of the students they teach and informed by the knowledge and realities of classroom practice, subject matter standards, and professional and ethical considerations. As proactive educators, teachers need to understand their own cultural and pedagogical references and develop sensitivity to the multicultural and multilinguistic contexts that characterize their classrooms. Knowledge of research and theories related to teaching and learning, habits of reflection-on-practice, skill in using various technologies and a disposition towards flexibility and purposeful change will enable teachers to make decisions that facilitate the learning of all students.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

While we have a longstanding relationship and professional history with many of our schools, in the past two years our growth has brought a number of schools into our network. During 2000-01, UCI worked to create new partnerships and build on previous ones in order to build capacity for quality mentoring for teacher candidates.

We want our prospective teachers to develop habits of inquiry, awareness and professionalism that will enable them to be successful in the specific cultural and linguistic contexts in which they will work. A thorough grounding in educational research attends all of the course work candidates undertake. Portfolio development, case studies, critical cultural inquiries, and reflection-on-practice processes are major parts of their learning.

Institution/Program: **University of California, Irvine**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

As of 2000-2001, an MAT program, consisting of two summer sessions prior to and following the 9-month credential program, prepares a select group of candidates for educational leadership, extended research and technology skills and National Board Certification once they begin their fourth year of teaching.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of California, Los Angeles**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of UCLA's teacher education programs is to attract, prepare and retain highly qualified teachers to work in urban schools that serve low income children of color. At UCLA there are three pathways to attaining a credential: the Center X Teacher Education Program (TEP) which leads to a credential and masters degree, TeachLA, a university internship program and the UCLA Extension Urban Internship program. TEP and TeachLA offer both Multiple Subject and Single Subject (in the areas of English, social studies, mathematics, music and science) Teaching Credentials. The Center X TEP program has a joint mathematics/education program and science/education program for UCLA mathematics and science undergraduates. The UCLA Extension program offers a Multiple Subject Credential. All three credentials include a Cross-Cultural Academic Development (CLAD) Emphasis. TEP offers the Bilingual Cross-Cultural Academic Development (BCLAD) Emphasis in Spanish.

The goals of these programs are to assist novice teachers in constructing communities of learning and inquiry for their students. In the UCLA programs, teachers develop the professional knowledge, skills and beliefs necessary to engage culturally and linguistically diverse groups of students. UCLA is located in the heart of Los Angeles and the context for observation, participation, student teaching and teaching is in urban, low income partnership schools that reflect the diversity of California's urban schools.

The recruitment of teacher candidates focuses on under represented groups in the teaching profession. UCLA has been extremely successful in attracting and enrolling a candidate pool that mirrors the diversity of Los Angeles County.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The outstanding quality that has contributed to our programs' excellence and effectiveness for our candidates during 2000-2001 is the blending of research and practice. Our philosophy stems from considerable literature on educational change, teacher development, and efforts to create more equitable schooling for low income students, students of color, and students from diverse backgrounds. We think of our work with new teachers as less the transfer of skills and knowledge than helping them to forge new identities as social justice educators as they work in urban schools.

In 2000-2001, "Instructional Families" were organized to enhance the preparation of credential candidates. These instructional families include credential candidates and all those who support the learning of the teacher education students: faculty advisors, university field supervisors, academic faculty, course lecturers, and administrative personnel. The families provide a site where credential candidates may engage in learning activities. In addition, the instructional families serve as a bridge within the program, linking academic and methods course work, field sites, school personnel, and local urban communities.

UCLA teacher education programs provide various opportunities for research based professional growth for credential candidates in the first years of teaching and for experienced school support professionals. These opportunities include participation in the California Subject Matter Projects, and professional development workshops that are content based and are supported by private, state and federal funds.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In 2001-2002, Center X expanded its teacher education early career support efforts to form a new collaborative to increase the supply, competence and commitment of urban teachers. The Urban Teacher Education Collaborative (UTEC) brings together teacher educators, researchers, classroom teachers, and community members to create innovative learning tools and apprenticeship opportunities that will facilitate the growth of Center X's Teacher Education Program (TEP) and assist other programs in preparing committed and capable teachers for urban schools.

The faculty of Center X, TEP and TeachLA are also creating structures for reflection and systematic inquiry about their practice. They have developed four committees: Faculty Development, Student Development, Curriculum, and Community Partnership. Through these committees, faculty members and credential candidates make decisions regarding the teacher education programs. The committees form the basis for developing instructional case studies. Each of the cases will be a learning tool for our own faculty as well as other university and school-based teacher educators attempting to create contextually appropriate approaches to urban education.

During 2001-2002, greater attention has been focused on supporting credential candidates in their subject matter preparation. Formal test preparation classes have been offered for the CBEST, MSAT, Praxis, and SSAT examinations. Test preparation courses and supplementary materials and resources have been made available to current and prospective teacher education program candidates.

Caution should be exercised when analyzing pass rates.
The effect of one candidate's performance can have a larger impact on smaller programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of California, Riverside

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the University of California, Riverside's School of Education encompasses research, instruction and service. Research includes investigations of both fundamental and applied problems in education. The range of issues is diverse--teaching and learning, assessment and school organization, the subject matters, and school leadership. The School's agenda links scholars from a variety of social science disciplines and methods, along with foundational areas such as history and philosophy, around the theme of knowledge in practice. Instruction centers on engagement with knowledge, practice and policy and their relationship. The heart of the enterprise is the preparation of academicians and practitioners--teachers and administrators--who will serve as leaders by virtue of their ability to produce and mobilize useful knowledge. The establishment of a full-fledged professional program extends the scope of preparation back to undergraduate years and forward to post-credential induction years, and requires tighter integration of credential and academic programs. Students in all of our programs analyze complex problems, engage in spirited debates about public education, while concurrently spending significant time in the public school. The University's goal is to lead all students to high levels of academic achievement and performance, regardless of the circumstances of their birth and environment. We believe our role is to develop and implement credential and graduate programs of extraordinary quality. Through robust, committed partnerships with area schools, we believe we are in reach of our goal.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The University of California, Riverside's (UCR) Comprehensive Teacher Education Institute represents a number of collaborative partnerships, involving the UCR School of Education, selected academic departments, and local schools. The central goal of the institute is the creation of professional development schools aimed at preparing prospective teachers, providing professional development opportunities for experienced teachers, and encouraging research related to educational practice. In preparing prospective teachers, the project undertakes strategies including: early induction, a resident university supervisor at each school, multicultural placements, training for cooperating teachers, guided field observations, staged entry into teaching responsibilities, weekly seminars during the regular school day, team teaching and interdisciplinary opportunities, CLAD/SDAIE training, a preservice/in-service link, priority for substitute teaching opportunities, university courses taught by teams (education faculty, academic faculty, practicing teachers) and assessment strategies such as reflective journals, videotapes of teaching, and portfolios. Our collaborative program won the 1997 Distinguished Program in Teacher Education Award from the Association of Teacher Educators, received the Quality of Education Award from the California Council on the Education of Teachers, and was selected as an Exemplary Teacher Education Program by the National Education Association.

Part A (continued):**Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

During 2001-2002, UCR's Graduate School of Education designed and implemented a combination masters and credential program (M.Ed.). Especially developed master level courses focusing on the policy of decision making, the learner, the classroom and the school enrich the credential program. Secondly, a Blended Program of Undergraduate Teacher Preparation for the Multiple Subjects Credential was approved in summer 2001. Candidates in this program are afforded early field experiences, relate their University course work to the K12 content standards, begin student teaching as seniors, and may assume teaching positions as interns upon completion of their B.A. Together these two innovative programs aim to accelerate the candidate's professional development, enabling them to assume leadership positions more quickly. Thirdly, UCR Teacher and M.Ed. candidates meet the new technology requirement by completion of an electronic portfolio. They are required to implement technology to enhance their classroom teaching and their students' learning. Through the selection of artifacts, the writing of personal reflections, and the filming and editing of video clips, the candidates begin a record of their professional journey that prepares and encourages them to one day work toward National Board Certification.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of California, San Diego

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The faculty of the Teacher Education Program (TEP) at the University of California, San Diego, actualizes their commitment to equitable education for all children by preparing new teachers to systematically reinvent their curriculum and pedagogy in response to the changing needs of students and the community. TEP offers a one-year graduate program leading to the Master of Education/California Multiple Subject Credential and the Master of Education/California Single Subject Credential in English, Mathematics or the Sciences. All credential options require the Cross-Cultural, Language and Academic Development (CLAD) emphasis. In addition, TEP offers bilingual credentials (BCLAD) in Spanish-English and American Sign Language-English.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The TEP faculty believe that the equitable participation of children in schools and classrooms requires fundamental changes in our approach to teaching and learning. Additive approaches to curriculum design and mere social and cultural awareness training are not sufficient preparation for teachers to make learning more accessible and equitable for children who are underserved by our public instructions. TEP credential candidates learn to assess student and community needs, access and apply current research on teaching and learning, and systematically develop their teaching performance using reflective practice portfolios. The goal of the program is to produce graduates who possess the knowledge, skills and confidence required to face the most severe shortages in the state. These schools are typically challenged with complex social and economic factors such as large numbers of English language learners, low-income families, and a high teacher attrition rate.

Institution/Program: **University of California, San Diego**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

TEP is in its first year of having a Master of Education degree that articulates with the existing credential programs. Summer 2002 will be the first year for students completing the electronic portfolio final project. We have submitted our Senate Bill 2042 Program Document and we have revised all course syllabi to address TPEs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of California, Santa Barbara**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Santa Barbara Teacher Education Partnership believes:

- o All our children deserve the education that few students currently have;
- o The survival of our democratic traditions requires nothing less;
- o Every member of a community has a stake and a role in the education of our children and the survival of our democracy;
- o The best hope for our children and our country is to reconstruct the preparation, induction, and support of educators while simultaneously re-constructing the institutions responsible for that work.

This vision requires teachers who:

- o Believe that all students want, and have the capacity to, make sense of their world;
- o Believe that content -- the knowledge, skills, and dispositions teachers have to share (including a balance of skills-centered and meaning-centered approaches) -- will help their students make sense of their world;

To become teachers who embody these values and beliefs is a life long process. The goal of our program is thus, not to tell people how to teach, but to prepare people to learn from teaching (their own and others) so that they can, over time, become the teachers students and their families deserve. We prepare teacher through six inter-related program themes:

- (a) Autobiography/Philosophy of Education,
- (b) Study of Children/Study of Schools,
- (c) Methodological Competence,
- (d) Diversity,
- (e) Collaboration,
- (f) Reflection.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Instructional quality resides in the interactions among and between the student, the teacher, and the content. Therefore, the conversations and relationships that constitute our programs revolve around those centering elements of instructional quality. The Santa Barbara Partnership for Teacher Education believes this reality of teaching and learning is embedded within the California Standards for the Teaching Profession (CSTP). The curriculum, the teaching, the assessments, the partnership, and our research revolve around the CSTP.

Programmatic structures and processes that support our candidates' development towards meeting the CSTP include:

- A common, clear vision of quality instruction apparent in all coursework and field experiences;
- A curriculum grounded in substantial knowledge of child and adolescent development, learning theory, cognition, motivation, and subject matter pedagogy taught in the context of practice;
- An entire school year of field experiences carefully selected and maintained to support the ideas and practices presented in simultaneous, closely interwoven coursework;
- Well-defined standards of practice and performance that are used to guide and assess coursework and field experiences;
- Strong relationships, common knowledge, and shared beliefs among school- and university-based faculty;
- Extensive use of case study methods, teacher inquiry, performance assessments, and portfolio evaluation to ensure that learning is enacted in the crucible of classrooms and schools.

Institution/Program: **University of California, Santa Barbara**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

We have initiated a follow along study of program graduates which will provide feedback on their teaching effectiveness, as well as changes in K-12 policy and practice which have implications for teacher preparation.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of California, Santa Cruz

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The UCSC campus offers 27 graduate programs. Within those programs, there are a range of options for concentrated study in a specialized field. Graduate study at Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. The UCSC teacher preparation program is a combined Master of Arts in Education and credential program spanning five academic quarters including Summer. The program offers the Crosscultural Language and Academic (CLAD) and Bilingual, Crosscultural Language and Academic Development (BCLAD) emphasis teaching credentials, both Multiple Subject and Single Subject: English, Math, Science and Social Science. The program seeks applicants from diverse cultural and linguistic backgrounds to teach in multicultural K-12 classrooms. Students are expected to integrate theory and practice in courses, classroom placements, and research projects.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

During 1999-2000, the UCSC program recommended approximately 25 candidates from its Internship program for Professional Clear CLAD and BCLAD multiple subject teaching credentials. The program admitted its last cohort to the two-year Master of Arts in Education teaching program while beginning its recruitment to the first cohort of its 15-month five quarter combined M.A. in Education teaching credential program. A mid-quarter Literacy Institute for multiple subject credential candidates provided 100% passing rates for the UCSC RICA test takers.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Alliant International University (formerly US International University)**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of Alliant International University's Graduate School of Education is to produce competent, confident, and conscientious educational leaders who will promote and empower academic success, personal growth, and professional achievement of all in a global society. We accomplish this by offering our students exceptional professional preparation centered on multidisciplinary and holistic approaches to education. The mission of the Teacher Education Program supports the university mission by emphasizing critical thinking, ethics, and practical application of teaching skills. This commitment involves preparing teachers to be skilled practitioners utilizing reflective, inquiry-based thinking to continue to learn and improve the quality of what they do. We want teachers who make a difference in the classroom, school, and the educational community. Thus, our program is distinguished by a dynamic responsiveness to current issues and problems in today's classrooms. A multicultural and global perspective in which multiple viewpoints are valued in this program. Small class size provides numerous opportunities for students to work together and bond as well as receive individual attention from the instructor. Evening sessions allow working adults the opportunity to participate in the program. A qualified faculty from diverse backgrounds provides our students with the knowledge to be problem solvers, information and technology managers, and capable communicators. These skills are practically applied by those practitioners already in classrooms and during the student-teaching experience for those who are not yet in the classroom.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The Teacher Education Program at AIU is characterized by a commitment to excellence on the part of faculty, staff, and students. The Teacher Education faculty consists of full, associate, and assistant professors holding doctoral degrees and skilled practitioners holding Master of Arts Degrees in Education. Our Student Services Department is staffed by qualified professionals who provide personal guidance and assistance to students. Small class size provides opportunities for students to learn and practice instructional strategies such as collaborative learning, reflective thinking, and innovative use of technology, and to develop classroom management skills. It has been a long time tradition and focus of this program to prepare leaders in the educational community. Our students tend to be serious individuals interested in becoming skilled practitioners who can make a difference in the lives of children.

The AIU Education Department maintains partnerships with schools in San Diego County providing faculty with an opportunity to work closely with teachers in the field on infusing critical thinking into all areas of the curriculum. These collaborations combine the know-how of experienced teachers with that of experienced professors to be in the forefront of educational improvement. Also, embedded in the curriculum is technology training as an invisible tool of a 21st century educator as she/he designs, delivers, and evaluates authentic learning experiences for students. Alliant International University wants to encourage teachers who will make a difference in the lives of their students, the culture of the school, and the reputation of the community. We encourage a career long relationship.

Institution/Program: Alliant International University (formerly US International University)

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Teacher Education Program at Alliant International University embraces the changes on its horizon. The teacher preparation programs will continue to embed a multicultural/ multinational perspective with a cross-cultural emphasis in their curriculum. The San Diego campus will convert its delivery of instruction from a quarter to trimester system. This conversion will put all programs in the Graduate School of Education on the same schedule including the Teacher Education Program. AIU will align its courses to meet the standards established by the National Council for Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CCTC). NCATE accreditation will give the program national recognition and enhance the ability of this institution to address the needs of our students in content preparedness. Additional weekend workshops for the Reading Instruction Competence Assessment (RICA) will be offered to students as an opportunity to focus on this examination. CCTC accreditation will demonstrate that curriculum and practice aligns with the new "Standards of Quality and Effectiveness for Professional Teacher Preparation Programs" (SB 2042) as well as common standards for teacher preparation programs in California

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Antioch University Southern California
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Master of Arts in Education and Teacher Credentialing Program (MAE/TC) at Antioch University Southern California prepares elementary and middle school teachers who will specialize in teaching literacy, are knowledgeable about building character and citizenship skills, and actively resist cultural, economic, and racial bias. Moreover, Antioch's teachers educate their students to understand and respect the ecological systems upon which humankind depends for its continued survival. The MAE/TC Program seeks to prepare competent, effective teachers who have the educational and social skills to influence change in their schools, helping to make their classrooms and school communities places where all members can learn and develop. To prepare its students to address social justice issues in education, the MAE/TC Program provides theories, teaching methods, and experience appropriate for effective work in low-performing schools where inequities are most prominent. The credential preparation courses are offered at the graduate level. Students continue in the Program studying more advanced courses in pedagogy, curriculum, and leadership to earn a Master of Arts degree in Education. The Program serves the local school communities of both the Los Angeles and Santa Barbara campuses that have significant proportions of lower socio-economic groups, underrepresented ethnic groups, and second-language learners. Antioch University serves adult students, many of whom are seeking an alternative career, as well as teachers working on emergency permits.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Professional preparation courses are offered at the graduate level. In all courses, candidates study both theory and methods, and learn to critically evaluate pedagogy and curricular content. The Program includes four literacy courses, which provide candidates with exceptional reading instruction abilities through a broad range of theories, models, and materials. Candidates are taught the skills of inquiry, and learn to view themselves as researchers and their classrooms and schools as social laboratories. Candidates study both accepted and emergent theories of learning, including current research on multiple intelligences, ethical development, and learning differences. The course and field work for all candidates is tailored to prepare them to work in low-performing schools and, particularly, with second-language learners. The curriculum includes methods courses in art, civic education, and physical education, and candidates are taught ways to provide a creative, integrated curriculum that provides access to the core content areas for all students. Candidates (5th-year & emergency permit teachers) are closely supervised during daily student teaching by Program Faculty who are familiar with all aspects of the Program's curriculum.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Azusa Pacific University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Azusa Pacific University is an evangelical Christian University. The School of Education and Behavioral Studies seeks to “develop competent, innovative, visionary educators, and scholarly practitioners of high moral and ethical character.” The Department of Teacher Education has offered state-approved programs since 1963. It offers a B.A. in Liberal Studies and an accelerated B.A. in Human Development (CCTC-approved subject matter programs for future multiple-subject teachers) and all of the professional certification programs. The university also offers eight CCTC-approved single subject preparation programs for undergraduates. Prospective teacher candidates reflect the diversity of the students and districts they will later serve including communities that are racially and linguistically diverse. University mentors continue to report that program graduates are outstanding first- and second-year teachers.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

In 2000-2001, the School of Education and Behavioral Studies received full accreditation from CCTC and NCATE (National Council for Accreditation of Teacher Education). APU became one of only 16 California institutions that are NCATE accredited. There continues to be a consistent focus on recruiting both faculty and students who are persons of color. In keeping with increased numbers of interns and students working on Emergency Teaching Permits, APU offers courses with flexible schedules on a nine-week term with late afternoon start times. Given the qualification of full-time faculty and the highly-qualified practitioners who serve as adjunct faculty, the Department of Teacher Education is able to assure prospective employers that program graduates are well prepared academically and professionally.

Institution/Program: **Azusa Pacific University**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The most exciting initiative that occurred in Teacher Education during the 2000-01 year came with the implementation of the infusion of technology into the curriculum and the award of a \$500,000 foundation grant. The academic year, 2000-2001, allowed faculty in Teacher Education to fully implement the dynamic and exciting new curriculum designed to prepare teachers of the 21st Century. Special Teacher Education Technology Labs were established on the Azusa campus and in four of the five regional campuses. Each Lab is equipped with technology and software appropriate to needs of prospective teachers empowered to fully utilize technology throughout the academic curriculum. The Department of Teacher Education also purchased (and prepared faculty to use) two portable kits containing assistive technology aides appropriate to need of students with disabilities.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Bethany College - Assemblies of God

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The program of professional preparation for teachers at Bethany College, a small, private, Christian college, has at its core the mission of preparing leaders for the church and for society. Leadership is defined as exemplifying quality and caring service to others. This focus on servant leadership is demonstrated in the teacher preparation program by the focus on the individual student. The approaches to teaching K - 12 students presented in the course work and the support and instruction provided to the prospective teacher, model this focus on the individual student. Preparing teachers to serve by leading through example, by providing quality instruction, and by being caring, competent individuals is the goal of the program. Recipients of this service include not only the students in their classrooms, but also parents, colleagues, and the broader educational community. Teachers prepared at Bethany College are qualified to serve in a variety of contexts, public elementary, middle, or high schools, private schools, international schools, home schools, or in mission contexts around the world. Quality, caring leadership is needed everywhere, and the professional preparation program at Bethany equips individuals to be leaders wherever they choose to serve.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

During the 2000 - 2001 academic year the professional preparation program at Bethany College instituted a subject area mentor program. This program allows candidates to be coached in the subject matter related to their credential area by a current practitioner in the field. Coaching includes review of material related to the teaching of the California content standards and association standards in the respective field of study. This coaching, combined with supervision and coaching in pedagogy, provides candidates a strong foundation with which to begin a career as a professional educator.

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Initiatives linked to meeting the new standards for professional preparation programs include enhancing the subject area mentor process for all candidates, infusing technology instruction throughout the program coursework, and developing an enhanced professional portfolio to document candidates' learning throughout their coursework and supervised student teaching experiences.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Biola University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of Biola University is biblically-centered education, scholarship, and service equipping men and women in mind and character to impact the world for the Lord Jesus Christ. Within this overarching mission and goal, Biola's Department of Education continues to strive toward its own mission to equip Christian teachers and administrators for service in public, private, mission and homeschools through biblically-centered education, scholarship and service. For several decades, Biola's Department of Education has taken pride in its role of preparing the finest educators within a context of practical, hands-on learning, through a combination of extensive community involvement and a fully doctored, full-time faculty bringing rich and diverse experience to the instructional level. In compliance of the Program Standards of the California Commission on Teacher Credentialing, Biola's CCTC accredited Multiple Subject and Single Subject programs include practicum fieldwork in the widely diverse public and private schools of the greater Los Angeles and Orange County areas. Additionally, many of Biola's teaching credential candidates are offered the chance to complete coursework and field practicum requirements in the overseas mission school settings of Papua New Guinea and Hong Kong. Through these varied and challenging education settings, students in Biola's University Teacher Preparation Program are equipped with not only the credential to serve in public and private education but with the experiential wisdom needed for successful teaching in a variety of settings.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

During the 2000-2001 academic year, students and credential candidates under Biola University's Department of Education were afforded the opportunity to pursue their degrees and credentials in a nationally ranked program. In the 1999-2000 study conducted by US News and World Report, Biola University's Graduate Education Program was ranked among the top 100 programs within its class in the nation. Furthermore, Biola University's Department of Education has helped to produce four school and district-wide Educators of the Year. The factors leading to the success of Biola's Teacher Preparation Program include small class sizes with a low student-to-faculty ratio as well as a fully-doctored full-time faculty of former public and private educators and administrators. Biola University's Department of Education has also continued to hold to academic standards and fieldwork requirements far surpassing the standard requirements of the State of California in these respective areas. Biola has also continued to rely heavily on the surrounding educational community, implementing the suggestions and ideas of local educators and administrators for how to better serve our students while impacting local schools.

Institution/Program: **Biola University**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Biola University's Teacher Preparation Program has established several new initiatives to ensure the ongoing effectiveness of the program. First, a Community Site Council, comprised of district supervisors and administrators from a variety of local school districts was established to meet each semester to facilitate and strengthen communication between the university and the local community. Additionally, a new position was created, Student Teaching Placement Coordinator, in order to provide more personalized placements for students. This position will entail spending concentrated time on school campuses interviewing and observing potential Master Teachers and developing personal relationships with school principals. Through this process, Biola University's Education Department hopes to address specific student needs and goals during their student teaching assignment. Another initiative was the hiring of several new student teaching supervisors to service our students in more remote placements and provide quality mentoring and supervision.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California Baptist University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Within California Baptist University's Christian liberal arts context, the School of Education faculty strives to develop reflective, accepting, and caring teachers, who will model the moral dimensions of a genuine Christian life. When reflective, one is integrated and balanced. When accepting, one embraces the differences in others. When caring, one supports and validates others. This represented in our mission statement.

The School of Education of CBU, a university committed to the Great Commission, holds these beliefs as our mission statement: Our mission is to prepare educators of high moral character and ethical behavior to teach and lead in schools throughout the world. Our teachers will be well-equipped, highly principled individuals; understand diversity as a strength; and provide for individual differences in order to help students prepare for a diverse and rapidly changing world. We maintain high standards and expectations for ourselves and for students who wish to serve in building a better world by entering the education profession.

The School of Education at CBU offers these basic credentials: Multiple Subject and Single Subject. Two other credentials are offered: Administrative Services (Tier I) and Education Specialist in Mild/Moderate Disabilities (Level I) with a dual credential option. Newly added is a Reading Certificate Program, which may be taken along with credential courses.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

There are many reasons the School of Education programs at CBU excel. First, all faculty have had K-12 teaching experience, making them knowledgeable, empathetic role models. The combination of early fieldwork in pre-requisite courses and extensive fieldwork in professional methods courses help candidates integrate theory and practice before student teaching. CBU candidates student teach full-time for one semester with students who have diverse needs. Adjusting schedules for candidates who are already employed is another reason the School of Education meets the needs of future teachers. Finally, Multiple Subject Credential candidates have the opportunity to attend free RICA reviews. We truly want our students to succeed.

Admission into the School of Education Credential Program at CBU requires the completion of pre-requisite courses which present an overview of teaching, child development, cultural and language diversity, and computer technology. Therefore, students may decide whether teaching is the right career for them prior to professional part of the program.

Professional methods courses build upon the pre-requisite foundations. Multiple Subject Credential students focus upon Reading and Phonics, Math, Science, Language Arts, Social Studies, and Classroom Management. Single Subject Credential students follow a similar sequence of professional courses including Reading and Writing in the Content Areas, Secondary Methodology, Content Area Specialization, and Classroom Management. Student teaching for all candidates is intensive. Weekly seminars engage students in large and small groups. Guest speakers, specialists and panel members from local school districts provide real life experiences.

Part A (continued):**Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Several changes have been implemented or approved this year as the School of Education at CBU continues to look for ways to grow and be responsive to the job market in the local school districts. First, we have received approval for a Reading Certificate which may be completed with a Credential plan or as part of a Master's program. Secondly, we have initiated a Faith-Based Administrative Services Certificate program in conjunction with ACSI. Next, more School of Education faculty are taking advantage of university sponsored training on web-enhanced teaching. Many of our working students find these web-enhanced courses beneficial. Finally, the School of Education has been striving to improve literacy in the university's neighborhood. Two after school learning centers in the Latchkeys for Literacy Program have continued to flourish. In addition, our teacher candidates have individually tutored students from Sherman Indian High School and local public schools in the School of Education's Special Education Reading Clinic.

Several changes are underway for the up-coming year. First, credential programs in preparation include Internships for the Preliminary Multiple Subject Credential and the Preliminary Single Subject Credential, as well as the Level II Education Specialist Credential for Mild/Moderate Disabilities. Committees have been diligently working in response to changes in state mandated standards. As a result, many changes are being implemented in coursework to include teaching competencies for English Language Learners and improvement of assessment. Plans continue for career ladder programs in partnership with local school districts, such as our partnership with San Bernardino in the Teach for Tomorrow Consortium.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California Lutheran University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School of Education at California Lutheran University offers programs to prepare 'Reflective Principled Educators' in the context of the University's mission to educate 'leaders for a global society who are strong in character and judgment, confident in their identity and vocation, and committed to service and justice.'

Future teachers, Pre-Interns, and Interns are prepared in the public schools of Ventura County. Teachers employed without full credentials in area private schools and the San Fernando Valley portion of the Los Angeles Unified School District are served through evening and summer classes. CLU has several partnership agreements with the Ventura County Superintendent of Schools Office.

Multiple Subject [elementary] and Single Subject [secondary] Teaching Credentials are offered in a program that is an early adopter of the AB2042 standards. The University is committed to continuing to offer the Bilingual Cross-cultural Language and Academic Development [BCLAD] [Spanish] Emphasis option for teaching credentials. Educational Specialist Credentials in the special education categories of Mild to Moderate and Moderate to Severe are provided at CLU to intern credential holders.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

CLU has been actively engaged in Preparing Tomorrows Teachers for Technology, [PT3] based on a US government grant supporting the development of technological competence in teachers. Computer utilization is developed throughout our curriculum. Candidates present evidence of their development as teachers in a unique web-based electronic portfolio system. Service learning is a component of selected course work and provides students with critical experience tied to important educational theories that guide practice.

Benchmarks are interspersed throughout the program, from admission to exit, where candidates provide evidence of practice in their electronic portfolios that are organized around the California Standards for the Teaching Profession [CSTP] and Teaching Performance Expectations [TPEs].

The full-time program is comprised of a semester of foundation courses, a semester of methods courses accompanied with a beginning student teaching placement, and a full semester of student teaching in a setting selected with input by the student. The goal of weekly supervisory visits and seminars with student teachers is to provide a strong support base that contributes greatly to program quality.

Intern students complete the program over a period of two years at times convenient for their teaching schedule. They receive regular supervisory support as they develop teaching proficiencies and bring theory into practice.

After obtaining their preliminary credential, and in conjunction with their induction program, students may complete an optional Masters of Education degree with three classes designed to support their first years of teaching.

Institution/Program: California Lutheran University

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

California Lutheran University is an early adopter of AB2042 standards for professional teacher preparation. Beginning in the fall of 2002 candidates will enroll in a revised program for a preliminary Multiple or Single Subject credential. A cooperative induction program is being developed with Ventura County districts to support qualifying for a clear credential during the initial years of teaching. Numerous opportunities to learn about and then demonstrate competence in the Teacher Performance Expectations are included in the newly revised program. An increased use of technology modeled by committed faculty and imbedded throughout the coursework continues to be a hallmark of the program. A web-based portfolio is used as a repository of student artifacts and a stimulant for instructional conversations between faculty members and candidates. Opportunity to complete a program at a professional development school site is being developed.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Chapman University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School of Education at Chapman University provides credential and graduate degree programs at the main campus in the city of Orange, and through a system of satellite campuses, most of which are in geographic areas of California that traditionally have been underserved by other institutions of higher education. The mission of the Chapman University School of Education is to prepare inquiring, reflective, ethical and productive educators to work in public educational settings. John Dewey said, "Education is a process of living and not a preparation for future living." We believe in progressive ideals and their importance in preparing students to be responsible members of a democracy. We value the examination of the conditions of schools and the process of education. We expect our students to consider challenging questions, to make commitments, and to take socially responsible action. We expect our students to be change agents in the process of school improvement. We value not only the democratic access to knowledge, but also the critical examination of both social and political aspects of education. While we make an effort to learn from and make use of multiple theoretical paradigms, we believe that it is important to prepare educators to work with the children and youth of varied cultural backgrounds, economic levels, and value orientations which are found in contemporary America.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

There are a variety of factors that have contributed to the current level of success. One factor is the smaller class size (an average of 17 students) for all courses in the School of Education which promotes more personalized learning. Another factor is the curricular emphasis on reading and language acquisition for all learners. Program elements have been designed to reflect the state standards and contemporary research on a balanced approach to literacy. An essential program requirement is a supervised experience where each credential candidate tutors a troubled reader on a one-to-one basis. The talent and commitment of the School of Education faculty is another very important factor. Finally, we are able to attract to our programs talented candidates who often are more mature adults who are connected to their communities. In sum, the program is well-designed, faculty members are knowledgeable and effective, and credential candidates are capable.

Institution/Program: **Chapman University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The School of Education at Chapman University, has several new initiatives designed to ensure the quality and integrity of its programs. First, the university implemented new state approved programs for preparing candidates for Special Education credentials and a new Single Subject Credential program so that it now reflects the Cross-Cultural, Language and Academic Development (CLAD) requirements of the state of California. Second, a new "University College" has been formed to provide an added academic support for programs offered at the university's Academic Centers. Finally, a new emphasis at the graduate degree level in the area of reading has been implemented to allow students to pursue advanced study in this area.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Christian Heritage College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The purpose of the Department of Education is to provide courses which lead to California State Multiple and Single Subject Teaching Credentials and Association of Christian Schools International Teaching Certificates.

The overriding goal of the Department is to nurture and develop excellent Christian teachers who have an appropriate subject-matter foundation upon which has been built an understanding of student behavior, competence in teaching abilities, the ability to develop and encourage critical judgment and creativity, and a commitment to high ethical standards and Christian service.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

- 1) Pre-screening candidates for admission to the teacher education program based on personal interview, academic strength, prior successful experiences working with children or youth, and motivation to teach.
- 2) Personal attention for each teacher candidate during the teacher education program.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Claremont Graduate University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of CGU is to prepare a diverse group of outstanding individuals to assume leadership roles in the world-wide community through research, teaching and practice in selected fields. The CGU Teacher Education Internship Program believes that the best social justice program a nation can offer its children is a great education. A free and just democratic nation must have a well-educated, personally responsible citizenry who are given every opportunity to fulfill their purpose in life, including raising healthy families that make up and contribute to the community. This opportunity begins in the home and ultimately includes the classroom, the workplace and larger society. To provide such an education we need teachers deeply committed to academic excellence, equity, and integrity; who work diligently to develop the skills and attitudes necessary to teach every child as though they were teaching their own; who work closely with the parents of their students; and who use technology and other resources as a means to maximize achievement and opportunities. The integrity and character of great teachers prompts them to hold themselves accountable for doing the hard work it takes to make this vision a reality for all the students assigned to their classrooms. The 36 unit combined MA and Credential program prepares teachers to teach multiple or single subjects to culturally and linguistically diverse students. Over 50% of CGU intern teachers each year are from underrepresented groups and over 90% of our graduates are still in schools after five years compared to the state average of 50%.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The CGU Teacher Education Internship Program maintained its long standing commitment to preparing a diverse teaching force educated to address issues of linguistic, cultural and economic diversity. Additionally, a new literacy practicum was developed in response to RICA standards set by the California Commission on Teacher Credentialing. The practicum gives intern candidates practical experience working with beginning readers under the guidance of an experienced reading teacher. As a result of this improvement, our pass rate for the RICA exam was 100% this year.

Part A (continued):**Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The CGU Teacher Education Internship Program has undergone reorganization to make coursework during the fall and spring internship semesters more closely respond to the immediate needs of new teachers. Additionally, there is a closer link during the internship phase between the teaching and supervising faculty. The literacy practicum has also been expanded to include all K-12 interns to better prepare all our teachers to support literacy instruction at every grade level. Beginning this year, a family literacy component was also added to the literacy practicum modeling the development of possible relationships between parents, teachers and students. There is also increased emphasis on subject matter content by increasing attention to standards in coursework as well as preparation for subject matter exams when needed. Additionally, more restrictions have been placed on candidates who enter the program without having completed all subject matter requirements.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Concordia University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Concordia University with its rich heritage in teacher preparation is ideally positioned within the church, local community, and state to be a leader in teacher education. The School of Education serves a broad spectrum of future teachers. This population includes those intending to teach in California public schools as well as those students intending to serve in non-public non-sectarian or sectarian schools, particularly schools of the Lutheran Church - Missouri Synod. Therefore, all teacher preparation programs prepare students to serve the cultural and language diversities found in all settings.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Many features contributed to program excellence and effectiveness for teacher education candidates during 2000-2001.

The entire admission procedure from first contact through enrollment in courses is a very effective aspect of Concordia's teacher preparation programs. Students begin with a sense of being cared for and highly valued. The admission and advising staff exemplify the School of Education's very hands on personal attention philosophy. This continues as the students complete credential courses, placement procedures for student teaching, and finally student teaching.

All faculty of credential courses and supervisors of student teaching have significant experience teaching in K-12 settings. Faculty experience includes teaching in ELL settings, a newcomer school, head start programs, K-12 grade levels as well as serving as administrators in 100% minority schools, in urban and small town settings and in public as well as Christian schools. To add to the knowledge brought to the students by the faculty, Concordia regularly invites teachers from local schools to serve as adjuncts or to make a variety of presentations in courses in order to provide our students with the most current links to school improvement and curriculum development possible.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Many new features contributed to program excellence and effectiveness for teacher education candidates during 2000-2001.

Edu 201 Introduction to Teaching Careers was rewritten so that the foundation of the course is the California Standards for the Teaching Profession. This course sets the framework for the remainder of the professional preparation program as well as developing the understanding needed for becoming proficient in the teacher performance expectations. All field observations in this course focus the candidate on observing characteristics of the CSTP's.

The School of Education introduced a Master of Education program that included the teacher credential requirements, providing post baccalaureate candidates the opportunity to continue towards an M.Ed. concurrently or following the completion of credential requirements. A professional strength seen in even this short time is the number of students who are selecting this option and beginning their teaching career with enhanced skills in learning theory, classroom management, and literacy.

Other new initiatives include the addition of a single subject program in Science:Biology. Concordia offers state approved programs in Math, English and now Science:Biology. Currently under development are single subject programs in Physical Education and Social Sciences.

Also during the 2000-01 school year all professional preparation courses were revised to include technology components. The School of Education faculty is teaching as they expect future teachers to be taught, using technology as a delivery, retrieval, and management tool.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Dominican University of California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Dominican University of California has a long tradition of training teachers since 1924. The School of Education shares the Dominican tradition of teaching as a moral and ethical act. Its mission is to educate teachers who ground their practice in current educational theory, who work collaboratively, who exhibit sensitivity to culture and community, and who demonstrate continuous professional development.

Teacher candidates benefit from small class size, personalized attention, and a supportive learning community. Candidates receive outstanding mentoring from faculty and site supervisors who are experienced classroom teachers. Candidates complete school placements and school partnerships, beginning before the opening of the school year.

The School of Education has a long history of collaboration in the surrounding Bay Area counties. Local schools in the service area are comprised of children from diverse backgrounds in inner city, suburban, and rural settings. The professional preparation program reflects the commitment to multidisciplinary and multicultural education. The professional preparation program strives to provide the intellectual tools and insights that will enable candidates to live in and teach about a world of diversity. This program equips candidates to make a difference not just as teachers, but also as members of society. We are very proud of the excellent reputation enjoyed by teachers who receive their professional preparation at Dominican University of California.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Candidates in the full-time multiple and single subject teacher credential programs attend a seminar course with a small group of other teacher candidates throughout the program. When candidates are assigned field experiences in their professional preparation courses, they can share their experiences and with members in their seminar. The seminar instructors supervise candidates and remain as their advisor during student teaching. This close link allows for a close supportive relationship between candidates and professors.

A unique feature of the multiple subject program in San Rafael is the resident supervisor. Candidates doing student teaching not only have a university field supervisor and cooperating teacher but also have a resident supervisor that is an active on-site teacher trained to work with our teacher candidates. This person is a support provider for the student teacher.

The multiple subject and single subject programs in rural Ukiah begin with an early course in August that orients candidates to the teaching profession. Candidates then continue their program on Tuesday evenings and on weekends. This program services the needs of a vast community that does not have a college/university in its immediate geographical area.

The undergraduate Blended Liberal Studies Program has faculty from Arts and Sciences working closely with faculty in Education and teachers from local schools. Content and best practices are closely linked in the blended courses.

The Intern Program is growing in Solano County. The program is closely linked with surrounding schools. A collaborative relationship between Dominican University of California and local educators provide support for interns.

Institution/Program: Dominican University of California

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Dominican University of California received a \$900,000 Preparing Tomorrow's Teacher to use Technology (PT3 Grant). This grant is designed to train credential candidates in the use of technology in the classroom. E-camps that take place on weekends have been designed for credential candidates. These programs have been offered to students at all Dominican sites including San Rafael, Solano, and Ukiah. Dominican University of California faculty have attended workshops sponsored by the PT3 Grant and have begun to expand their use of technology modeling best practices for credential candidates.

A pre-intern program has been introduced for credential candidates that do not yet qualify for intern assignment.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Fresno Pacific University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Fresno Pacific Teacher Education program, centered in the heart of the great central valley, prepares teachers to meet the needs of all children. Racial, ethnic, socio-economic and language diversity characterize all schools used for field experiences. As a Christian, liberal arts university, Fresno Pacific values teaching as service. As one of many education programs in the Graduate School, the credential programs are dedicated to meeting the needs of individuals, viewing both education and learners wholistically, and to modeling learning in community. Candidates in the Fresno Pacific program are invited to consider teaching as a calling to service.

The preparation program is marked by coursework and field experience that integrates theory and practice. Students who complete their credential at Fresno Pacific become scholars, professionals, leaders and peacemakers. Fresno Pacific provides traditional, full-time programs and non-traditional Intern programs which lead to the multiple and single subject credentials with CLAD and BCLAD emphases.

In addition, Fresno Pacific offers a special education program which leads to the Level I credential. This program provides coursework which prepares candidates with the ability to plan, design, and implement effective instruction that meets the needs of students who experience mild/moderate/severe handicaps, as well as those students with physical and health impairments.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Fresno Pacific has been widely recognized in the central valley and beyond the valley for the outstanding quality of its teacher preparation program. Students report that they have been well served by the individualized, careful advising they receive from their advisors and professors. Caring, respectful relationships are at the heart of the credential program. This is particularly evident in the cohort model through which students develop lasting professional friendships with their professors and peers. Districts report that graduates of the Fresno Pacific program are well prepared to make a difference in the lives of the children they teach. The credential program is supported through numerous partnerships with local schools and districts.

Students report that the program is both academically rigorous and practical in terms of preparing for the classroom. Of particular note has been the strength of the reading and mathematics programs. Students document growth into teaching by preparing a teaching portfolio throughout their experience at Fresno Pacific. This portfolio experience provides candidates, professors and potential employers with a rich picture of their preparation for teaching. The Teaching Portfolio is aligned with the California Standards for the Teaching Profession. Both the regular credential programs and the special education programs emphasize honest and ethical practices based on a Christian perspective.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Fresno Pacific is pleased to offer numerous new programs that have enriched the quality of its core programs. Project VOICE, funded through a Title VII grant, supports bilingual classroom aides working in partner districts who are seeking a teaching credential by offering personal advising, tuition and book stipends and ten seminars per year. Another new program is our partnership with BTSA projects in the valley. Credential graduates report that their move from the university program to the classroom has been virtually seamless, due in part to this partnership. FPU has also developed a partnership with Visalia Unified School District to offer coursework leading to single, multiple subject and education specialist credentials in Visalia.

Nearly half of our candidates complete their professional program through our internship program. This program has developed agreements with many Central Valley school districts in both Pre-Intern and Intern programs and serves the needs of uncredentialed teachers completing their credentials at FPU. Recognizing the need for teachers to use technology effectively in their classrooms, the program has been innovative in infusing technology throughout coursework. Two teacher education classrooms on campus are designated as technology-enriched classrooms.

Since the integration of the new Level I special education credential developed under new CCTC standards and accredited in fall 1999, numerous changes leading to improved preparation have been implemented. One such change is a program titled "The Casa Experience", a weekend retreat that orients new students to the program and their faculty. In addition, the program has developed a special education testing and assessment library.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Holy Names College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Education Department at Holy Names College, historically and to the present day, has focused its attention on the preparation of dedicated educators for the urban schools of Oakland and its surrounding communities. The work of the educator has become critical in addressing the needs of an increasingly diverse population, the demands of life in a technologically changing society, and the changes created by radical shifts in societal organization.

The Department is committed to preparing qualified and committed teachers who are ready to meet the challenge. The Department strives to encourage and support potential teachers who might not otherwise have the personal or financial resources to pursue a teaching career. The courses are offered at times that accommodate most working adults. The Multiple and Single Subjects and Education Specialist credential programs seek to include teacher candidates of diverse backgrounds who reflect the composition of the community they serve; Multiple and Single subjects credentials are CLAD (Cross-cultural Learning and Development) emphasis. Most students have had previous careers, so they bring experiences from a variety of backgrounds that they can share with peers and their future students. Students are considered for admission based on multiple measures of their potential for teaching excellence.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The faculty of the Education Department is particularly suited to preparing teachers for urban classrooms. Full-time faculty members have had extensive experience in local urban schools. In addition to teaching the core courses in all programs, they serve as field supervisors, academic advisers, and mentors as well. Adjunct faculty members, who teach many of the curriculum courses, are outstanding educational leaders who work in city school systems. The Department's long history in the area as a premier teacher preparation program means that there are many outstanding mentors and supporters at school sites for graduates of the program, as well as for student teacher placements.

The Holy Names program includes candidates working full time in urban school districts with internship credentials and in some cases with emergency teaching permits. In those cases, the program requires a second supervised school placement, usually during the summer, where the candidate works within the classroom environment of a cooperating teacher, under supervision of a college supervisor.

Institution/Program: **Holy Names College**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Holy Names College has significantly revised its instructional technology capacity to meet the requirements for teachers to be able to use computers and other instructional technology to support and enhance instruction in schools. That enhancement includes hardware and software upgrades in two computer laboratories and our first, on-line, web-based course, Computers for Educators.

In November, 2001, Holy Names College was selected as an SB2042 Early Adopter, meaning that we would re-visit and revise our fully-accredited program to meet the new state standards, including incorporation of the Teaching Performance Expectations and the Teaching Performance Assessments.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Hope International University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Education Department enrolls approximately 100 students. The department exists to serve the mission of Hope International University by offering post-baccalaureate education "...to prepare competent professionals for servant leadership world-wide" in disciplines with potential for high societal impact. The Teacher Credential Programs are committed to Christian values in a non-sectarian setting and maintain a focus on applied scholarship. The substantial growth in enrollment in recent years has been mirrored by an increased number of partnerships with urban school districts. The diverse student population within those districts provides rich opportunities for CLAD credential candidates to recognize and appreciate the rewards of working in Southern California's classrooms.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Founded as a Bible College in 1928, the significant growth of the institution into Hope International University has not diminished its original commitment to preparing students for a lifetime of quality living and dedication to service. The accessibility of faculty, staff, and administration is one indication that the University community embraces the foundational concept of servant leadership. The Education Department faculty is comprised of current practitioners committed to academic excellence by providing research- based instruction and pedagogical models designed to prepare teachers to effectively serve the diverse student population found in California's classrooms. Students and graduates appreciate the staff's and faculty's "personal touch" and interest in their individual progress during the program. Clear communication, small class size, and frequent supervision during student teaching are examples of the commitment to service by staff and faculty. Evening and weekend classes are scheduled to meet the needs of graduate students who are currently employed full-time.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Interamerican College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

InterAmerican College, a non-profit institution of Higher Education, educates adult learners through non-traditional programs by bridging experience to bilingual learning for success in a pluralistic society. IAC offers undergraduate programs that form the basis for the academic preparation of future teachers.

The college's affordable tuition and evening courses attracts working adults. The majority of students are bilingual teacher aides who have worked in classrooms for many years. A second group of students consists of educated immigrants who are changing careers to become teachers.

The goal of the Education Department is to prepare competent, effective bilingual bicultural teachers who will implement change by addressing social issues in the community and in schools. At the undergraduate level, students are required to acquire competence in English and in Spanish. All students have made the commitment to work with low income, bilingual students. They want to ensure that every child receives a rigorous and quality education.

IAC offers CCTC approved subject matter preparation for elementary schools. The Committee on Accreditation approved IAC to prepare teachers in Multiple and Single Subject credentials with CLAD and BCLAD emphasis. The credential program offers courses at the post baccalaureate level.

Due to the proximity of San Diego to the Mexcian border, the student body represents lower socio economic groups, underrepresented groups, and English language learners. IAC's goal is to provide districts with competent bilingual bicultural teachers who reflect the bilingual bicultural children in the schools.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Credential courses are offered at the post-baccalaureate level. The program requires candidates to complete prerequisite course which will prepare them to teach English language learners, bilingual students, lower economic and culturally diverse students. These courses address content areas in history and culture of Latinos, civil rights, and educational equity. Candidates are required to visit local community based service organizations and interview local leaders. They attend lectures given by local civic, academic, and political leaders. All candidates must complete course work in Spanish, in teaching mathematics, and in instructing physical education.

In bilingual classes, students discuss issues in both English and Spanish. Instructors provide assistance in improving both oral and written competence in Spanish and English. An effective retention strategy for Latinos is the cohort. Candidates progress through the program with the same cohort of students. This supports IAC's value of the spirit of "familia." Students work and study in support groups. The college offers composition tutors to assist students in their English assignments. Candidates attend classes at night after working full time as an intern teachers, a teacher aide, or at other employment. The monthly schedule accommodates the many economic and personal pressures of returning adult students.

The curriculum is designed to prepare candidates to meet the California Student Teacher Expectations. In their course work, instructors identify the outcomes that are linked to the state frameworks, state content standards, and certification standards.

Institution/Program: **Interamerican College**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: John F. Kennedy University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Department of Education at John F. Kennedy University was established in 1989 for talented mature adults who demonstrate a commitment to teaching in large urban school districts that serve students and families from diverse cultural, language and socioeconomic backgrounds. We actively recruit candidates who are highly motivated and committed to teaching, especially candidates from underrepresented groups. Many of our graduates teach in low performing schools.

Our program stresses the importance of building classroom environments where diverse student opinions and backgrounds are respected. Our curriculum provides a strong focus on principles of multicultural education, multiple ways of knowing and learning, and cooperative learning.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The focus on standards based instruction and supervision in the program continues to strengthen the preparation of our candidates. The linking of theoretical learning to practice and providing ample opportunities for candidates to improve their practice during the preparation period gives them a firm grounding in content and pedagogy. The support of field supervisors further guides the candidates in reflecting and improving their practice.

This scaffolding of learning experience created for the candidates is evidenced in the structure and content of our multiple subjects reading program. They begin by learning reading theory and pedagogy. Extended learning opportunities are provided during the field placement seminars by guest lecturers who model explicit strategies for teaching reading to English Language Learners, emergent readers, and reading in content. The culminating learning experience in literacy is the lesson that the candidate designs and teaches while observed/coached by the university supervisor and cooperating teacher. This cycle of learning is completed during the quarter.

Institution/Program: **John F. Kennedy University**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Our work is presently focused on increasing the coherence and alignment of content and pedagogy to the program standards. We are continually working to strive for excellence.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **La Sierra University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission statement of the teacher preparation program at La Sierra University is as follows: the department seeks to empower students through a process of seeking, knowing, and serving. Students will study theoretical principles and pedagogical practices in an effort to gain professional, ethical, and caring practices.

This mission statement is based on the university mission statement, which is: To seek truth, enlarging human understanding through scholarship: To know ourselves, broadly educating the whole student: To serve others, contributing to the good of the global community.

The department program is undergirded with the basic philosophy that all persons learn from their surroundings and that learning and schooling are not synonymous. The department has two major purposes. The first is the development of competent, professional teachers who are prepared to serve effectively in public schools and in private schools. The second major purpose is to provide opportunities for educators seeking advanced degrees who wish to hone their teaching skills.

The department desires to help students accept and practice those ethical and moral concepts which are approved by the enlightened conscience of humankind, to develop tolerance for the rights and opinions of others, to be considerate of the sensitivities of those from diverse ethnic, cultural, and socioeconomic groups, and to cultivate the ideal of service to humanity.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

La Sierra University faculty are committed to continual improvement of departmental programs, teaching, and research. From faculty study and research, the programs in the department have been enriched through the incorporation of multiple intelligences theory and practice in methods courses. Faculty research on the brain and implications for education have resulted in the development of course work on the brain and learning as well as the incorporation of brain compatible learning theory into methods coursework.

The department seeks to educate and develop professional teachers who have the appreciation, skills, and teaching strategies necessary to create a warm, loving, caring classroom climate where effective learning takes place. Faculty believe that professionalism and Christian principles are not mutually exclusive.

The department seeks to develop in its students the ability to do creative and independent thinking. The students should acquire an attitude of open-minded consideration of controversial issues and should develop a continuing intellectual curiosity that will expand throughout their post-college years.

The department endeavors to provide its students with an understanding of the privileges of citizenship, a sincere love of country, and a willingness to cooperate in bringing about improvements in the social order through education whether public or nonpublic.

The teacher preparation program is predicated upon a belief in the uniqueness and worth of each individual and of the importance of the systematic development of the whole person. The students in the department, it is hoped, will develop a positive self-image and will strive to reach the highest possible attainments.

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The most recent initiatives of the teacher preparation program at La Sierra University has been in the area of the integration of instructional technology with the professional preparation program. Every School of Education classroom is currently Internet connected and the first steps have been made to have the entire School of Education accessible to wireless Internet.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Loyola Marymount University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

In accordance with the Mission of Loyola Marymount University, the faculty, staff and students of the School of Education strive to work collaboratively in a student-centered environment to be professionals who are empowered to: value and respect all individuals, promote cultural responsiveness and social justice, integrate theory and practice, develop moral, intellectual and responsible leaders, collaborate and share leadership across communities, and integrate technology in teaching and learning.

Candidates, both undergraduate and graduate students, in the teacher preparation program are representative of the diversity in the Los Angeles area. These candidates teach in both public and private schools in neighborhoods that serve culturally, linguistically, and economically diverse students. Our undergraduate candidates pursue a teaching credential and Bachelor's degree at the same time.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

- * Cultural Diversity Experience: Teacher candidates in the Loyola Marymount University program complete their credential equipped to teach students of diverse backgrounds.
- * Highly Qualified Faculty: Teacher candidates interact with highly qualified faculty who are committed to teaching and research. Schools districts in California recruit students from the program.
- * Low Student-Professor Ratio: Students receive individual attention and benefit from small class sizes.
- * Integrated Use of Technology: The students have access to classrooms that are equipped with the latest technology, which allows them to experience teaching and learning with technology.
- * Supervised Field Experiences: Candidates who are graduate students participate in supervised field experiences at the beginning of the program.
- * Scholarships: Loyola Marymount University provides scholarships that allow greater access for all students.

Institution/Program: **Loyola Marymount University**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The faculty in the School of Education engages in ongoing dialogues regarding the effectiveness of the program. The faculty meets on a regular basis and is preparing to redesign the program to meet the new credential requirements of the California Commission on Teacher Credentialing. The faculty is writing grants to continue integrating technology into teaching and learning. Furthermore, they participate in scholarly activities (such as presenting at conferences, writing articles, or conducting professional development workshops) and work closely with the California Commission on Teacher Credentialing.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Mills College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teachers for Tomorrow's Schools program at Mills has a reform and change orientation. We believe that schools are not "working" as well as they ought to be and that we must work toward equity and excellent outcomes for all students. We want to provide our students with ample opportunity to develop the knowledge, skills, and dispositions that will facilitate their being able to participate in reform activities when they assume their teaching positions in schools. Our location in a major urban setting provides more than adequate impetus for the social justice agenda that guides the work we do.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The curriculum in the Teachers for Tomorrow's Schools program is centered, by design, on six core program principles. Guided by the overarching goals of equity and social justice, the work is organized around these principles which permeate every aspect of the program from coursework, to fieldwork, to the general culture of the Mills Education community. They are:

- o Teaching is inherently moral work that must be guided by an ethic of care.
- o Teaching is reflective work that requires active and systematic inquiry for learning throughout the teacher's career.
- o Learning is developmental and constructivist and thus teaching is best guided by those conceptions of how learners come to know.
- o Teaching is connected in deep and important ways to subject matter. A central goal of the work is to prepare students to acquire, understand, and construct subject matter knowledge.
- o Teaching is collegial in that both teachers and students learn in the contexts of relationships that matter. Colleagues and community are central.
- o Teaching is inherently political in that by definition, it is concerned with matters of change that are neither neutral nor inconsequential.

In addition to the principles, there was an integrated focus on assessment issues during 2000-2001.

Institution/Program: Mills College

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

This year has seen the addition of state of the art lap top computers and a building wired for access from anywhere (inside or out). Faculty have jumped at the opportunity to use this flexible technology in a variety of ways in their course work.

2001-2002 also saw the first year of the Teacher Institute for Urban Fieldwork at Mills College. This institute brings together experienced and inexperienced cooperating teachers with our faculty to explore issues of mentoring. This exploration focuses on inquiry, equity and building leadership capacity in an effort to close the achievement gap in classrooms. Each participant works on an inquiry-based research project about his or her own school site and classroom.

In November, all students in the Teachers for Tomorrow's Schools program visited the Museum of Tolerance in Los Angeles and took part in their Tools for Tolerance program. This experience fit into a general focus this year of exploring ourselves as people to better know who we are as teachers.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Mount Saint Mary's College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Since 1925 Mount St. Mary's College (MSMC) has prepared caring and skilled teachers for urban schools and diverse populations. U.S. News&World Report has recognized MSMC as having the most diverse student population among universities in the West, a near-mirror reflection of the population of the Los Angeles area. Placing emphasis on student learning, the Education Department welcomes the challenge and enrichment that a diverse population offers. Through programs like the Center for Cultural Fluency and its Teacher Centers in urban school districts, the College provides models and guidance for meeting the specific learning needs of the students of Los Angeles.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Founded by the Sisters of St. Joseph, with a 350-year commitment to social justice, the college is grounded in Catholic values and provides a transformative liberal arts education. Education Department faculty, exemplary teachers themselves, are committed to the values of service, leadership, ethics and inclusiveness. The teacher credential programs are designed to prepare teachers who are effective in working with K-12 students from varying backgrounds, and who thoroughly integrate issues of race, culture, class and gender into all classes. The teacher preparation programs at MSMC deepen students' knowledge of pedagogical principles through application in urban classrooms and in-depth reflection during class meetings.

Institution/Program: Mount Saint Mary's College

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In Spring 2001 the Education Department faculty began the process of reconceptualizing the Teacher Preparation Programs to align them with the new California SB 2042 Standards for Professional Teacher Preparation. The new programs will be reviewed by the California Commission on Teacher Credentialing in Spring 2002 and implemented in Fall 2002. The major program changes are (1) increased collaboration between practitioners in the field and the college to explicitly link candidates' fieldwork experiences with teacher performance expectations and (2) intensifying the focus of course assignments and fieldwork to prepare teachers to examine student learning and identify instructional practices that will support students' academic progress.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: National Hispanic University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The goal of the Department of Teacher Education at The National Hispanic University (NHU) is to prepare effective teachers for California's culturally and linguistically diverse classrooms. We are committed to serving the needs of students, many of whom come from language backgrounds other than English, in our local school districts. Fully integrated into the program are philosophies and strategies for teaching in a multicultural classroom that enhance learning and educational equity for English language learners.

Many of our local school districts face critical teacher shortages. As a result of the critical need in our local school districts, we have many credential candidates who are currently teaching in the elementary school classroom as either Intern teachers or as teachers who hold emergency permits. Therefore, we collaborate with the Alum Rock Union Elementary School District and county-wide consortiums from San Mateo County Office of Education and the Santa Clara County Office of Education to offer Intern programs that support beginning teachers through a comprehensive professional teacher preparation model. We believe that collaboration with local school districts is essential in order to address the critical need for qualified and effective classroom teachers.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

At NHU, the focus of the program is to provide strategies to help teachers address issues related to teaching students of diverse language and cultural backgrounds. As a result, one of the outstanding features in the 1999-2000 programs was the integration of theoretical understanding with practical methodological approaches that teachers are able to use in their classrooms immediately. The attention to practicality in the real-world classroom and the high level of support they receive in the university classroom from their instructors and their peers serve to empower new teachers and, above all, contribute to their excellence and effectiveness in the elementary school classroom.

Institution/Program: **National Hispanic University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

New initiatives NHU engaged in during the 2000-2001 year included:

1. Revising and upgrading teacher education to include courses in Effective Teaching and SDAIE/ELD Methods and Instruction to meet identified needs of classroom teachers.
 2. Procedures for systematic selection, orientation and evaluation of master teachers.
 3. Identification of full-time faculty in order to provide better advisement and continuity in the program.
- Implementation of a final assessment process consistent with CTC standards including exit interviews.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **National University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the School of Education at National University is to prepare educators as lifelong learners, reflective practitioners, and ethical professionals. The mission is accomplished in a learning community through professional preparation programs, partnerships with schools, and educational research.

In its strategic plan, NU2005, the University articulated a commitment to be the career-long learning partner of California's K-12 teachers with the goal of improving public schools and developing solutions to the problems of low student achievement. NU is geographically dispersed throughout California, with administrative offices located in San Diego County. Degree and credential programs are delivered in San Diego and at eleven Academic Centers throughout the state. The average age of the NU credential student is 34. Of the most recent graduating class, 42% were students of color and 57% were women.

The Department of Teacher Education offers preparation programs for the Multiple Subject (elementary) and Single Subject (secondary) Preliminary and Professional Clear Teaching Credentials, including bilingual emphasis (Spanish) and university internship options in collaboration with selected school districts. The Special Education program offers the Preliminary Level I and Professional Level II Education Specialist Credential program with an emphasis in either mild/moderate or moderate/severe disabilities, along with an internship option currently offered in collaboration with San Diego Unified School District.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

School of Education faculty focuses on assisting credential candidates in the development of a balanced relationship between disciplinary knowledge and educational practice. Given the critical shortage of fully qualified teachers, many of NU's credential candidates are working on emergency permits while completing their program. To ensure their success, alignment of coursework and supervised field experience with K-12 content standards and the California Standards for the Teaching Profession is a high priority. The programs are comprised of foundations and methods courses giving specific attention to the needs of English language learners followed by student teaching placements. Internship students receive weekly assistance from both a university supervisor and district support provider. Most candidates choose to complete additional coursework to earn an optional Masters degree with their credential.

NU's unique one-course-per-month format promotes greater interest and motivation through a concentrated, more focused approach. In keeping with its commitment to alternative delivery systems, NU offers many credential courses in an online format. Online learning has been augmented by an expanded digital/ebook library collection, and video streaming to ensure access to best practices and supplemental learning materials.

Institution/Program: National University

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

As an early adopter of the new state Standards for the Multiple and Single Subject Professional Teacher Preparation Programs, NU faculty have been revising credential coursework and field experiences to more closely align with K-12 content standards, the California Standards for the Teaching Profession, and the new state adopted "Teaching Performance Expectations" for professional preparation programs in Multiple and Single Subjects. Courses and field experiences are being revised to prepare candidates for the new state Teaching Performance Assessment to be required in the near future.

Video streaming is being incorporated into Masters and credential courses. This application will allow students and faculty in on-line and on-ground classes to instantly access dynamic supplemental learning material from desktop or laptop computers. NU is also actively engaged in Preparing Tomorrow's Teachers for Technology (PT3 federal grant) supporting the development of an intensive technology rich pre-service program to be offered online in collaboration with school districts in San Diego County along with partner technology organizations and a local museum. Students will spend time in classrooms applying online course content focusing on science and math, using resources from the consortium partners.

In response to the teacher shortage, NU is planning to dramatically expand internship programs for elementary, secondary, and special education teachers in collaboration with school districts and county offices of education across the state.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **New College of California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

New College of California is dedicated to a vision of social justice and human empowerment. The college has endorsed diversity and multiculturalism from its inception. Its programs emphasize innovative and interactive pedagogy and the vital importance of education to a democratic and just society. Undergraduates are encouraged to put their social principles into practice in their working lives.

We believe that it is unlikely that there will be any real, deep or lasting changes in public schooling until the nature of teacher education itself begins to change radically. New College had the opportunity when it began its CLAD & BCLAD teacher education programs, to start from the beginning, rather than to reform or cosmetically reorganize an already existing program.

Teacher education candidates gain skills and reflective ability to put theory into practice and to link the classroom with the social world while developing a personal teaching style. They are guided by a team of multicultural scholars, educational practitioners and community activists during their work in public schools.

We believe that the philosophical understandings and accompanying strategies that teachers will need to address the multiple educational challenges ahead can best be acquired through an in depth teacher preparation program that will build respect for teachers as professionals capable of beginning and continuing the process of change in our schools and society.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

There are six distinguishing features of the New College Teacher Education Program.

1. Teachers learn to humanize the teaching environment and develop their classrooms as "communities of learners" (McCaleb, 1994).
2. Teacher candidates participate in our innovative Family Literacy Center to gain experience necessary to develop curricula that include and affirm family aspirations and cultural values.
3. Music and the arts are integrated into many classes so that future teachers may appeal to the diverse learning modes of children and teach the whole child.
4. The concept of teacher as researcher is developed through participatory/action research to enable future teachers to know and respect the communities in which they teach.
5. Candidates come to understand the social and political context of the institution of schooling.
6. Students are encouraged to think about critical, environmental and global issues and to incorporate them into their teaching.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Notre Dame de Namur University (formerly the College of Notre Dame)**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Institutional Report

Notre Dame de Namur University currently offers four credential programs:

Multiple Subjects/CLAD

Single Subject/CLAD

Education Specialist (Mild-Moderate, Moderate-Severe)

Administrative Services, Tier I

Institutional Mission

Notre Dame de Namur University School of Education & Leadership was selected this year to pilot California's new credential model (SB 2042). The design of the new Multiple Subject and Single Subject programs was aligned closely with the University's Mission Statement and core values to ensure that candidates enjoy multiple opportunities to reflect on and experience excellence in their coursework and field experience. The concurrent program design continues to be a unique feature of the NDNU Multiple Subject and Single Subject programs. In keeping with Notre Dame de Namur University's Mission Statement, we commit ourselves to building a student-centered environment which honors the richness of diversity in the human population. We value each student as a person, respect each student as a learner, and appreciate each student as a rich resource for other learners. As teachers, we ensure the right to equal access to challenging learning opportunities. We recognize that technology will play an increasing role as a tool for expression, research and storage of information in the development of future teachers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

At Notre Dame de Namur University, we highlight the centrality of the social dimension of learning. Together with our candidates we build a collaborative community of learners. In turn our candidates are encouraged to build similar collaborative communities in their classes, between home and school, between school and community, and with their colleagues.

Program qualities include:

- * Outstanding service to students, from the first inquiry through the interview process, the responsive advising, and the personal supervision in the field.
- * Two semesters of student teaching at two different levels resulting in candidates who are well prepared to take on full-time classroom responsibilities.
- * Concurrent program blends theory and practice, making all coursework relevant to the real world of experience in the classroom.
- * Job Fair prior to graduation maximizes exposure to multiple districts, all of whom send representatives to interview prospective candidates.

Institution/Program: **Notre Dame de Namur University (formerly the College of Notre Dame)**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

New initiatives to improve program effectiveness planned for 2002-2003 are as follows:

1. Develop new School of Education & Leadership to integrate undergraduate and graduate programs.
2. Continue to develop collaborative relationships with school districts, e.g., professional development schools, sharing of technology resources.
3. Explore technology applications within credential programs using ED Gate "Copernicus" website for lesson plans that link with the state standards for the teaching profession
4. Implement new California Reading Certificate and Reading Specialist Master's programs.
5. Serve the community by further development of the School of Education & Leadership's role as a Beginning Teacher Support & Assessment (BTSA) partner , e.g. offering workshops, classes.
6. Continue technology training to integrate technology into all courses in all credential programs, with extra training provided by the Federal Catalyst Grant (StarTec) designed for this purpose.
7. Develop the new SB 2042 Multiple Subject and Single Subject credential programs as the pilot project progresses.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Nova Southeastern University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Fischler Graduate School of Education and Human Services at Nova Southeastern University (FGSEHS) articulates the University's commitment to education in its mission statement, goals, and policies. Principally, FGSEHS:

- Is dedicated to the training and continuing support of teachers, administrators, trainers, and others working in education.

- Hopes to fulfill its commitment to the advancement of education by serving as a resource for practitioners and by supporting them in their self-development.

- Offers alternative delivery systems for education that are adaptable to practitioners work schedules and locations.

- Reflects and anticipates the needs of practitioners to become more effective in their current positions, to fulfill emerging roles in the education field and to be ready to accept changes and responsibilities within their own teaching and community organizations.

The Nova Southeastern University California Credential Program (NSUCCP) mission statement is to prepare outstanding teachers who will perform effectively in the current professional climate of diversity and restructuring. A designated goal of NSU's program is to provide students with the necessary skills to successfully teach culturally, ethnically, linguistically, and socio-economically diverse students in all settings.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The program is delivered on-site, live, to cohorts of candidates incorporating contemporary electronic technology. It is designed to combine courses into integrated and comprehensive modules. Instructional delivery follows the best practices of adult learning and systems thinking. Emphasis is placed on active learning and on identifying and solving real work-related challenges. Through the interactions of mentors, faculty members, and field supervisors, candidates experience a comprehensive study of current educational practices and behaviors. Upon successful completion of the program, candidates will have met the requirements for a Master of Science Degree with a specialization in Elementary Education along with their Multiple Subject Credential. The Cross-Cultural and Academic Development (CLAD) competencies are fully embedded into the program and afford all graduates the opportunities to meet the unique educational needs of students who are English Language Learners. The University has established partnerships with local school districts, which contribute to the overall quality of course instruction and on-going related field experiences. In addition, these relationships provide the candidates opportunities to participate in supervised student teaching experiences.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Occidental College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

OUR MISSION: TO PREPARE LEADERS IN EDUCATION . . . LEADERS IN LIFE

The Department of Education at Occidental College has two major goals: (1) preparing educational leaders by offering a rigorous and thorough professional preparation program for a select number of prospective teachers; and (2) developing future parent, citizen, business or professional leaders who understand contemporary society and education and who exercise essential personal or group leadership skills. Both goals require a thoughtful, reflective leader who is knowledgeable of and sensitive to the diverse needs of students in our public schools and adults in our increasingly more global American society. The greater Los Angeles urban metropolis, with its vast human and institutional resources and rich cross-cultural diversity, greatly enhances the learning of students with either goal. Occidental College offers two teaching credential programs - a Multiple Subject Professional Clear Program with CLAD Authorization and a Single Subject Professional Clear Program with CLAD Authorization.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The factors that have contributed to the excellence of the Educational Leaders Program at Occidental College include:

1. The cohort group of less than thirty candidates provided the opportunity for each to receive individualized instruction from their college supervisors in the student teaching experience and close collaboration with peers in their coursework.
2. Consistent, ongoing program evaluation which included feedback from students, master teachers, program graduates who are now teaching, principals of graduates of the program and other community members.
3. Assessment through a portfolio format which requires demonstrated knowledge and application of the California Standards for the Teaching Profession.
4. Consistent, ongoing collaboration with local schools which has enabled us to develop a resource list of highly successful classroom teachers who serve as classroom supervisors for our student teachers.
5. Emphasis on group development with strategies that are modeled in all Education classes and practiced by the candidates in their student teaching experience.
6. Development of cross-cultural sensitivity and pedagogy that encourages inclusion in all planning and teaching.
7. A systems view of education is inherent in the coursework - enabling the candidates to begin teaching with an understanding of the factors which influence education and which affect their role as teachers from a global perspective of education.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pacific Oaks College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teacher Education Program is embedded within a college-wide context that values social justice, respect for diversity, and the uniqueness of each individual. The shared vision for Teacher Education is expressed in the Mission Statement:

The mission of the Teacher Education Program at Pacific Oaks College is to prepare professional educators who understand diversity, are grounded in human development, and value children.

We believe that

- awareness of diversity is integral to an educational process in which each individual is valued for their own identity, culture, language, and ability, and where discrimination against others is identified and challenged;

- teachers as well as students must be involved in meaningful learning experiences characterized by inquiry, reflection, and support; courses must model learning environments that take current knowledge about human development into account;

- to best serve children in public or private schools, teachers must learn to integrate constructivist approaches, effective standards-based instruction, and technology within a challenging and interesting curriculum.

Students in the Teacher Education Program are non-traditional mature learners who are balancing their academic pursuits with work and families. Many are from underrepresented ethnically and racially diverse communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

There are two qualities that contribute to our program's excellence. One is that it is integrated with the Human Development Program, so candidates take courses in Human Development before they begin Teacher Education core courses (or, in the case of the Intern Program, the Human Development courses are blended throughout the program). Candidates may also earn a Bachelors or Masters degree while they are completing their credential requirements. This means that our candidates emerge with a good understanding of child development and learning as a foundation for their teaching.

Another quality that sets us apart is that our program is designed to help candidates develop a constructivist perspective and, simultaneously, a commitment to state frameworks and standards for effective instruction. We feel this is a unique approach, one that keeps real learning and inquiry at the heart of what goes on in classrooms. Teachers who come from our program are dedicated learners themselves, and have strong ideas about how to help children follow their questions as well as meet high standards for learning. In this way, the program reflects the mission of the Teacher Education Program.

Institution/Program: **Pacific Oaks College**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Teacher Education Program is committed to preparing teachers to teach and advocate for students with special needs. Therefore, we have enhanced our Education Specialist Credential in Mild/Moderate and added five additional courses to the credential program. Effective fall 2001, the Education Specialist Credential in Moderate/Severe and Early Childhood were withdrawn and placed on a development track.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pacific Union College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Pacific Union College is a Christian liberal arts college whose mission is to prepare students for fellowship with God and service to to humanity. Its student-to-faculty ratio is 12-1, and for eight straight years, U.S News & World Report has ranked PUC as the top comprehensive college in California.

PUC is accredited by the Seventh-day Adventist church and the State of California to recommend individuals for multiple and single subject teaching credentials. The CLAD emphasis is also approved for both the multiple and single subject credentials.

The purpose of the Teacher Credential Program is to develop Christian teachers who have the skills and teaching strategies necessary to create a rigorous, stimulating, and caring classroom where learning takes place, and candidates who demonstrate the following:

*Tolerance and sensitivity to the rights and opinions of others, especially those from diverse ethnic, religious, cultural, and socio-economic groups.

*Appreciation for the uniqueness and worth of each individual and the importance of the systematic development of the whole person, including the intellectual, spiritual, social, and physical.

*Skill in classroom teaching and management techniques as demonstrated by significant progress toward the achievement of the Professional Competencies.

*Subject matter proficiency as demonstrated by academic performance and a dedication to excellence.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

*Faculty members have been successful teachers, principals, and superintendents and maintain K-12 state certification. They are regularly involved in collaboration with local schools and consult for the local community.

*Students attend professional meetings and conventions alongside their professors. Master's degree candidates join a professional organization and attend the annual California Reading Association Convention.

*All multiple subject credential candidates spend four weeks in an autumn multigrade placement during their program. This prepares them for the unique challenges of beginning a new school year, of teaching three or more grade levels at once, and of teaching in a rural community.

*Students begin working concurrently on subject matter and professional coursework as freshmen. They quickly engage in fieldwork, completing assignments with experiences in different school cultures and grade levels before beginning full-time student teaching.

*Many students at PUC choose to take a year away from their coursework and serve as student missionaries abroad, usually in a teaching capacity. Some students choose to study abroad for a year to become fluent in a second language.

*Of all teaching candidates prepared at PUC from 1995-2000, the retention in the teaching profession is 82 percent.

Institution/Program: **Pacific Union College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

*The Education Department and the Early Childhood Programs began planning to merge into one department with the intent to provide a seamless program for students desiring a profession working with children at all levels: infants, preschool, K-12.

*The department increased the number of partnerships with K-12 public districts and schools including the Napa County BTSA program and the federal 21st Century Community Learning Center program.

*The first cohort of students enrolled in the Napa Valley Resource Center which provides for adults with full-time employment to pursue multiple subject teaching credentials in an evening program.

*The College co-sponsored the William Glasser Institute seminars which trains educators in building "Quality Schools."

*The Education Department now houses the Liberal Studies degree and the College Success Skills course.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Patten College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Patten is a private, coeducational, interdenominational Christian College located within the culturally rich area of the Fruitvale District in East Oakland, and on the undergraduate level is dedicated to providing a Liberal Arts education with a strong biblical studies background. The mission of the college is to provide an excellent education on the undergraduate and graduate level for motivated and committed students from a broad diversity of ethnic, geographic, and socio-economic backgrounds. The institution also endeavors to inspire students to serve their communities and live as morally responsible individuals in their chosen field of life's work. In line with the broader Patten College goals, and consistent with the guidelines and policies of the California Commission on Teacher Credentialing and the Western Association of Schools and Colleges, the Multiple Subject Credential Program prepares teachers who are striving for academic excellence, who have the ability to effectively analyze their teaching practices, and who will continue to develop professionally throughout their teaching career. The Education Division Faculty are selected on the basis of having a strong academic background, possessing appropriate higher education degrees, and showing evidence of having considerable practical experience in the classroom, bringing forth a balance between theory and practical application within the classroom setting. This program offers a highly multicultural curriculum incorporating instructionally proven effective teaching strategies, enabling new teachers to meet the myriad of challenges facing them.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The multiple subject teaching credential programs at Patten are specialized postbaccalaureate programs for those who wish to teach in a self-contained classroom in public and private elementary and middle schools, and are designed to include the requirements of the CCTC and the special emphases of Patten College, while accommodating differences and interests of individual teacher candidates. The programs incorporate a balance of educational course work with hands-on field experiences and student teaching in the schools. In keeping with the broader goals of the College, these programs seek to develop in students the ability to integrate educational theories and practices and attain high standards in a successful career with emphasis on inner-city teaching;

acquiring knowledge, skills, technology and practices that are crucial in delivering high quality instruction; maintain sensitivity to students of different backgrounds, and with different special needs, promoting a classroom environment for a diverse student population; providing challenging instruction to facilitate students' development;

· Utilize a variety of assessment strategies to evaluate students' growth and apply appropriate teaching interventions; establish between school, family, and community a climate of mutual respect. The Patten programs have received outstanding commendations. Their guidance, assistance and feedback for student teachers were described as exemplary by the CCTC Committee on Accreditation. Another strength noted is the collaboration noted with site administrators and School District personnel. Patten College's curricular and instructional planning skills and the academic level of teacher candidate work has been cited as excellent.

Institution/Program: **Patten College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Constant upgrading in Patten's technology status, expectations, and offerings to the students, and faculty over the past three years have proven to be a real asset to the teacher education programs. The MultiMedia Lab is operating with expanded hours and is now available to the students on a near full-time basis, staffed with a technician. Upgrading in the lab has been constant in both the hardware and software areas. In striving toward greater technology integration in the programs and in the classroom, the faculty has attended web-page development workshops and the technology instructor for the Credential programs, attended a conference on strategies which may be used to make technology more availability to the physically challenged. The Education office computers have now been equipped with CD writer drives and the students and faculty may now email their files and assignments to the school to be put onto CD for retention, review or audit as necessary. Seven of the faculty recently completed the CFAAST Program along with School District personnel in a concerted effort toward streamlining on-site support systems for student teachers and interns, while bringing about a greater degree of collaboration and more effective communication. College Supervisors are now being assigned to the newer interns prior to their enrolled practicum period. We feel that increased support at this time should go far in helping to retain these classroom teachers in the urban areas after credentialing.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pepperdine University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Pepperdine has enjoyed a long history of preparing teachers and other educational leaders for our nation's schools. This commitment to education reflects the mission of the university which is: "Pepperdine is a Christian university committed to the highest standards of academic excellence and Christian values, where students are strengthened for lives of purpose, service, and leadership". Each member of the University faculty exemplifies Christian values in daily teaching.

Pepperdine offers an undergraduate program at Seaver College in Malibu and a graduate program at four education centers: Westlake Village, Encino, West Los Angeles, and Orange County. Pepperdine programs offer the preliminary and professional clear teaching credentials for multiple subject and single subject instruction, with an emphasis in Cross-Cultural, Language and Academic Development (CLAD).

The Seaver undergraduate teacher education program information website is:

<http://www.arachnid.pepperdine.edu/humteachered/academicprograms.htm>

The Graduate School of Education and Psychology teacher education program information website is:

<http://gsep.pepperdine.edu/PETPrep/>

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Located in Southern California, Pepperdine's candidates study and teach in one of the most culturally and linguistically diverse locations in the United States. The university specifically supports the reading and language arts program by providing small class sizes and close mentoring of students by faculty who are models of caring and nurturing teachers. Students are enrolled in a practicum experience, which contributes to their success in methods and reading instruction competency assessment. Reading faculty are available to mentor students.

In March 2000, Pepperdine University's credential programs received "full accreditation" from the California Commission on Teacher Credentialing with no stipulations for modifications. This substantiates the excellence of the teacher education programs at Pepperdine University.

In October 2000, the Western Accreditation for Schools and Colleges (WASC) completed an accreditation visit for Pepperdine University. In February 2001, the final report gave Pepperdine University the highest level of accreditation, which is a ten-year accreditation.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In August 1999, Pepperdine received two grants from the federal government as part of the "Preparing Tomorrow's Teachers to Use Technology" program. As part of this these grant programs, Pepperdine received funds to create a model for infusing technology throughout the entire teacher preparation program. Beginning in Fall 2000, the courses included elements that require the personal use of technology by teacher credential candidates and help them learn about the possible uses of technology in teaching practice. A technology consultant oversees the creation and implementation of a technology rich classroom/multi-media resource center. The program emphasis is on preparing teachers to be content experts in knowledge and innovative pedagogical strategies.

The undergraduate integrated program has state approved subject-matter multiple-subject and single-subject programs. The new SB2042 "Standards of Program Quality for Subject Matter for the Multiple Subject Teaching Credential" and Pepperdine will submit an institutional response to these standards in February 2003.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Point Loma Nazarene University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teacher and Graduate Education Programs offer selected credential and degree programs of academic rigor in an environment of vital Christianity in the Wesleyan tradition. Our commitment is to prepare thoughtful, culturally sensitive, scholarly professional educators who utilize the latest research and exemplary methods that ensure learning and achievement. The faculty is committed to equipping students to become influential moral and ethical leaders in a highly competitive, diverse, and ever-changing society.

The San Diego campus primarily serves undergraduate students who complete their teaching credential at or near the same time as their BA. A majority of the students in Pasadena and Bakersfield are already under contract and are perfecting the art and craft of teaching while in the classroom.

We intend to educate each student who comes to us to view their career as a moral and ethical calling to become leaders of tomorrow. We want to sensitize our students to work effectively with students from diverse backgrounds. We believe that academic rigor for future educators is imperative. Our faculty recognizes the importance of staying current and in the forefront of educational practices that are based on sound research. We teach our students to view not just each child, but also each parent, staff, faculty member and community member as a special human being of great worth. We ask our students to look beyond their respective classrooms to their role as community members and work to bring about the necessary changes so that our society truly lives out its rhetoric that "All...are created equal."

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Candidates in our program represent a variety of backgrounds and current experiences that call for individualized attention as well as flexible program design. We believe that our ability to structure our program for each location's particular candidates is a program strength, as is our attention to each candidate.

In San Diego, the Department of Teacher Education articulates with 14 other academic departments in the University regarding subject matter preparation of single subject and multiple subject teacher candidates. Teacher education courses are sequenced so that candidates are initially educated from a global perspective of education. Then, the focus shifts toward methodologies, and the application and practice of theory and research. All candidates are required to be in classrooms for approximately 85 hours of documented and evaluated observation and participation prior to student teaching.

In Pasadena and Bakersfield, all candidates for teaching credentials have already completed their BA. A majority of the candidates are under contract with public school districts. These candidates bring an urgent need for information and guidance in their practice. Alongside the coursework, supervisors help candidates transfer theory into reality in their K-12 classrooms.

We believe that relationships do precede learning and we encourage all professors to act, not only as instructors, but also as mentors to our students. All full time and adjunct faculty have had school site and/or district office experience. Positive feedback from students and site administrators confirm our belief that students feel they are known and well advised by faculty in their career development.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

During 2000-2001 the Arcadia and Bakersfield locations undertook significant collaboration with surrounding districts in order to design pre-intern and intern programs. These partnerships have helped provide more in-class support for teachers who are not yet fully credentialed.

In order to help pre-intern candidates with the subject matter competency examinations, Arcadia and Bakersfield worked with subject matter professors to plan and carry out study sessions designed for one content area at a time. In addition, candidates are given guidance on test taking strategies and procedures. Pre-intern candidates who have completed these sessions have been very successful at passing the subject matter exams.

San Diego Teacher Education faculty undertook a BTSA partnership with a local school district. Full time faculty were assigned load credit to be support providers for first and second year teachers. This partnership enriched both the beginning teachers and the faculty. New teachers were offered graduate credit for their participation in the program. Faculty were rewarded with watching professional educators grow and had examples of current life as a public school teacher to share with candidates.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Saint Mary's College of California

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Our purpose is to prepare high performing professionals, who can act as agents for change in their communities. The programs of the School of Education at Saint Mary's College offer a blend of theory, research, and practice, presented in an environment that is inquiry-focused and humanistic. During their studies candidates examine their beliefs about learning in the context of educational research and theories about best practice. To develop the field-based competencies necessary to support high quality teaching, candidates work with K - 12 students in both public and private schools, and in urban and suburban settings. All programs promote candidate's growth as spiritual beings, as independent thinkers and as active citizens.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

In recognition of the need to prepare teachers who can educate all students, credential programs are designed to address the ethnic, linguistic, and cultural diversity represented in California's student population. This focus is in keeping with the tradition of the College, which is based on a commitment to educate those who are disadvantaged and disenfranchised. Four principles organize our programs:

- Focused study of educational foundations, educational theory, and best practice as the foundation for sound pedagogy;
- Consideration of how to meet the needs of ALL learners infused throughout coursework;
- Integration of state approved K - 12 curriculum standards in all methods courses;
- Concurrent involvement in fieldwork, seminars, and academic coursework.

This integration of fieldwork and coursework provides developmentally appropriate support to candidates through on-site coaching, theoretical analysis of teaching experiences, and reflection on practice.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Santa Clara University

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Santa Clara University is a Catholic and Jesuit institution that makes student learning its central focus. Student learning takes place in an environment that integrates rigorous inquiry and scholarship, creative imagination, reflective engagement with society, and a commitment to fashioning a more humane and just world. The Department of Education plays an important role in advancing the mission of the university and places a special emphasis on issues of diversity and social justice. Graduates of the teacher preparation program are sensitive to all forms of diversity and develop learning environments where students can grow in knowledge, imagination, compassion, competence, social responsibility and self esteem. The department seeks to attract students that represent a wide range of ethnic and social diversity. Because the program of preparation is primarily a fifth year, many second career individuals are attracted to the program. This older student population is enhanced by the presence of an intensive internship program that is the product of a collaborative effort between the department and several nearby school districts. Through this program, individuals are employed by school districts while they complete credential requirements. Scholarships are available for those who need financial assistance. The department places a special focus on teaching those K-12 students that are the most in need. Field placements are all in settings where there is a diverse student population.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Integration of theory and practice with a heavy emphasis on field applications contributes to program excellence. Students have field experience assignments during each phase of their preparation. Students in the regular preservice program are assigned to a school for the entire program. This allows for an immediate application of the concepts presented in classes. In addition, they are acquainted with issues and concerns related to teaching. These issues are brought back to enrich on-campus classes. Intern students have responsibility for a classroom and are, therefore, eager to learn those concepts and principles that will enhance their success. They are able to obtain this information through constant interaction with both university and district supervisors and in regular sessions that focus on the challenges of teaching in the contemporary world. Another excellence in teaching quality is a major focus on teaching a diverse student population. All students take courses focusing on cross-cultural communication, social and philosophical dimensions of working with diverse populations, teaching linguistically diverse students and first and second language acquisition. In addition, students are involved in a service learning project. This project requires implementation of a literacy project at sites such as community centers and juvenile facilities. The goal of this assignment is to provide an experience working with under-served populations. It has the additional benefit of helping students understand that everyone can learn. The major emphasis throughout these courses is on professional inquiry and on the development of reflective teachers.

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The program at Santa Clara University has undergone some profound changes since the 2001-2002 year. The most important change is the program has been completely redesigned to meet the new Standard for Quality and Effectiveness for Professional Preparation Programs adopted by the California Commission on Teacher Credentialing. This will result in an improved sequence of courses that follow a clear rationale. Several new classes will be implemented that address such topics as classroom management and discipline. In addition, two new faculty members were added to the department. One in the area of reading the other in technology. This has led to a revision of courses in both of these areas to better address the needs of students. In addition, a reading clinic is under development.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Simpson College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Mission and Context: The Education Division is committed to the mission of Simpson College and believes that the educational programs offered by the Division should equip men and women to extend the church's mission in elementary and secondary education both in the United States and worldwide. The Division provides preparation for multiple subject and single subject credentials. The programs are intended to provide the theoretical and practical bases, integrated with and founded upon biblical truth for effective teaching. Each aspect of this educational philosophy is interwoven into the curriculum for the credentials. Accordingly, the administration, faculty, and staff seek to reflect and model these foundational components of life and professional pursuit. The goal is to provide multiple and single subject credentialing programs designed to serve professional and personal needs of individuals who seek advanced academic preparation; prepare students for subsequent doctoral programs; provide credential preparation for multiple subject and secondary teaching in public, private, and/or international schools; produce individuals who can articulate a Christian worldview; respond to the educational needs of the north state by preparing qualified educators; and demonstrate and articulate character education. Teacher credentialing candidates typically complete their 5th yr. program within 12 months. Candidates can pursue a Master of Arts in Education in concert with the preliminary credential with 17 additional units. Undergraduate candidates can complete their preliminary credential in 4.5 years in subject matter competency programs in diversified liberal arts, music, math, English, and social sciences.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Program Qualities

It's personal, it's character education, and it's rich field experiences. Small class sizes and personal attention are a hallmark of the Simpson College experience. Candidates are well served by fulltime professors and exemplary practicing educator adjuncts. Simpson College credential graduates are well received by area administrators. The curriculum course is held in an area school where candidates observe, teach micro lessons, and apply coursework knowledge. Candidates are deeply prepared in curriculum, standards, classroom management, pedagogy, and use of technology. Woven throughout is character education.

The Parkview Project, an award winning partnership among the area schools, the Redding Police Department, and Simpson College Education Division, provides after school tutoring followed by recreation with the police department. Candidates serve at-risk and multicultural students.

Another unique feature is weekly visits by the student teaching supervisor during the fulltime semester-long student teaching. Candidates appreciate the ongoing support that connects their coursework knowledge to practice.

Master teachers participate in a cognitive coaching course to develop mentoring skills for guiding their student teachers.

Candidates are served by a full time credential analyst who guides them through their credentialing process.

The education faculty, adjunct faculty, and supervisors work as team to closely support developing new educators.

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

New Initiatives

Simpson College education faculty has designed a new course in technology in the Classroom to extend candidates expertise in computer use. All campus classrooms are now wired with technology stations for PowerPoint, video, and Internet access.

The faculty has developed new course designs to embed knowledge and competencies for teaching English learners. Ongoing throughout the year the faculty have re-examined the program design to ensure candidates are receiving the best preparation needed to perform as a professional educator.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Stanford University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Stanford Teacher Education Program seeks to prepare and support teachers to teach diverse learners to high intellectual, academic and social standards by creating equitable classrooms and schools. This mission is increasingly important to the sustenance of a democratic society. Schools must become dramatically more successful with a wide range of learners if our citizens are to acquire the sophisticated skills they need to participate in a knowledge-based society. Teacher expertise and effectiveness are critical to the success of education. Growing evidence indicates that teacher quality is one of the most powerful influences on student achievement - more powerful than almost any other school resource and as influential as student background factors like poverty, language background, or family status. Higher expectations for student learning and greater diversity among students create a need for educators to be more knowledgeable than ever before. The kind of teaching needed to help students learn to think critically, create, solve complex problems, and master ambitious subject matter content is much more demanding than that needed to impart routine skills. In an era when the student population is more diverse than ever before, teachers are being asked to achieve these goals for all children, not just the 20% who have traditionally been selected into gifted and talented or honors programs. Only educators who are diagnostic about learning and extremely skillful in using a wide range of teaching methods can respond appropriately to diverse students' needs and enable them to succeed at challenging learning goals.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

STEP is a 12-month course of postbaccalaureate study for prospective secondary teachers. The program combines a year of student teaching with 45 credits of graduate coursework leading to an AM in Education and a Professional Clear Single Subject Teaching Credential with CLAD (Crosscultural, Language, and Academic Development) certification. STEP's small size (between 60 - 80 students), access to top faculty and cooperating teachers, and coherent design offer highly focused instruction interwoven with hands-on teaching experience, sustained mentoring, and personalized advisement.

STEP's program design takes into account the integration of the many areas of knowledge that underlie effective teaching and provides opportunities for observing, planning and practicing pedagogical approaches in specific clinical contexts. STEP students are placed in year-long clinical placements in the classrooms of cooperating teachers in local secondary schools. University supervisors are experienced teachers of the subject matters in which they supervise. Together, cooperating teachers and university supervisors provide structured and supportive coaching and mentoring to the STEP students who gradually move from observing classrooms and co-teaching to fully independent student teaching. Stanford faculty members and practicing teachers co-teach the courses of the university-based STEP curriculum, which is designed and sequenced to articulate with the clinical experience. This program of study is designed to help students gradually develop the many areas of knowledge that constitute the basis of professional teaching practices, and engage in various modes of inquiry and constant reflection.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **The Master's College and Seminary**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Master's College provides approved professional preparation programs for candidates desiring to teach in elementary or secondary schools. The mission of The Master's College is to "empower students for a life of enduring commitment to Christ, biblical fidelity, moral integrity, intellectual growth and lasting contribution to the Kingdom of God." The Teacher Preparation Program, within these guidelines, purposes to provide (1) a program founded on a biblical perspective and scriptural principles, (2) preparation oriented to the needs of elementary and secondary pupils, (3) periodic review of the program in light of changing (a) needs of credential candidates, (b) research on schools and learning, (c) demands of the education profession and (d) needs of the local school community. The goal of the Education Department is to prepare teachers who will be successful and effective in California's public or private school environments. Candidates are carefully selected and provided with an academically strong, nurturing atmosphere to foster development of their unique abilities as they move toward their professional goal. The Master's College has cultivated positive relationships with 5 local school districts for many years. Students from diverse backgrounds make up at least 25% of the student body in 23 of the 40 schools. There are 25 California Distinguished Schools and 5 Blue Ribbon Schools among the 40 schools. Four schools received a statewide rank of 6 on the 1999 Academic Performance Index. Fifteen ranked 10. The other 24 ranked 7 - 9.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Full-time faculty teaching professional courses have public school classroom experience. They also supervise student teachers weekly. Adjunct professors are currently teaching in public schools.

Faculty members advise candidates each semester regarding course registration. Candidates keep the same advisor through graduation and credentialing. Meetings are held each semester to alert candidates to requirements.

The college provides a number of opportunities to serve in the inner city of Los Angeles as well as in countries around the world. Candidates may study for a semester in Israel. This gives them first-hand experience with diverse backgrounds.

Courses are designed to require candidates to apply what they are learning to assignments that are similar to the tasks they will have as teachers. Candidates have fieldwork with every professional class, and are required to plan and teach units in a classroom.

Master teachers are carefully selected with the particular candidate in mind. College supervisors meet personally with teachers to orient them to college requirements. During student teaching, candidates are visited weekly by the college supervisor.

The administration and other departments in the college are supportive of the goals of the department and create and adapt courses as necessary. There is a strong commitment to incorporating technology into courses college-wide. This has included equipping classrooms with computer ports and PowerPoint projectors and supplying computers to all faculty.

Candidates are advised of financial aid that is available specifically for prospective teachers. Tuition is reduced for professional courses and student teaching once a candidate has graduated.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Recognizing the increased use of technology, beginning Fall 2001 semester, all new freshmen are required to have a Windows-based desktop or notebook computer in their personal possession for use as a part of their academic program during their attendance at the College. Beginning Fall 2002, all new freshmen students will be required to have a Windows-based computer which must be a notebook type. In Fall 2003 all full-time TMC students will be required to have a Windows-based notebook computer as a requirement for attendance. Additionally, our department proposal to meet requirements of Technology Standard 20.5 was developed and approved by the Commission. Candidates are required to take two technology courses in order to meet the standards. ED300, Computer Basics for Educators is required for candidates as they enter the program and then continues during the educational sequence. Competencies are met in each class within the program, demonstrated in various areas of coursework, by participating in local school technology programs and observing school technology committees. ED500, Integration of Technology in the Classroom must prove their competency in all standards prior to completing their credential. In completion of the department's accreditation requirements, additional experience in Classroom Fieldwork was added to the Single Subject Credential. Prior to student teaching, candidates must serve a minimum of ten (10) hours practicing teaching methods in a secondary classroom. An emphasis on appropriateness of various approaches to differing subject matter is made in each of the program classes. Specific pedagogy are demonstrated to provide a meaningful classroom instructional experience for the candidate.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: University of La Verne

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teacher Education Program at the University of La Verne prepares students for CLAD/BCLAD Multiple Subjects and CLAD/BCLAD Single Subject Credentials for K-12 teaching. The program is designed to foster prospective teachers' ability to: (1) create an environment that incorporates communication with students, (2) develop an appreciation for differences, (3) understand the basis for a healthy self-concept, and (4) develop self-awareness, all within the context of appropriate pedagogical skills. A Mission Statement, developed by the Education Department, supports this rationale: The mission of the Education Department at the University of La Verne is to provide students with the knowledge, skills, and value orientation to become competent facilitators of human development. The education environment is characterized by small class size and access to professional staff. Leadership is provided by motivated faculty who possess appropriate academic preparation, extensive practical experience, and excellent teaching. Program emphases are the development of self-awareness, celebration of diversity, growth in personal meaning and values, through a theoretical and applied knowledge base and diverse instructional methodology. Prospective teachers trained at the University of La Verne are representative of the diversity found in the student population of California, and the program is founded on the belief that all teachers in California need a variety of skills to meet the diverse populations served. Students are trained on the main campus in the city of La Verne, and in locations off campus, including Bakersfield, Newhall, Ventura, and Cerritos.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Program excellence indicators are found in the following areas: (1)The quality of the reading preparation in the program: Candidates in the CLAD/BCLAD Multiple Subjects program have a rigorous program of preparation to teach reading. Each student in both Multiple and Single Subject programs is independently visited and assessed by a reading supervisor two times during the semester, in addition to the assessment of teaching of reading by the University supervisor assigned to the candidate for student teaching. This emphasis on the teaching of reading and its success is supported by the 98% passage rate for the RICA in the 2000-2001 year. (2)The diversity of the candidates in the program, and commitment to serving the needs of California's diverse populations: Candidates in the CLAD/BCLAD Multiple Subjects program and the CLAD/BCLAD Single Subject Program represent the diversity found in the classrooms of California. The candidate pool is 55% white, 29% Latino, 7% African American, 3% Asian and 6% other. The University believes that all teachers in California need a variety of skills to meet the needs of the K-12 students served. (3)Support for Emergency Permit and Intern Teachers: The University is committed to support for emergency permit and intern teachers. Weekly visits are part of the student teaching phase, and the small class environment provides opportunity for learning growth in teaching strategies.

Institution/Program: **University of La Verne**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

As the Teacher Education Program continues to prepare teachers for the diverse populations of the California schools, continual reflection and assessment of the program needs to occur. New initiatives to improve program excellence beyond the year 2000-2001 include: (1) Increase the number of full-time faculty to coordinate and teach in off campus sites: to date two full time faculty coordinate the off campus sites. The goal is to add an additional full time faculty in this capacity. (2) Hire faculty to represent the diversity of the candidates in the program and in the schools in California. Currently the full time teacher education faculty is 70% white, 20% Latino, and 10% African-American. As the program grows, commitment to hiring diverse faculty is a priority. (3) Continue to keep the student foremost as the program grows: The University of La Verne prides itself on the student focus in the program. The small class, personalized nature of the program will be preserved as the program grows. (4) Development of a distance learning component to increase full-time faculty participation in quality control of the coursework being offered is proposed. A distance learning component for each course taught would insure continuity in coursework throughout the system.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of Phoenix**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

MISSION

The mission of the University of Phoenix is to educate working adults to develop the knowledge and skills that will enable them to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.

The College of Education at the University of Phoenix is guided by its own vision and mission that informs our work with teacher candidates and professional educators; "Impacting Student Learning, One Educator at a Time". Our programs encompass the initial preparation of professional educators, graduate level degrees, and professional development courses and programs. The College of Education constantly works towards our vision. The College of Education is a leader in innovative educational solutions for developing educators, impacting P-12 students, and meeting school needs by:

- Offering a comprehensive set of programs that recognize and address the developmental process of teaching and learning in a diverse society.
- Employing a practitioner faculty who are recognized as experts in the educational community.
- Using integrated technologies to impact learning.
- Emphasizing assessment and self-assessment of teaching and learning on a continuing basis.
- Sharing our model and best practices with our colleagues.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

INSTITUTIONAL PHILOSOPHY/PROGRAM FRAMEWORK

Learning is the key to any educational program. The University of Phoenix offers a teacher education program that is focused on P-12 student learning by improving the educator responsible for that learning. Candidates for this program have already earned a bachelor's degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming competent and effective educators.

OUTCOMES

The teacher preparation program has been designed to connect teacher learning directly to P-12 curriculum standards and, therefore, classroom learning. Assignments and experiences are grounded in the P-12 classroom so that the candidate can immediately understand how to impact their own students' learning.

Teacher candidates who complete the program will understand and have experience in:

- | | |
|------------------------------------|--------------------------------------|
| - Teaching in Diverse Environments | - Instructional Strategies |
| - Learning Theory | - State and National Standards |
| - School Law and Ethics | - Literacy |
| - Classroom Management | - Family and Community Collaboration |
| - Curriculum Design and Assessment | - Technology |

COMPONENTS

The following key components provide the foundation for the teacher education program:

- | | |
|--|----------------------------------|
| - Field Experiences and Student Teaching | - Learning Teams |
| - Integrated Technology | - Professional Teacher Portfolio |
| - Reflective Practice | - Experienced Faculty |
| - Critical Thinking | |

Institution/Program: **University of Phoenix**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The University of Phoenix will be submitting for program approval under the new SB 2042 initiative in November 2002. The University initial proposal will be for program approval in Multiple Subjects, including 2042 plus. We will also be applying to begin offering intern programs at our campuses throughout the state. Once the single subject standards are finalized, we will submit for program approval in the single subjects.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of Redlands

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of Redlands School of Education fosters a student-centered approach to learning in which candidates for teaching, counseling and administrative credentials and graduate degrees experience both rigorous academic preparation and professionally supervised field experiences that bridge theory and practice. All of our programs carry forth our mission to promote social justice and equity in education. We are keenly aware our students will serve a widely diverse student population and they must be well prepared to meet the challenges and needs represented in our surrounding school districts. Our Professional Teacher Preparation Program serves both undergraduate students and working adults who attend evening classes. Courses are offered on campus as well as at some area school and district sites.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

During this past year, the University of Redlands School of Education moved into a newly refurbished building. Our new facility includes resource centers and classrooms equipped for the training and practice of interactive technology, faculty and staff offices, a lounge, library, conference and seminar rooms and our Education Admissions area. The building is adjacent to ample parking and close to the University Library and our Student Center and Bookstore. With the new facility and equipment, the faculty infused technology throughout each course and across the curriculum, thus increasing students' proficiency levels to meet new State standards.

Institution/Program: **University of Redlands**

Part A (continued):

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The School of Education faculty is writing curriculum as an "early adopter" of the new State standards for the Professional Teacher Preparation Program. Woven throughout each specific course, the new curriculum includes skill and knowledge development in the areas of literacy, cross cultural language development, technology, diversity and field experiences. Also, the School has formed a partnership with the Lewis Center and the Academy for Academic Excellence located in Apple Valley.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of San Diego

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Learning and Teaching program serves a diverse student population from the greater San Diego area, the state, region and from abroad. The faculty in the program are dedicated to a standards-based approach in the preparation of candidates to teach and network in the culturally diverse K-12 environment that is emerging in southern California and across America. As such, course objectives are closely aligned with California Standards for the Teaching Profession (CSTP) and California State credentialing standards. In addition, students are thoughtfully placed in the local urban school district for observations, practicum and student teaching experiences. Building upon the principles of pedagogy, ethical and moral philosophy of service and relevance to the school-districts we serve, faculty are committed to pedagogical practices that model inclusiveness, democracy and social justice. The guiding principles that inform our work with teacher candidates include reflection, human dignity, character development, democracy and service. Candidates are required to reflect about aims, curriculum and pedagogy. This reflective quality is critical to teacher candidates as they work to develop skills, improve knowledge and augment thoughtful democratic practices that support inclusiveness. The support for inclusiveness is based upon the idea of human dignity. In our view, all human beings have the right to learn and grow together in shared environments that offer individuals the opportunity to live culturally valued lives. We seek to support education for all students as we believe no student should be denied access to the range of social and learning experiences available to advantaged children.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Teacher candidates receive individual attention during advising from faculty members. Faculty are student oriented and they value their contacts with pre-service teachers in the field and in the classroom. Committed to bridging theory and practice, the Learning and Teaching faculty have played a leading role in the institutionalization of service learning at USD. This powerful pedagogical tool provides students the opportunity to learn course material more thoroughly and to deepen commitment to social responsibility and justice. Examples of service learning opportunities that teacher candidates engage in include working with developmentally delayed adults in a group living facility, serving the needs of low income children at a local Head Start program, and serving as literacy tutors in local elementary and middle schools, at a local Sudanese immigration center, and in the area settlement house where children who are recent immigrants to San Diego (at least five languages are spoken: Vietnamese, Laotian, Chinese, Spanish, and Filipino) are provided with support and language instruction. The service learning experiences are integrated with course objectives and involve critical reflection before and after experiences to process and deepen understanding. Combined with methodological instruction, service learning also enables teacher candidates to structure age appropriate service learning for their own students.

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Learning & Teaching Program has initiated a new collaborative partnership in teacher training with the Chula Vista Elementary School District, and has invited the Sweetwater High School District to enter into a collaborative partnership as well. In addition, in the fall of 2001, we began the process of articulation with local community colleges as an outreach initiative. We have completed articulation agreements with five local community colleges for the Diversified Liberal Arts major, USD's approved subject matter program for the Multiple Subject Credential. Articulation efforts continue with the remaining regional community colleges. We have redesigned our teacher preparation program to conform to new state standards (SB 2042) and state Teacher Performance Expectations (TPE). This includes the development of a new assessment system focusing on teaching for understanding, which includes the addition of "centerpiece" performances of understanding. These performances are assessments that teacher candidates would negotiate collaboratively with the course instructors in each of their credential classes. These negotiated artifacts of understanding, along with the state's Teacher Performance Assessment and the program's evaluative assessments will be organized in the form of a portfolio for presentation at the completion of the program.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: University of San Francisco

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of San Francisco, the City's first institution of higher education, was founded by the Society of Jesus in 1855. The University's academic philosophy emphasizes enrichment of personal values, expression of personal responsibility, and lifelong learning. The USF School of Education links instruction, research, and service in a manner that reflects the intellectual, ethical, and service traditions of Jesuit education. Teacher credential programs within the School of Education recruit and prepare candidates for the mild/moderate handicapped specialist and the multiple and single subject CLAD/BCLAD emphasis credentials. Our programs emphasize preparation to serve children in multicultural and multilingual urban schools. Consistent with the mission of the University, our programs aim to develop educational leaders who will work for justice for all people and who will shape a multicultural world with creativity, generosity and compassion.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The Mild/Moderate Education Specialist Credential Program, a two-year internship program, is housed in the Learning and Instruction Department. The curriculum is taught by faculty, doctoral students in Special Education and experts in modules aligned with school-year job demands. Upon completion of the 36-unit credential program, candidates are eligible to earn a Masters degree in Learning and Instruction by completing 6 additional units. As interns, candidates earn a full teacher's salary. Scholarship funds are available (Department of Education Training grant, AmeriCorps Education Awards program).

The Multiple and Single Subject CLAD/BCLAD (Spanish and Filipino) Credential Program is housed in the Teacher Education Department. These combined credential/masters programs vary in units depending on the options selected, but typically take two years. Masters options include the Master of Arts in Teaching, the Masters in Educational Technology, the Master of Arts in Teaching English as a Second Language and the Master of Arts in Catholic School Teaching. The curriculum focuses on foundational studies and emphasizes three core themes: philosophical inquiry into educational problems and practices, education as an instrument for promoting a more just society, and concern for the individual developmental needs of children and adolescents. Scholarship funds are available (Title VII grant and Teacher Education for the Advancement of a Multicultural Society program).

Institution/Program: University of San Francisco

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The Center for Teaching Excellence and Social Justice, headed by educator and author Herbert Kohl and staffed by USF faculty and eminent visiting scholars, continues to expand as it enters its second year. The Center provides support for the social justice initiatives of the Teacher Education Department, and recruits and supports credential candidates who show special interest and promise in becoming exemplary teachers in the progressive tradition. Beginning in 2000-2001, the Teacher Education Department began offering new masters options: Masters in Education Technology and Masters in Teaching English as a Second Language in collaboration with the International and Multicultural Education Department. In addition, a Reading Certificate program is planned that will be offered in 2001-2002

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of Southern California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the Rossier School of Education is to prepare educational leaders to use knowledge about diversity, learning and accountability to guide educational practices, so that all students in all educational settings attain their academic, societal and personal goals.

To fulfill its mission, the Rossier School of Education concentrates on four themes:

Learning represents the RSOE's core technical skill. The school's graduates have a deep understanding of the basic principles of how individuals learn and how what they learn is incorporated into their daily lives.

Diversity is the context within which educators operate, particularly in urban areas. The RSOE seeks to understand the specific strengths and needs of learners who differ in income, ethnicity, gender, language proficiency or disability and to insure that graduates incorporate such knowledge and skills into their practice.

Accountability comes from determining what should be learned and how well it has been learned. The RSOE addresses indicators of success such as systems coherence and support, evidence-based best practices, processes of continual improvement and organizational learning. The school's courses and faculty research help leaders understand who is accountable for what at each level of the system. Accountability also means professionals who are held accountable receive the resources necessary to be successful.

Leadership is 'how' the Rossier School of Education focuses on enhancing the skills and knowledge of people in the organization, creating a common culture of expectations, fostering productive relationships within the organization, and holding individuals accountable.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Program qualities, which contribute to program excellence of the RSOE, can be viewed in the school's fidelity to the following principles – extensions of its conceptual framework:

1. All children have the potential to learn rigorous content and achieve high standards.
2. Our educational system must guarantee a learning environment in which all children can learn and achieve their own kind of individually configured excellence and which nurtures their unique talents and creativity, and incorporates the diversity of their experiences into the learning process.
3. We will graduate teachers who can support the intellectual, social, emotional, moral and physical development of students, respond with flexibility and professional judgment; and actively engage them in their own learning so they can use and generate knowledge in effective and powerful ways.
4. We believe teaching and learning comprise a holistic process that connects ideas and disciplines to each other and to the personal experiences, environments and communities of students. Consequently, the process of teaching must be dynamic and reciprocal, responding to the many contexts within which students learn.
5. We believe professional teachers assume roles that extend beyond the classroom and include responsibilities for connecting to parents and other professionals, developing the school as a learning organization, and using community resources to foster the education and welfare of students.
6. We believe teachers' professional development occurs during the course of an entire career.

Institution/Program: University of Southern California

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

In an effort toward excellence and effectiveness, RSOE participated in a Futures Conference. Faculty, staff and community members convened for a three-day retreat to discuss present efforts and to propose goals for program and school renewal. Implementation of the ideas generated from the multiple perspectives represented at the conference has begun, and will continue to guide accomplishment of goals in the context of the presented mission statement.

Rossier School of Education's efforts toward excellence can also be observed in the vigorous implementation of Senate Bill 2042. Not only has the school adapted its program requirements to this new legislation, but has done so as an Early Adopter. As an Early Adopter Rossier School of Education has been chosen to provide a model of implementation of SB2042 Teacher Preparation Standards. Initiating and fulfilling this committed role has helped provide an opportunity for professional development for faculty and staff, a stronger foundation of teacher preparation for teacher candidates and ultimately greater learning outcomes for classroom students in partnering professional development schools.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of the Pacific**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Gladys L. Benerd School of Education at the University of the Pacific prepares thoughtful, reflective practitioners at undergraduate, Master's, and doctoral degree levels for service to diverse school populations. School of Education faculty strive to research the needs of schools and communities and foster the intellectual and ethical development of professional education candidates through personalized learning experiences.

Our degree and credential programs in Multiple Subject, Single Subject, Mild/Moderate and Moderate/Severe Disabilities, and B/CLAD prepare candidates to teach all students in California schools. Single Subject content areas include English, Social Sciences, Mathematics, Sciences, Physical Education, Spanish, and Music. Undergraduate candidates complete a Liberal Studies major or a Single Subject content major, along with professional education coursework during a four-year bachelor's degree program. Graduate candidates can pursue an M.Ed. to complete a preliminary credential. All teacher education programs emphasize content expertise, pedagogical skills, especially with culturally diverse and special needs children and youth, instructional assessment skills, classroom technology skills, and commitment to teaching in public schools. Candidates benefit from field experiences and student teaching assignments in K-12 classrooms, primarily in ten school districts in the Stockton area of San Joaquin county. These schools reflect the richness and growth of ethnic, linguistic, and economic diversity in California's Central Valley. All programs in the School of Education, baccalaureate through doctorate, are accredited by the CCTC and NCATE.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

For Multiple Subject candidates, courses in Reading and Language Arts were held off -campus at a professional development school sponsored by the Comprehensive Teacher Education Institute (CTEI), a collaborative project with Lodi Unified School District. A University professor collaborated with K-6 teachers in Lodi in delivering lessons for candidates in Reading/Language Arts pedagogy, knowledge, and applied skills. Students were immediately able to observe and teach in classrooms at the school site prior to student teaching.

The CTEI Project also involved K-6 teachers and school administrators in Lodi with School of Education faculty members in developing rubrics for assessing the knowledge, skills, and dispositions of beginning teachers in the Project's professional development schools. NCATE standards for professional development schools were used to frame this work.

Liberal Arts faculty in the College of the Pacific and School of Education faculty collaborated to design courses in physics, geosciences, and mathematics that strengthened the knowledge base of undergraduate teacher education candidates in mathematics and in physical, environmental, and earth sciences. Newly designed courses provided lecture and laboratory exercises for applying the kinds of knowledge and skills defined in the California K-12 Content Standards.

Special Education faculty completed their design and documentation of courses and programs that met the required Level II standards for both the Mild/Moderate Disabilities Credential and the Moderate/Severe Disabilities Credential and that guided the School's professional development programs for special education teachers.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Liberal Arts and School of Education faculty continued collaboration to redesign teacher education programs in light of new state (SB2042) and NCATE 2000 standards. Faculty engaged in organizing knowledge, skills, and dispositions important to subject matter preparation and teacher education and redesigned the Liberal Studies major and teacher education courses.

The Multiple and Single Subject and Education Specialist Programs implemented technology projects supported by a Preparing Teachers for Tomorrow's Technology grant with ThinkQuest and other universities throughout the United States. Faculty integrated a "Guiding Partner Approach" and multi-media software and web-based assignments into selected courses in the Multiple Subject Liberal Studies major and teacher education programs.

Candidates and their supervisors implemented reflective lesson plans during directed teaching, using a CFASST designed protocol to aid formative assessment. Staff from Comprehensive Teacher Education Institute schools in the Lodi USD assisted in reviewing and implementing this protocol, which has been adopted for use with student teachers and interns in placements in area districts.

An early field experience course was held at selected K-12 school sites. Teachers and administrators presented to students, and students observed and assisted in their classrooms. Professional pedagogy courses in the Single Subject program met at a local high school, and teachers and administrators participated in course instruction.

The Level II program for the Education Specialist credentials was implemented to provide professional induction plans for advanced coursework and instruction in a professional portfolio.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Vanguard University of Southern California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Vanguard University's Graduate Program in Education is authorized by the California Commission on Teacher Credentialing to offer a Multiple Subject CLAD Emphasis Credential, Single Subject CLAD Emphasis Credentials and a CLAD Certificate. Eligible students may apply their Vanguard University (VU) credential course work, or the CLAD Certificate course, toward the Master of Arts in Education. The program is dedicated to a highly personalized approach to teacher education and graduate training.

The mission of the Graduate Program in Education at Vanguard University is to provide a supportive and reflective community in which teachers develop the skills, techniques and professional knowledge base necessary to empower ALL students to reach their highest spiritual, intellectual, and physical potential.

The Superintendent of Schools of a large urban district in Orange County recently commented, "What I love about teachers from Vanguard University is that they see teaching as a calling, and not just a job." This sense of calling permeates all aspects of teacher preparation at VU. Our institution is committed to preparing candidates to teach in schools with highly diverse student populations, such as those in our partner school districts.

In his inaugural address to the Vanguard community in September 2000, Vanguard University President, Dr. Murray Dempster, demonstrated his, and the institution's profound commitment to teacher preparation. He highlighted the work of VU's graduate Bonnie Brigman, Teacher of the Year for the Newport-Mesa Unified School District, and with her the hundreds of VU teachers throughout the State, all who believe that "to teach a child is to touch a life forever".

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Vanguard University offers students a community of support, personal attention, and challenging preparation for their calling to teach. Our belief is that every child is precious, full of potential, worthy of our best efforts, and capable of becoming thriving, contributing members of a colorful, culturally-diverse world. These core attributes and beliefs create the environment in which candidates can blossom and grow as they recognize their own worth and promise.

Candidates also find strong mutual support, since they travel as a cohort, developing strong collaborative relationships with their peers throughout their professional training. This strong mutual support is fostered and encouraged by Vanguard University faculty. The faculty includes outstanding scholar practitioners with doctoral degrees and excellent records of accomplishment.

Vanguard University's Teacher Education Advisory Council (TEAC), made up of teachers and administrators in local partner school districts, offers outstanding guidance to the program on issues of program quality and candidate preparation. Our University Supervisors and adjunct faculty members are of the highest quality. Our partnerships with local school districts are strong and continually growing.

Institution/Program: Vanguard University of Southern California

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Over the past year, Vanguard University's Education faculty and staff, in collaboration with partner district personnel and TEAC members, have undertaken a continuous improvement process meant to reassess the content of the teacher preparation curriculum and the process of candidate assessment. The Vanguard University team has taken important steps to align program content with the California Standards for the Teaching Profession(CSTP), such that all courses and all assessments are now rooted in the CSTP. This process enabled the Graduate Program in Education to respond effectively to the SB2042 CCTC Accreditation Standards which are likewise rooted in the CSTP and which will include a required Teaching Performance Assessment.

Vanguard University is committed to a continuous improvement process wherein all aspects of the program are examined on an on-going basis in dialogue with school and district partners to assure that candidates are receiving the strongest possible preparation for their calling to teach.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Westmont College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Within the Christian liberal arts context, the Westmont teacher education program strives to develop reflective teachers who meet the needs of all learners through integrated and balanced instruction, who embrace the moral dimensions of teaching, and who desire to grow professionally.

DEFINING PRESUPPOSITIONS OF TEACHER EDUCATION AT WESTMONT COLLEGE

Teacher Education is a developmental process. Both learning and teaching are developmental in nature. Therefore, learning experiences must be meaningful and must intentionally contribute to the learner's lifelong cognitive, moral and personal development.

Teacher Education should be reflective, integrational and balanced in nature. The best teachers are the best learners. They are able to make their own and their students' intellectual scaffolding. They do not throw aside time tested strategies as new approaches appear on the horizon, but rather evaluate and integrate to achieve an effective balance.

Teacher Education must embrace all learners. Effective teachers recognize that they are called to meet the needs of all the students in their classroom regardless of ethnic, linguistic, racial, socioeconomic diversity and special needs.

Teacher Education must embrace the moral dimensions of teaching. Teaching is essentially a moral endeavor. An effective teacher needs a personal sense of vocational calling. She/He must be motivated by a sense of passion for teaching/learning and be concerned with shaping an ethical community within the classroom and the school environment.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

PROGRAM DISTINCTIVES OF TEACHER EDUCATION AT WESTMONT COLLEGE

Small is good:

Teacher Education at Westmont is characterized by a small full time faculty who share responsibility for advising, teaching core curriculum and supervising student teachers. Cohorts of candidates are small as well, never more than 30 to 35 in the one year program.

Connectedness is essential:

Because the department is small, the faculty can provide connectedness in the following ways:

--The Education Department is coherently connected to the College as a whole and finds the context of the Christian liberal arts an effective, supportive growing ground for teacher education.

--Faculty in teacher preparation have chosen to work as a team. We see ourselves, not as researchers and specialists, but as practitioners, generalists and team players modeling the kind of collaboration and support needed in public school faculty. We also work as a team in reviewing and evaluating work of candidates and can intervene quickly with assistance and personalized help and direction.

--We intentionally provide a common central focus for teacher education based upon our shared presuppositions. We integrate our coursework emphasizing meaningful connections to presuppositions and across the curricular components. Our purpose is to provide candidates with tools needed to survive their first years of teaching and begin their growth toward becoming expert professional teachers.

--We strive to develop a sense of supportive community among cohorts of students who come to know one another well. This helps to engender a secure environment in which risk taking is less threatening.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Whittier College

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Whittier College, nationally recognized for its outstanding liberal arts curriculum, has a tradition of excellence in the preparation of teachers and school administrators. Undergraduates seeking to prepare for teaching careers develop subject matter expertise by completing a high quality academic major and an interdisciplinary liberal education curriculum. At both the undergraduate and graduate levels, an in-depth study of various pedagogical issues as well as theoretical and philosophical perspectives occurs within the context of the liberal arts.

Whittier College's education programs include an undergraduate minor in education, graduate credential, and Master of Arts in Education degree programs. Currently, the college offers the following Preliminary and Professional Clear teacher credential preparation programs: (1) Multiple Subject CLAD emphasis and (2) Single Subject CLAD certificate.

Teacher education programs at Whittier College are grounded in a set of guiding principles. Among others, these include commitments to: (1) developing a constructivist approach to learning and teaching; (2) valuing cultural and linguistic diversity and supporting all students' learning; (3) establishing a climate which promotes fairness and respect, along with both independent and group learning; and (4) growing professionally by continually reflecting on one's practice and pursuing other opportunities for learning.

Teacher preparation programs at Whittier College are strongly supported by fieldwork experiences in local schools. Many of the program graduates choose to remain in the greater Los Angeles area serving children and youth in socio-economically, ethnically, and linguistically diverse communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

Intensive and varied fieldwork experiences are embedded in all Whittier College teacher preparation coursework. Typical experiences include tutoring individual children in literacy skills; working with individuals and small groups of children in an after-school computer-based program; conducting interviews with students and families with respect to language and cultural issues; and observing and working in elementary and secondary classrooms. Broad Oaks, a campus demonstration school renowned for its developmental program, provides additional opportunities for observation and supervised practice to both undergraduate and graduate students. Given the small size of teacher preparation classes and the commitment of full-time faculty to teach and supervise pre-professional fieldwork, Whittier College teacher candidates have high quality professional preparation experiences that closely connect theory and practice.

Cross-cultural perspectives are central to Whittier College's mission. A hallmark of the institution's programs is the diversity represented in our student body. Among teacher candidates, there are numerous ethnically and linguistically diverse, first-generation college students who are readily able to serve as role models to K-12 students with respect to emphasizing the value of education. A respect for diversity is also highlighted in departmental standards, which complement the current California Standards for the Teaching Profession. Throughout course work, field experiences, and student teaching, candidates are expected to demonstrate (1) respect for diverse perspectives; (2) commitment to fostering learning; and (3) equitable behavior toward all of the school community.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Compton Unified School District**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Compton Unified School District Alternative Certification Program prepares educators to successfully teach culturally and linguistically diverse students in urban school settings. As part of this mission, the program has adopted the statement below:

With the guidance and support of their instructors and supervisors, all interns will work towards achieving these goals:

- Skill in providing equal opportunities for all children
- Sensitivity toward and effectiveness with learners from diverse cultural and linguistic backgrounds
- Appropriate and creative use of collaboration among learners
- Emphasis on an integrated curriculum that taps into higher order cognitive skills
- Meaningful, authentic curriculum and assessment for all students
- Engagement in reflective practices
- Knowledge of theory and research that informs good teaching

The overarching goal of the Compton Unified School District Alternative Certification Program is to enable teachers to facilitate the learning and development of all learners with emphasis on strategies that are effective in urban, multicultural, and multilingual settings.

The CUSD District Alternative Certification Program is designed to provide an alternate route to certification for the District's teachers. It is an accelerated program offering a blend of theory and practice and support. The District currently employs 1353 teachers in K-12 classrooms; of this number, 851 teachers do not have a credential. The constant attrition rate has created a serious need for alternatives to credentialing. The District currently sponsors the entire program for the interns to facilitate the process of providing credentialed teachers for our students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

In the 2000-2001 school year, all interns in the District Alternative Certification Program received excellent training in literacy. In addition to the two courses in the Professional Development Plan designed to teach interns how to design and implement a balanced literacy program in a linguistically and culturally diverse classroom, interns in their second year of the program received two weeks of intensive preparation for the RICA examination. The results of this training include successful passage rates of the RICA exam and quality instruction in the interns' classrooms as demonstrated by principal evaluations and coordinator observations.

The small size of each intern cohort group provided for support and instruction on an individual basis. Additionally, the program coordinator was available to each intern to provide individualized assistance in planning and instruction. The District's focus is on literacy; therefore the coordinator worked closely with the Office of Curriculum and Instruction to ensure that interns were able to attend as many in-service and staff development sessions as possible regarding content area instruction.

Institution/Program: **Compton Unified School District**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

The District Alternative Certification Program plans to implement the new state standards for Technology and English Language Learners in the coming year. Candidates can expect to participate in intensive technology training sessions taught by District employees. Additionally, all interns will receive district e-mail accounts and technological equipment for use during their two-year professional development plan.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Long Beach Unified School District
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The District Bilingual Intern/District Intern Program has a significant role in the Long Beach Unified School District. As an alternative certification program, our primary mission is to prepare interns to become competent teachers who can ensure the educational success of all students by having high expectations, a commitment to student achievement, and the knowledge and skills to promote each child's positive self-esteem in a culturally and linguistically diverse society. The program trains teachers to effectively educate students in urban, culturally and linguistically diverse classrooms. Second language learning methodologies and strategies are essential elements in the overall design of the program. Through a two year Professional Development Program, participants acquire the knowledge and skills required for teaching in an elementary or middle school core classroom. The two year program begins with an intensive 120 hour practicum and orientation. The selected candidates must meet all of the requirements established by the Commission, as well as district standards. Site administrators serve as Supervisors for all District Interns. As one of their duties, they supervise and evaluate each intern assigned to his/her school. Candidates selected for this program pursue a Multiple Subject Professional Clear Credential with the BCLAD emphasis or a basic Multiple Subject Professional Clear with the CLAD added at a later date. The Long Beach DBI/DI Program was developed in consultation with Institutions of Higher Education, the Office of Curriculum, and Human Resource Services.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

The quality of instruction and content matter continues to be a critical element for the success of the interns and the program. The DBI/DI Program has consistently responded to critical feedback in order to improve both of these areas. As a result, changes were made in order to improve the quality of the Pre-Service training. Reclassified Pre-Intern participants receive differentiated instruction during their Pre-Service. This allows for more in-depth training for the interns and less duplication of content. In addition, in keeping with the district's overall plan to have all teachers trained in the Essential Elements of Effective Instruction, the District Bilingual Intern/District Intern Pre-Service instructional program embedded elements of EEEI. The rationale for starting at the Pre-Service level was to better prepare interns, from the beginning, to understand and utilize appropriate strategies that are essential for effective instruction.

Institution/Program: Long Beach Unified School District

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

A new initiative that contributed to the success of the program was the implementation of the differentiated Pre-Service for reclassified Pre-Interns. This new program design offered an opportunity to provide more in-depth course work for those participants that were entering with prior teaching experience. The instructor's main objectives were to incorporate more long range planning opportunities, and to introduce the critical components of the Essential Elements of Effective Instruction. As a result, the reclassified interns, as well as the new interns, received a more comprehensive Pre-Service instructional program.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Los Angeles Unified School District

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Los Angeles Unified School District elected to participate in the District Intern Program as an alternate form of teacher preparation because of the continuing shortage of fully qualified teachers in certain subject areas and with recognition that colleges and universities are currently unable, for several reasons, to produce the numbers of teachers needed to meet our staffing needs. This program addresses the declining pool of fully trained teachers and increasing student populations while providing new and innovative recruitment and training techniques.

The mission of the District Intern Program is to prepare urban public school teachers to effectively educate all students so that each contributes to and benefits from our diverse society. To that end the teachers completing the program will be:

- **Committed to their diverse student population
- **Effective instructional decision makers
- **Cognizant of each individual student's strengths, abilities, and needs
- **Dedicated to the concept that the human system is open to change throughout all developmental stages
- **Reflective about their practice

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

It has been the aim of the Los Angeles Unified School District to implement an alternative approach to training teachers that would provide relevant and focused course work, guidance and support that prepares the new teacher adequately for the classroom realities of teaching. The District has continued to review the program in an effort to improve and address District staffing needs. The program has been updated each year to include the newest strategies, teaching techniques and research on Cognitive Learning Theory. These modifications are made to ensure that the teachers participating in this program receive cutting-edge training that is aligned with the most current research and legislative mandates.

Interns participate in a two or three year training program that is delivered through a professional development model and includes classroom lectures, observations, development of lessons, development and maintenance of portfolios and journals, projects, discussions and discussion groups, and development of thematic units. The participants are grouped in grade-level or task-specific groups/cohorts and are supported by their class instructors, mentors, site administrators, buddy teachers, start-up coaches and their peers, in collegian groups.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Ontario-Montclair Unified School District**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Ontario-Montclair School District (OMSD) Intern Academy is an alternative way to earn a California teaching credential. At the end of the two-year program, candidates who have successfully completed all requirements, exams and course work are recommended to the California Commission on Teacher Credentialing for a Professional Clear Multiple Subjects Credential by the Board of Trustees.

The mission of OMSD is to guarantee all students a quality education through a commitment to excellence. The OMSD Intern Program strives to recruit, educate, and certify teachers who can effectively meet the needs of ever-changing culturally and linguistically diverse populations. Participants acquire the knowledge, skills and professional attributes, to satisfy credentialing requirements, through an integrated collegial support system, which reflects a balance between theoretical and practical aspects of teaching.

The district is the second largest elementary district in California with 26,400+ students. Each year the enrollment increases approximately 500 hundred students. Ethnicity includes: American Indian, Asian, Pacific Islander, Filipino, Hispanic, Black and White with 53% classified as limited English proficient.

The OMSD Intern academy was fully accredited by CCTC in January, 2001. This affordable alternative credentialing route is for teachers who desire a different way to become an effective teacher. Interns have the opportunity to apply what they learn as they learn instead of waiting until the completion of their program.

Interns are hired and responsible for multiple subjects, self contained teaching assignments. Interns who are selected for OMSD Intern Academy earn full salaries and benefits.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

"Pre-Service: Intro to the Teaching and Learning Process" consists of 60 hrs coursework and 60 hrs of supervised fieldwork with a goal to provide interns with pedagogical knowledge and skills needed to begin teaching. Coursework is a balance of theory and application. Field experiences is done with effective master teachers, observing and becoming familiar with curriculum, participating in assessing student work and assuming responsibility for as much of the teaching as possible. Master teachers provide feedback and coaching. Upon successful completion of Pre-Service, interns begin the fully accredited two-year teacher credentialing program.

The program consists of 32 semester units of coursework composed of pedagogical knowledge, skills, and strategies necessary to meet the needs of all students. The program is aligned with the California Standards for the Teaching Profession. Interns earn 10 semester units, "Practice in Teaching" activities, applying concepts and skills addressed in the coursework. All instructors possess appropriate qualifications for the courses they teach.

A system of support is provided: master teachers, support providers, assessment coaches and instructors.

Interns create a portfolio, integrating theoretical and pedagogical concepts introduced in courses. The interns portfolio serves as record of progress in Academy coursework, in meeting the CCTC Credential Standards and Teacher Performance Expectations. It also provides the structure for the "Practice in Teaching" course requirements.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: Orange County Consortium District Intern Program
--

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Orange County Department of Education District Intern Program serves a consortium of school districts by offering a two-year alternative Multiple Subject Credential program. The program's mission is to educate novice teachers to become reflective practitioners committed to continual professional growth and the integration of current theory and best practices to foster the academic, social, and emotional development of all their students. Intern teachers are supported and instructed by a community of professional educators including course instructors, practicum supervisors, an academic advisor, a school-based peer coach, a principal, and a district human resource administrator. The program's clientele is mainly from traditionally underrepresented groups in the teaching profession such as Latinos and males.

The intern teachers join a cohort taking coursework together over four semesters and one summer session. The intern's teaching practice is supervised for three semesters. Weekly consultation occurs with the intern's peer coach at the school site. A professional portfolio addressing the California Standards for the Teaching Profession is required and interns present their portfolio to an exit panel of educators. The program offers preparation for taking the RICA (Reading Instruction Competence Assessment) and three CLAD (Crosscultural, Language, and Academic Development) exams to qualify for CLAD certification.

Consortium school districts accept course credit toward salary increments and invests in the intern teacher by providing a financial contribution for the peer coach compensation and six release days over the two-year period to observe exemplary teaching and to prepare their professional portfolio.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The Orange County Department of Education District Intern Program strives to be a client-centered credential program. The coursework and supervision are specifically designed to blend theory and practice for the novice teacher while maintaining a professional standards-based curriculum. The program is small and can customize the support to meet the individual needs of our teacher clients. This includes adjusting the schedule to meet the demands of working teachers and flexing with deadlines that conflict with teaching duties such as parent conferences and year-round school cycles. Beyond the coursework offered, intern teachers attend intensive test preparation classes and tutorial reviews for the state-required examinations.

The faculty and staff provide a team approach for the support and education of each intern teacher. This support network, coordinated by the advisor, monitors the intern's academic and professional growth. The advisor works with the practicum supervisor, peer coach, school principal, and human resource administrator as a team. When needed, the team assembles to discuss the progress and challenges facing the intern teacher and facilitates any interventions and individualized response to the situation.

The program's faculty, which are all part-time employees, consists of a blend of practitioners, including National Board Certified Teachers, and university adjunct faculty. Current teachers and administrators provide the rich experiences of the current realities of the classroom and school with the professional practitioner perspective. The university adjunct faculty contributes the depth and breadth of the theoretical knowledge base and a research-oriented perspective.

**Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program**

**New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place
in 2000-2001**

Since last year, a university-based external evaluator conducted a program evaluation study of the District Intern Program's first graduates, their principals, peer coaches, and practicum supervisors. Using confidential surveys, interviews, and focus groups, the study addressed this question: How well did the program support its first cohort of intern teachers in meeting program goals and aspirations?

Seventy-five percent of the interns rated the overall program "excellent" or "good". Ninety percent of interns responded "very prepared" or "prepared" in five of the six domains of the California Standards of the Teaching Profession. Seventy-five percent of intern teachers responded "very prepared" or "prepared" in the assessment of student learning domain. Eighty-six percent of principals rated their interns as "very prepared". Intern teachers identified these program strengths: personal support, reasonable tuition, convenience of class locations, quality instructors, and weekly class meetings.

The study revealed that the District Intern Program contains all five elements of an effective alternative certification program: strong academic coursework, field-based, cohort model, support and mentoring, and collaboration (Feistritz, 1999).

Currently, faculty teams are collaborating to realign all coursework and practicum to address the new state teacher preparation program standards. Four key strands of learning will be woven throughout the curriculum: literacy, English language learning, assessment, and technology.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Project IMPACT - San Joaquin County Office of Education**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Project IMPACT is a district intern program sponsored by San Joaquin County Office of Education in partnership with 31 school districts in and around San Joaquin County. School districts vary from single school rural districts to large unified urban districts. Participation ranges from one intern or pre-intern to more than 100 within a district. IMPACT provides training for both multiple and single subject teacher candidates.

The majority of teacher candidates within this program are recruited from the communities they serve and are often more mature than the typical college student. Many are changing careers to pursue teaching. IMPACT has also attracted a large population of under-represented minority candidates, as well as a higher proportion of men interested in teaching elementary school. All candidates within the IMPACT program are interested in teaching in hard-to-staff schools including underperforming urban schools.

The goal of Project IMPACT is to support and train the best teachers for San Joaquin's classrooms. This is accomplished by attracting highly motivated, qualified candidates and providing them with intensive support, individualized coaching, and extensive coursework. They participate in 120 hours of preservice training prior to their internship. Concurrent with their teaching assignment, candidates attend 2 years of coursework (approx. 350 hours); they are observed and coached by a supervisor a minimum of twenty times within their first year, ten times within their second year. Additionally, they are supported by an on-site peer, and placed in cohort groups with other interns.

Interns within the Project IMPACT program become excellent teachers for the diverse students living in our area.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

1. Support: Candidates are provided with multiple layers of support. These include the assignment of an on-site peer coach, a practicum supervisor from the program, and currently practicing faculty members. Candidates are also placed in cohort groups providing an additional support structure.

Cohort groups provide the final structure for support and potentially the most important. Students attend all courses together and provide the support to each other needed to succeed in such an intensive program. There is a strong link between teaching efficacy and cohort support. We feel that the cohort structure in place in Project IMPACT is a key ingredient to candidate success. Intern survey data aligns with this.

2. There is a commitment on the part of all partners to assist in the growth and development of interns. All parties work together to provide candidates with opportunities to learn.

3. Instruction. Courses are predominately taught by K-12 teachers. This provides candidates with access to expert teachers who apply theory everyday. Five faculty members are current or former Teachers of the Year and all have at least Masters degrees. The faculty is representative of the diverse ethnicities and cultures found in our community. IMPACT interns also receive more coursework than in traditional programs. The attend approximately 350 hours of coursework concurrent with their classroom assignment.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: Project Pipeline

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Project Pipeline's mission is to provide eligible individuals an affordable and convenient way to earn a California teaching credential.

Project Pipeline serves as a means for school districts to develop their teacher pool by allowing eligible individuals to become teacher interns, and earn at least a first year teacher salary, as they learn required credentialing coursework and gain on-the-job experience through T.E.A.C.H. (Teacher Education Alternative Certification and Hiring) the collaborative district intern program.

**Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates
During 2000-2001**

Project Pipeline is a two-year teacher credentialing program that allows the participant to teach full-time at one of twenty-four participating school districts in either Sacramento, Alameda or Contra Costa counties. The program has a focused recruitment campaign that aggressively recruits candidates who are proficient in mathematics, science and English as well as candidates from under-represented ethnic minority groups. A cohort of interns take their courses in the evening and weekends and are taught by well-regarded professors and practitioners active in the field of education. Interns teach with the assistance and guidance of qualified mentor teachers and supervisors who are veterans in the teaching field. Upon completion of the credentialing requirements of the program, an intern earns a California Professional Clear single or multiple subject teaching credential (awarded by the California Commission on Teacher Credentialing). The program qualities are: 1) Ninety-five percent of the participants remain in the classroom after five years, mostly in the urban city school to which they were originally assigned; 2) There is a strong advocacy from the staff, instructors and supervisors for the new teachers to succeed; 3) Structured teaching practices are deemed essential in Project Pipeline for preparation of new teachers; 4) The students are cohorted together for the entire two year program. They work together in teams and gain guidance from each other; 5) Mentoring is actively practiced through all the levels of Project Pipeline. The staff have strong people skills and are encouraged to bring out the best attitudes from the intern teachers.

Institution/Program: **Project Pipeline**

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Plans for the future include revising all syllabi and courses needed by teacher candidates to meet the new credentialing requirements established with the passage of SB 2042.

<http://www.projectpipeline.org>

Part B: Quantitative Information about Each Teacher Preparation Program

Number of Candidates Who Completed One or More Courses During 2000-2001
in a Program Which Included Supervised Student Teaching or Internship Teaching

	Totals	Programs with Supervised Student Teaching	Programs with Internship Teaching
Multiple Subject Candidates	70	0	70
Single Subject Candidates	49	0	49
Education Specialist Candidates	0	0	0
Totals	119	0	119

Numbers of Candidates in Supervised Student Teaching/Internship Teaching
During 2000-2001

	Totals	Admitted Candidates in Supervised Student Teaching	Admitted Candidates in Internship Teaching
Multiple Subject Candidates	70	0	70
Single Subject Candidates	49	0	49
Education Specialist Candidates	0	0	0
Totals	119	0	119

Part B (continued): Quantitative Information about Each Teacher Preparation Program

Number of Supervising Teachers During 2000-2001
(Includes full-time and part-time supervisors)

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs			8
In Academic Positions with Rights and Responsibilities			3
In Non-Academic Positions without Rights and Responsibilities			5
Single Subject Programs			8
In Academic Positions with Rights and Responsibilities			2
In Non-Academic Positions without Rights and Responsibilities			6
Education Specialist Programs			
In Academic Positions with Rights and Responsibilities			
In Non-Academic Positions without Rights and Responsibilities			

Ratios Between Student/Intern Teachers and Full-time Supervising Teachers
During 2000-2001*

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs			16 :1
Single Subject Programs			16 :1
Education Specialist Programs			

* California teacher preparation programs do not typically have full-time supervisors. Ratios are based on budgetary equivalencies, which vary between programs. Therefore, caution should be exercised when making ratio comparisons between programs.

Business SSAT (15)	1	–	–	100%
Aggregate	23	23	100%	99%

¹ Pass rates are not calculated for programs with less than ten candidates.
Caution should be exercised when analyzing pass rates.
The effect of one candidate's performance can have a larger impact on smaller programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a “low performing” program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2000-2001 (Annual Report Pursuant to Federal HEA, Title II, Section 207)
Institution/Program: San Diego City Unified School District

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

San Diego City Schools Elementary Bilingual District Intern Program is an alternative certification program for the training of elementary bilingual English-Spanish speaking teachers.

Bilingual candidates, who are selected for the Elementary Bilingual District Intern Program, have an opportunity to earn full-time salaries and benefits as elementary teachers in bilingual classrooms while pursuing a district sponsored, two-year professional development plan.

Upon completion of the two-year professional development plan, the district recommends the intern graduate for a California Multiple Subjects Credential with a Bilingual, Crosscultural, Language and Academic Development (BCLAD) Emphasis.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2000-2001

The Bilingual District Intern Program provides support for the intern teachers in the following ways:

1. The intern candidates participate in 212-hour Preservice during the months of June and August, prior to their classroom assignment. This intensive training includes 112 hours of training and a three-week, 100-hour bilingual classroom practicum with a permanent, experienced bilingual teacher. The cooperating teacher observes lessons and provides immediate feedback for the intern.
2. The interns enter the intern program as a cohort, and remain as a cohort in the program for the duration of five semesters. The cohort meets weekly during the coursework. Weekly seminar time is used for problem-solving, portfolio assignments and program updates.
3. Interns attend classes weekly for five semesters in order to earn district credit.
4. San Diego City Schools releases full-time classroom teachers to assist and coach the interns. The ratio of support provider to intern is 1:5 in the first year of the program, and 1:8 in the second year. Support providers observe instruction and give immediate feedback to the interns in order to improve their practice. Student work is analyzed with the support provider and instruction is modified to meet the learners' needs. This relationship changes in the second year of the internship as the support provider serves as an advisor during the professional portfolio development process. As a teacher peer, the support provider discusses and reflects with the intern, their professional goals, strengths and areas for improvement.

Part A (continued):

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2000-2001

Teacher quality is the most crucial standard for hiring teachers to work for the San Diego Unified School District. Interns are expected to excel as bilingual classroom teachers as well as in their teacher preparation courses. It is a demanding program that requires maturity and dedication from its participants. The Bilingual Intern Program has recently implemented a rigorous selection and evaluation process for its interns in order to insure that only the best teachers are credentialed to teach bilingual students.
